

Netskope NSK300 Exam Simulations - New NSK300 Exam Bootcamp

What's more, part of that ValidDumps NSK300 dumps now are free: <https://drive.google.com/open?id=1M5bq4Cml4SudfOMX2cwE96qmEPNZMNdH>

In the competitive society, if you want to compete with others, you should equip yourself with strong technological skills. Recently, the proficiency of NSK300 certification has become the essential skills in job seeking. Now, NSK300 latest exam torrent will give you a chance to be a certified professional by getting Netskope certification. With the study of NSK300 Study Guide torrent, you will feel more confident and get high scores in your upcoming exams.

In order to meet the demands of all customers, our company has a complete set of design, production and service quality guarantee system, the Netskope Certified Cloud Security Architect test guide is perfect. We can promise that quality first, service upmost. If you buy the NSK300 learning dumps from our company, we are glad to provide you with the high quality NSK300 study question and the best service. The philosophy of our company is "quality is life, customer is god." We can promise that our company will provide all customers with the perfect quality guarantee system and sound management system. It is not necessary for you to have any worry about the quality and service of the NSK300 learning dumps from our company. We can make sure that our company will be responsible for all customers. If you decide to buy the NSK300 study question from our company, you will receive a lot beyond your imagination. So hurry to buy our products, it will not let you down.

Netskope - NSK300 - Netskope Certified Cloud Security Architect –Updated Exam Simulations

We offer you free demo for you to have a try before buying the NSK300 study guide, so that you can have a better understanding of what you are going to buy. NSK300 exam dumps of us also offer you free update for one year after purchasing, and our system will send the latest version to you automatically. Besides we have the online and offline chat service stuff, and if you have any questions about the NSK300 Study Guide, you can consult them, and they will offer you the suggestions.

Netskope Certified Cloud Security Architect Sample Questions (Q40-Q45):

NEW QUESTION # 40

A company's architecture includes a server subnet that is logically isolated from the rest of the network with no Internet access, no default gateway, and no access to DNS. New resources can only be provisioned on virtual resources in that segment and there is a firewall that is tunnel-capable securing the perimeter of the segment. The only requirement is to have content filtering for any server that might access the Internet using a browser.

Which two Netskope deployment methods would achieve this requirement? (Choose two.)

- A. Deploy Data Plane on Premises (DPoP) with a proxy configuration on the servers.
- B. Deploy IPsec or GRE tunnels in the segment to steer traffic from the servers to Netskope.
- C. Install the Netskope Client on the servers
- D. Deploy a mobile profile on the servers.

Answer: A,B

Explanation:

For a server subnet that is isolated and requires content filtering for any server that might access the Internet using a browser, the two Netskope deployment methods that would meet this requirement are:

* B. Deploy Data Plane on Premises (DPoP) with a proxy configuration on the servers: Deploying DPoP would allow the isolated servers to connect to the Netskope cloud for content filtering through a proxy configuration. This setup would enable the servers to have controlled access to the Internet for content filtering purposes without requiring direct Internet access¹.

* C. Deploy IPsec or GRE tunnels in the segment to steer traffic from the servers to Netskope: By deploying IPsec or GRE tunnels, the traffic from the servers can be securely directed to Netskope for content filtering. This method is suitable for environments where servers do not have direct Internet access, as the tunnel provides a secure path for traffic to reach Netskope's cloud services¹. These deployment methods are designed to work in environments with strict network isolation and provide the necessary content filtering capabilities for servers accessing the Internet.

The deployment methods and their suitability for isolated server subnets are based on Netskope's documentation and resources, which detail various deployment options and their use cases²¹.

NEW QUESTION # 41

Review the exhibit.

dependent on the type of profile and applications you selected.

User = All Users: click to select subset of users

ADD CRITERIA +

Application = Microsoft OneDrive

ACTIVITIES & CONSTRAINTS

Activity = Upload

ADD CRITERIA +

DLP Profile = DLP-SourceCode (predefined) DLP-PCI (predefined) DLP-PII (predefined)

PROFILE ACTION ⓘ

| | | |
|----------------|-----------------------------|-----|
| DLP-SourceCode | Alert | ... |
| DLP-PCI | Block: Default Template | ... |
| DLP-PII | Useralert: Default Template | ... |

☒ Set action for each profile

+ ADD TRAFFIC ACTION

Sample

+ POLICY DESCRIPTION

+ EMAIL NOTIFICATION

☒ Enabled

A user has attempted to upload a file to Microsoft OneDrive that contains source code with PII and PCI data. Referring to the exhibit, which statement is correct?

- A. The user will be alerted and a single incident will be generated referencing the DLP-PII profile.
- B. The user will be blocked and a single incident will be generated referencing the DLP-PCI profile.

- C. The user will be blocked and a single Incident will be generated referencing all of the matching DLP profiles
- D. The user will be blocked and a separate incident will be generated for each of the matching DLP profiles.

Answer: C

NEW QUESTION # 42

You need to extract events and alerts from the Netskope Security Cloud platform and push it to a SIEM solution. What are two supported methods to accomplish this task? (Choose two.)

