Valid NSK300 Test Preparation - Exam NSK300 Topic

The PassTestking is one of the leading Netskope NSK300 exam preparation study material providers in the market. The PassTestking offers valid, updated, and real Netskope Certified Cloud Security Architect NSK300 exam practice test questions that assist you in your NSK300 Exam Preparation. The Netskope NSK300 exam questions are designed and verified by experienced and qualified Netskope exam trainers.

Netskope Certified Cloud Security Architect Sample Questions (Q44-Q49):

NEW QUESTION # 44

A hospital has a patient form that they share with their patients over Gmail. The blank form can be freely shared among anyone. However, if the form has any information filled out, the document is considered confidential.

Which rule type should be used in the DLP profile to match such a document?

- A. Use predefined DLP Rule(s) that match the patient name.

- B. Use a dictionary rule for all your patient names.
- C. Use Exact Match with patient names
- D. Use fingerprint classification.

Answer: D

Explanation:

The appropriate rule type to use in the DLP profile for a document that is considered confidential when filled out is fingerprint classification. Fingerprinting is a method used to identify and protect sensitive data within documents. It works by creating a digital fingerprint of a file, which can then be used to detect any copies or derivatives of that file. In this case, fingerprinting would allow the hospital to differentiate between the blank patient form, which can be freely shared, and the same form with patient information filled out, which is confidential.

NEW QUESTION # 45

You are asked to ensure that a Web application your company uses is both reachable and decrypted by Netskope. This application is served using HTTPS on port 6443. Netskope is configured with a default Cloud Firewall configuration and the steering configuration is set for All Traffic.

Which statement is correct in this scenario?

- A. Enable "Steer non-standard ports" in the steering configuration and add the domain and port as a new non-standard port
- B. Nothing is required since Netskope is steering all traffic.
- C. Create a Firewall App in Netskope along with the corresponding Real-time Protection policy to allow the traffic.
- D. Enable "Steer non-standard ports" in the steering configuration and create a corresponding Real-time Protection policy to allow the traffic

Answer: A

Explanation:

To ensure that the web application using HTTPS on port 6443 is both reachable and decrypted by Netskope, the correct action is to enable "Steer non-standard ports" in the steering configuration and add the domain and port as a new non-standard port. This is because Netskope's default configuration steers standard HTTP/HTTPS traffic, typically on ports 80 and 443. Since port 6443 is a non-standard port for HTTPS traffic, it requires explicit configuration to be steered through Netskope.

The process for configuring non-standard ports in Netskope is detailed in the Netskope Knowledge Portal, which provides step-by-step instructions on how to steer HTTP(S) traffic over non-standard ports¹. This includes adding the specific non-standard port number in the steering configuration to ensure that traffic to and from that port is properly handled by Netskope.

NEW QUESTION # 46

Review the exhibit.

1

SOURCE ⓘ	DESTINATION	PROFILE	ACTION
Any	Microsoft Office 365 Suite:AcmeCorp	None	Allow
Any	Microsoft Office 365 OneDrive for Business, Microsoft OneDrive, MS GCC Office 365 OneDrive for Business Create, Post, Share, Upload	None	Block Default Template
Any	Microsoft Office 365 OneDrive for Business:AcmeCorp	None	Allow
Any	Microsoft Office 365 Suite	None	Block Default Template

2

SOURCE ⓘ	DESTINATION	PROFILE	ACTION
Any	Microsoft Office 365 Suite:AcmeCorp	None	Allow
Any	Microsoft Office 365 Suite	None	Block Default Template
Any	Microsoft Office 365 OneDrive for Business, Microsoft OneDrive, MS GCC Office 365 OneDrive for Business	None	Allow

3

SOURCE ⓘ	DESTINATION	PROFILE	ACTION
Any	Microsoft Office 365 Suite:AcmeCorp	None	Allow
Any	Microsoft Office 365 Suite	None	Block Default Template

4

SOURCE ⓘ	DESTINATION	PROFILE	ACTION
Any	Microsoft Office 365 OneDrive for Business, Microsoft OneDrive, MS GCC Office 365 OneDrive for Business Create, Post, Share, Upload	None	Block Default Template
Any	Microsoft Office 365 OneDrive for Business:AcmeCorp	None	Allow

AcmeCorp has recently begun using Microsoft 365. The organization is concerned that employees will start using third-party non-AcmeCorp OneDrive instances to store company data. The CISO asks you to use Netskope to create a policy that ensures that no data is being uploaded to non-AcmeCorp instances of OneDrive.

Referring to the exhibit, which two policies would accomplish this posture? (Choose two.)

