# Netskope Certified Cloud Security Architect actual exam torrent & NSK300 dumps will facilitate exam success

What's more, part of that 2Pass4sure NSK300 dumps now are free: https://drive.google.com/open?id=10tmj732YSeaXG7dVyng24zB_Fd5oN54v

Our NSK300 study materials are full of useful knowledge, which can meet your requirements of improvement. Also, it just takes about twenty to thirty hours for you to do exercises of the NSK300 study guide. The learning time is short but efficient. You will elevate your ability in the shortest time with the help of our NSK300 Preparation questions. At the same time, you will be bound to pass the exam and achieve the shining NSK300 certification which will help you get a better career.

## Netskope NSK300 Exam Syllabus Topics:

| Topic | Details |
|---|---|
| Topic 1 | • Cloud Security Solutions: This section of the exam measures the skills of Cloud Security Analysts and covers the core components and functions of the Netskope Security Cloud Platform. It includes understanding how the platform integrates with enterprise environments, the deployment methods supported by Netskope, and the role of various microservices in delivering cloud-based security. The focus is on ensuring candidates can recognize how Netskope's architecture protects users, applications, and data across cloud services. |
| Topic 2 | • Netskope Platform Management: This section of the exam measures the skills of Security Administrators and covers essential administrative tasks required to manage the Netskope Security Cloud Platform. It includes managing DLP functions, handling identity integrations, and monitoring Netskope components to maintain platform stability. The domain ensures professionals can manage daily operations and maintain strong access, data, and security controls. |
| Topic 3 | • Netskope Platform Monitoring: This section of the exam measures the capabilities of Security Operations Center (SOC) Analysts and focuses on monitoring the platform through reporting and analytics tools. It highlights how Netskope insights support visibility into user activity, cloud app behavior, and policy effectiveness to help organizations maintain a continuous cloud security posture. |

| Topic 4 | • Netskope Platform Implementation: This section of the exam measures the abilities of Cloud Security Engineers and focuses on implementing the Netskope Security Cloud Platform using recommended steering architectures and deployment approaches. It includes key concepts such as API-enabled protection and real-time protection features, ensuring candidates understand how to deploy Netskope to secure cloud usage effectively within enterprise networks. |
|---|---|
| Topic 5 | • Netskope Platform Troubleshooting: This section of the exam measures the skills of Support Engineers and focuses on identifying and resolving common issues within the Netskope platform. It includes troubleshooting client connectivity problems, analyzing steering methods, resolving general connectivity concerns, and addressing SAML integration issues. The section ensures candidates can diagnose and fix issues that impact platform performance and user access. |

## Pdf NSK300 Exam Dump | Reliable NSK300 Exam Materials

Our NSK300 quiz torrent boost 3 versions and they include PDF version, PC version, App online version. Different version boosts different functions and using method. For example, the PDF version is convenient for the download and printing our NSK300 exam torrent and is easy and suitable for browsing learning. It can be printed on the papers which are convenient for you to take notes and learn at any time and place. You can practice NSK300 Quiz prep repeatedly and there are no limits for the amount of the persons and times. And the PC version of NSK300 quiz torrent can stimulate the real exam's scenarios, is stalled on the Windows operating system and runs on the Java environment. You can use it any time to test your own Exam stimulation tests scores and whether you have mastered our NSK300 exam torrent.

## Netskope Certified Cloud Security Architect Sample Questions (Q11-Q16):

**NEW QUESTION # 11**
Review the exhibit.

User = All Users: click to select subset of users ✕

ADD CRITERIA ▾

Application ▾ ●

Application = Microsoft OneDrive

ACTIVITIES & CONSTRAINTS EDIT

Activity = Upload

ADD CRITERIA ▾

DLP Profile = DLP-SourceCode (predefined) DLP-PCI (predefined) DLP-PII (predefined) ✕

PROFILE ACTION ⓘ

| | |
|---|---|
| DLP-SourceCode | Alert |
| DLP-PCI | Block : Default Template ⋯ |
| DLP-PII | Useralert : Default Template ⋯ |

☑ Set action for each profile ●

+ ADD TRAFFIC ACTION

Sample

+ POLICY DESCRIPTION
+ EMAIL NOTIFICATION

🔵 Enabled

A user has attempted to upload a file to Microsoft OneDrive that contains source code with Pll and PCI data.
Referring to the exhibit, which statement Is correct?

- A. The user will be blocked and a single Incident will be generated referencing the DLP-PCI profile.
- B. The user will be blocked and a separate incident will be generated for each of the matching DLP profiles.
- C. The user will be blocked and a single Incident will be generated referencing all of the matching DLP profiles
- D. The user will be alerted and a single incident will be generated referencing the DLP-PII profile.