- A. Use the REST API.
- B. Use Cloud Log Shipper.
- C. Use Cloud Ticket Orchestrator.
- D. Stream directly to syslog

Answer: A,B

Explanation:

To extract events and alerts from the Netskope Security Cloud platform and integrate them with a SIEM (Security Information and Event Management) solution, you can utilize the following supported methods:

Cloud Log Shipper (CLS):

The Cloud Log Shipper is designed to forward Netskope logs to external systems, including SIEMs.

It allows you to export logs in real-time or batch mode to a destination of your choice.

By configuring CLS, you can ensure that Netskope events and alerts are sent to your SIEM for further analysis and correlation.

Reference:

REST API:

The Netskope Security Cloud provides a comprehensive REST API that allows you to programmatically retrieve data, including events and alerts.

You can use the REST API to query specific logs, incidents, or other relevant information from Netskope.

By integrating with the REST API, you can extract data and push it to your SIEM solution.

Netskope Cloud Security

Netskope Resources

Netskope Documentation

These methods ensure seamless data flow between Netskope and your SIEM, enabling effective security monitoring and incident response.

NEW QUESTION # 43

You deployed IPsec tunnels to steer on-premises traffic to Netskope. You are now experiencing problems with an application that had previously been working. In an attempt to solve the issue, you create a Steering Exception in the Netskope tenant for that application; however, the problems are still occurring. Which statement is correct in this scenario?

- A. Steering bypasses for IPsec tunnels must be applied at your edge network device.
- B. You must create a private application to steer Web application traffic to Netskope over an IPsec tunnel.
- C. You must deploy a PAC file to ensure the traffic is bypassed pre-tunnel
- D. Exceptions only work with IP address destinations

Answer: A

Explanation:

In the scenario where you have deployed IPsec tunnels to steer on-premises traffic to Netskope and are experiencing issues with an application, the correct statement is C: Steering bypasses for IPsec tunnels must be applied at your edge network device. This means that to effectively bypass the steering for a specific application, the configuration must be done on the network device that is establishing the IPsec tunnel, such as a firewall or router. This device controls the traffic before it enters the tunnel, so applying the bypass there ensures that the application's traffic does not get directed through the tunnel and can reach its destination directly.

The solution is based on standard practices for IPsec tunnel configuration and steering exceptions as described in Netskope's documentation on traffic steering and IPsec configuration¹².

NEW QUESTION # 44

You are troubleshooting an issue with users who are unable to reach a financial SaaS application when their traffic passes through Netskope. You determine that this is because of IP restrictions in place with the SaaS vendor. You are unable to add Netskope's IP ranges at this time, but need to allow the traffic. How would you allow this traffic?

- A. Use Explicit Proxy Over Tunnel (EPoT) so the traffic will egress from the corporate data center.
- **B. Use Cloud Explicit Proxy so the traffic will egress from the corporate data center**
- C. Use an IPsec tunnel to forward traffic so it will egress from the corporate data center
- D. Use NPAT to implement Source IP anchoring so the traffic will egress from the corporate data center.

Answer: B

Explanation:

To allow traffic to a financial SaaS application that is being blocked due to IP restrictions, the best option is to use Cloud Explicit Proxy. This method allows traffic to egress from the corporate data center without requiring Netskope's IP ranges to be added to the SaaS vendor's allowlist. By configuring an allowlist in the Cloud Explicit Proxy settings, you can add any source egress IP addresses for your on-premises users, and Netskope will allow the traffic from the added user and IP address without authenticating.

NEW QUESTION # 45

.....

The price of our NSK300 exam materials is quite favourable no matter on which version. As you may find that we have three versions of the NSK300 study braindumps: PDF, Software and APP online. And if you buy the value pack, you have all of the three versions, the price is quite preferential and you can enjoy all of the study experiences. This means you can study NSK300 Practice Engine anytime and anywhere for the convenience these three versions bring.

New NSK300 Exam Bootcamp: <https://www.validdumps.top/NSK300-exam-torrent.html>

So you need to learn our NSK300 study materials carefully after you have paid for them, Make sure that you are using all of the NSK300 exam questions that we are creating for you so you can easily clear the Netskope NSK300 exam on your first attempt, Netskope NSK300 Exam Simulations Each of them has a set of answers and for each answer there is a detailed explanation which helps the student to understand and improve his/her knowledge, Netskope NSK300 Exam Simulations However, it's not always the same.

Though it is possible to manage each server locally, managing NSK300 these resources remotely can greatly improve productivity, But you're not a professional web copywriter.

So you need to learn our NSK300 Study Materials carefully after you have paid for them, Make sure that you are using all of the NSK300 exam questions that we are creating for you so you can easily clear the Netskope NSK300 exam on your first attempt.

Netskope NSK300 Exam | NSK300 Exam Simulations - Free Demo Download of New NSK300 Exam Bootcamp

Each of them has a set of answers and for each answer there is a NSK300 Testdump detailed explanation which helps the student to understand and improve his/her knowledge, However, it's not always the same.