- A. 0

- B. 1
- C. 2
- D. 3

Answer: B,D

Explanation:

To ensure that no data is uploaded to non-AcmeCorp instances of OneDrive, the policies that would accomplish this are:

Policy B: This policy allows traffic only for AcmeCorp's OneDrive and blocks all other Microsoft 365 Suite traffic. It ensures that data is not uploaded to non-AcmeCorp OneDrive instances by restricting access to only the corporate instance of OneDrive.

Policy C: This policy allows traffic for AcmeCorp's Microsoft 365 Suite but blocks all other OneDrive for Business traffic. It achieves the same outcome by permitting corporate suite usage while preventing uploads to any OneDrive for Business instances that are not part of AcmeCorp.

These policies are designed to provide granular control over the data flow, ensuring that company data remains within the corporate environment and is not transferred to external or personal storage solutions.

NEW QUESTION # 47

Review the exhibit.

You are attempting to block uploads of password-protected files. You have created the file profile shown in the exhibit. Where should you add this profile to use in a Real-time Protection policy?

- A. Add the profile to a Constraint profile that is used in a Real-time Protection policy.

- B. Add the profile to a Malware Detection profile that is used in a Real-time Protection policy.
- **C. Add the profile to a DLP profile that is used in a Real-time Protection policy.**
- D. Add the profile directly to a Real-time Protection policy as a Constraint.

Answer: C

Explanation:

In Netskope Cloud Security, to block uploads of password-protected files, you should add the file profile to a DLP (Data Loss Prevention) profile that is used in a Real-time Protection policy. The DLP profiles in Netskope are designed to detect and protect sensitive data in real-time and at rest across the cloud environment. This approach ensures that any file matching the criteria set in the file profile, such as being password-protected, will trigger the DLP rules and prevent the upload action in real-time.

NEW QUESTION # 48

You want to enable the Netskope Client to automatically determine whether it is on-premises or off-premises. Which two options in the Netskope UI would you use to accomplish this task? (Choose two.)

- **A. the Enable Dynamic Steering option in the Steering Configuration section of the UI**
- B. the New Exception option in the Traffic Steering options of the UI
- C. the All Traffic option in the Steering Configuration section of the UI
- **D. the On Premises Detection option under the Client Configuration section of the UI**

Answer: A,D

Explanation:

To enable the Netskope Client to automatically determine whether it is on-premises or off-premises, you can use the following options in the Netskope UI:

Enable Dynamic Steering:

This option is available in the Steering Configuration section of the UI.

By enabling dynamic steering, the Netskope Client can intelligently determine the appropriate data plane (on-premises or cloud) based on the user's location and network conditions.

It ensures that traffic is directed to the optimal data plane for improved performance and security.

Reference:

On Premises Detection:

This option is available under the Client Configuration section of the UI.

By configuring on-premises detection, the Netskope Client can identify whether it is connected to the local network (on-premises) or accessing resources from outside (off-premises).

It helps in applying relevant policies and steering traffic accordingly.

NEW QUESTION # 49

.....

our NSK300 exam guide has not equivocal content that may confuse exam candidates. All question points of our NSK300 study quiz can dispel your doubts clearly. Get our NSK300 certification actual exam and just make sure that you fully understand it and study every single question in it by heart. And we believe you will get benefited from it enormously beyond your expectations with the help of our NSK300 Learning Materials.

Valid NSK300 Test Preparation: <https://www.passtestking.com/Netskope/NSK300-practice-exam-dumps.html>

With experienced experts to compile and verify NSK300 training materials, the quality can be guaranteed. The requirements for NSK300 may seem like a simpler subset of those in NSK300, but closer inspection reveals that this exam places heavier emphasis on the use of PowerShell and the Netskope NCCSA CLI for setup and configuration. Passing the NSK300 test certification can make them become that kind of people and if you are one of them buying our NSK300 study materials will help you pass the NSK300 test smoothly with few efforts needed.

The timing function of our NSK300 training quiz helps the learners to adjust their speed to answer the questions and keep alert and our NSK300 study materials have set the timer.

The developer community is broad and, for the most part, supportive of one another. With experienced experts to compile and verify NSK300 Training Materials, the quality can be guaranteed.

Netskope NSK300 Questions - With 25% Discount Offer [2025]

The requirements for NSK300 may seem like a simpler subset of those in NSK300, but closer inspection reveals that this exam places heavier emphasis on the use of PowerShell and the Netskope NCCSA CLI for setup and configuration.

Passing the NSK300 test certification can make them become that kind of people and if you are one of them buying our NSK300 study materials will help you pass the NSK300 test smoothly with few efforts needed.

Another advantage of our accurate NSK300 Dumps collection is allowing candidates to apply for full refund if you fail the exam, While the knowledge you study may be not enough to pass the actual test, thus you need some useful study material, such as the NSK300 examkiller study guide from our site.