**Answer: B**

Explanation:
In the given scenario, a user is attempting to upload a file containing sensitive PII and PCI data to Microsoft OneDrive. The
Netskope Security Cloud provides real-time data and threat protection when accessing cloud services, websites, and private apps
from anywhere, on any device. Based on the exhibit provided, different DLP (Data Loss Prevention) profiles are triggered - DLP-
SourceCode, DLP-PCI, and DLP-PII. Each of these profiles has specific actions associated with them; for instance, an alert is
generated for Source Code while blocking actions are initiated for PCI and PII data. Since multiple DLP profiles are triggered due
to the sensitive nature of the content in the file being uploaded, separate incidents will be generated for each matching profile ensuring
comprehensive security coverage and incident reporting.

**NEW QUESTION # 12**

You deployed Netskope Cloud Security Posture Management (CSPM) using pre-defined benchmark rules to monitor your cloud posture in AWS, Azure, and GCP. You are asked to assess if you can extend the Netskope CSPM solution by creating custom rules for each environment.

Which statement is correct?

- A. With Netskope CSPM, you can create custom rules using Domain Specific Language for AWS. Azure, but not for GCP.
- B. With Netskope CSPM, you can create custom rules using Domain Specific Language for AWS. Azure, and GCP
- C. Custom rules using Domain Specific Language are only available when using SSPM.
- D. You will need to evaluate SaaS Security Posture Management (SSPM) in addition to CSPM so that rules applied to GCP will align with Google Workspace
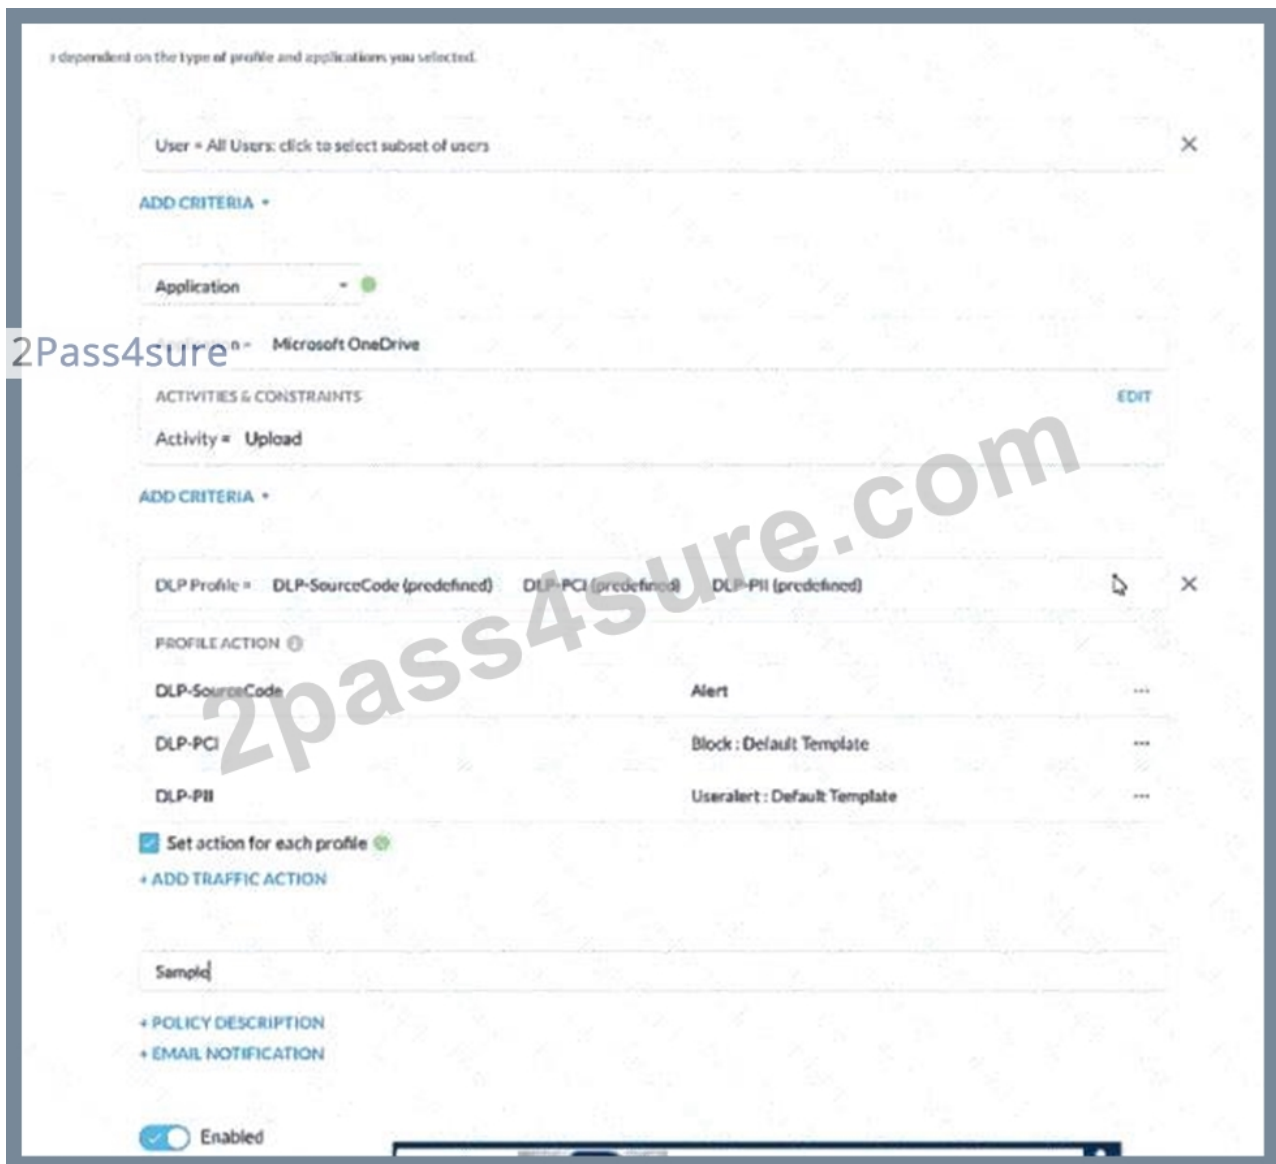

**Answer: B**

Explanation:

Netskope Cloud Security Posture Management (CSPM) allows for the creation of custom rules using Domain Specific Language (DSL) for all three major cloud platforms: AWS, Azure, and GCP. This capability is integral to CSPM and enables organizations to tailor their security posture assessments to their specific needs across different cloud environments.

The ability to create custom rules using DSL within Netskope CSPM for AWS, Azure, and GCP is documented in the Netskope Knowledge Portal. It provides detailed instructions on how to build custom rules under Policies > Security Posture > Profiles & Rules for security assessment of resources across these cloud platforms

**NEW QUESTION # 13**

Review the exhibit.

A user has attempted to upload a file to Microsoft OneDrive that contains source code with PII and PCI data.
Referring to the exhibit, which statement is correct?

- A. The user will be blocked and a single Incident will be generated referencing all of the matching DLP profiles
- B. The user will be blocked and a separate incident will be generated for each of the matching DLP profiles.
- C. The user will be blocked and a single Incident will be generated referencing the DLP-PCI profile.
- D. The user will be alerted and a single incident will be generated referencing the DLP-PII profile.

**Answer: A**

**NEW QUESTION # 14**
You are using Netskope CSPM for security and compliance audits across your multi-cloud environments. To decrease the load on the security operations team, you are researching how to auto-re mediate some of the security violations found in low-risk environments.
Which statement is correct in this scenario?

- A. You can use Netskope Auto-remediation frameworks from the public Netskope GitHub Open Source repository for auto-re mediation of security violation results.
- B. You can use Netskope Cloud Exchange for auto-remediation of security violation results.
- C. Netskope does not support automatic remediation of security violation results due to the high risk associated with it.
- D. You can use Netskope API-enabled Protection for auto-remediation of security violation results.

**Answer: A**

Explanation:
Netskope supports automatic remediation of security violations through its Auto-Remediation frameworks, which are available in the public Netskope GitHub Open Source repository. These frameworks allow for the automatic mitigation of risks associated with security misconfigurations in your cloud environment. The Netskope Auto-Remediation framework for AWS, for example, deploys a set of AWS Lambda functions that query the Netskope API at scheduled intervals and automatically mitigates supported violations1. Similarly, there are frameworks for GCP and other cloud environments that follow the same principle2. This capability is particularly useful for low-risk environments where the security operations team's workload can be reduced by automating the remediation process.
The answer is based on the information provided by Netskope's community resources and documentation, which detail the use of their Auto-Remediation frameworks for various cloud platforms

## NEW QUESTION # 15
You want to integrate with a third-party DLP engine that requires ICAP. In this scenario, which Netskope platform component must be configured?

- A. Secure Forwarder
- B. On-Premises Log Parser (OPLP)
- C. Netskope Cloud Exchange
- D. Netskope Adapter

**Answer: A**

## NEW QUESTION # 16
......

You can enter a better company and improve your salary if you have certificate in this field. NSK300 training materials of us will help you obtain the certificate successfully. We have a professional team to collect the latest information for the exam, and if you choose us, you can know the latest information timely. In addition, we provide you with free update for 365 days after payment for NSK300 Exam Materials, and the latest version will be sent to your email address automatically.
