While making revisions and modifications to the Implementation Engineer - Data Protection Exam (NS0-528) practice exam, our team takes reports from over 90,000 professionals worldwide to make the Implementation Engineer - Data Protection Exam (NS0-528) exam questions foolproof. To make you capable of preparing for the Network Appliance NS0-528 exam smoothly, we provide actual Network Appliance NS0-528 exam dumps.

The web-based Network Appliance NS0-528 practice exam is compatible with all browsers like Chrome, Mozilla Firefox, MS Edge, Internet Explorer, Safari, Opera, and more. Unlike the desktop version, it requires an internet connection. The Implementation Engineer - Data Protection Exam (NS0-528) practice exam will ask real Implementation Engineer - Data Protection Exam (NS0-528) exam questions. Consistent practice with it relieves exam stress and boosts self-confidence. The web-based Implementation Engineer - Data Protection Exam (NS0-528) practice exam does not require additional software installation. All operating systems also support this Implementation Engineer - Data Protection Exam (NS0-528) practice test.

NS0-528 Valid Exam Camp Pdf & NS0-528 Exam Dumps Demo

All of the traits above are available in this web-based NS0-528 practice test of PrepAwayPDF. The main distinction is that the Network Appliance NS0-528 online practice test works with not only Windows but also Mac, Linux, iOS, and Android. Above all, taking the NS0-528 web-based practice test while preparing for the examination does not need any software installation. Furthermore, MS Edge, Internet Explorer, Opera, Safari, Chrome, and Firefox support the web-based Network Appliance NS0-528 practice test of PrepAwayPDF.

Network Appliance NS0-528 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Data Protection Solutions: This section of the exam measures the skills of Storage Architects and covers the foundational principles of designing data protection solutions. It focuses on creating comprehensive design documentation, understanding the various components involved, and identifying all critical solution dependencies to ensure a robust and reliable data protection strategy.
Topic 2	<ul style="list-style-type: none">• NetApp Data Protection Software: This section of the exam measures the skills of DevOps Engineers and focuses on the deployment and administration of NetApp's proprietary data protection software. A key part of this domain involves applying these solutions to protect modern containerized applications running in Kubernetes environments.
Topic 3	<ul style="list-style-type: none">• NetApp ONTAP Core Data Protection Features: This section of the exam measures the skills of Systems Administrators and validates core knowledge of data protection and redundancy within the ONTAP environment. It encompasses understanding how data efficiencies impact protection strategies and the practical knowledge required to deploy these data protection solutions effectively in a hybrid cloud infrastructure.
Topic 4	<ul style="list-style-type: none">• NetApp ONTAP Business Continuity Solutions: This section of the exam measures the skills of Disaster Recovery Specialists and covers advanced business continuity technologies. This includes the configuration and operation of SnapMirror active sync for continuous data replication and the execution of SVM-DR (Storage Virtual Machine Disaster Recovery) operations to ensure high availability.
Topic 5	<ul style="list-style-type: none">• Troubleshooting and Testing: This section of the exam measures the skills of Support Engineers and focuses on the practical skills needed to maintain data integrity. It involves troubleshooting common data protection configuration issues, executing well-defined Disaster Recovery (DR) procedures, and performing data restore operations to recover from data loss.

Network Appliance Implementation Engineer - Data Protection Exam Sample Questions (Q173-Q178):

NEW QUESTION # 173

You have two sites running NetApp ONTAP 9.14.1 clusters that have databases connecting through FC that have a near-zero RTO requirement.

What NetApp solution would allow a failover between the sites with a near-zero RTO?

- A. SnapMirror SVM
- B. SnapMirror active sync
- C. SVM data mobility
- D. BlueXP

Answer: B

Explanation:

SnapMirror active sync provides active-active synchronous replication for SAN workloads (including FC-attached databases), ensuring zero RPO and near-zero RTO. It enables automatic failover and failback between sites, making it the ideal solution for mission-critical applications requiring continuous availability.

NEW QUESTION # 174

You are running a NetApp AFF A220 cluster. Each node has one volume. You create Snapshot copies on both volumes every four hours and keep the copies for 30 days. You are running out of disk space and want to free up space. In this scenario, what do you do?

- A. Activate aggregate-background deduplication.
- **B. Activate aggregate-inline deduplication.**
- C. Add a capacity tier and set the tiering policy to snapshot-only.
- D. Add a disk shelf with NL-SAS HDDs.

Answer: B

NEW QUESTION # 175

Click the Exhibit button on the right.

You have an AFF A300 controller with four volumes in the aggregate that is shown in the exhibit. You replicate all four volumes to one aggregate on a FAS8200 controller in a different cluster.

Referring to the exhibit, what are the storage efficiency savings on the destination FAS8200?

- A. 2:1
- B. 4.28:1
- C. 1.5:1
- **D. 5.78:1**

Answer: D

NEW QUESTION # 176

Your customer wants their existing iSCSI datastore running on NetApp ONTAP AFF cluster Cluster01 to continue operating even through a complete site failure. They already have another ONTAP AFF cluster Cluster02 in a different data center on their company site. You successfully implemented a SnapMirror active sync relationship between the two clusters. The LUN is replicated and the relationship is healthy.

Which two steps must you take next? (Choose two.)

- **A. Change the service policy on the SAN LIFs.**
- B. Map the LUNs on the primary site.
- **C. Map the LUNs on the secondary site.**
- D. Rescan the disk on the application host.

Answer: A,C

Explanation:

After setting up a SnapMirror active sync relationship, to ensure automatic failover in case of site failure, you must:

* Map the LUNs on the secondary site, so they are accessible during a failover.

* Change the service policy on the SAN LIFs to enable multipathing and ALUA support, ensuring paths are correctly managed between primary and secondary sites.

NEW QUESTION # 177

You want to use SnapCenter to restore an MS SQL database on iSCSI LUNs from a previous application-consistent snapshot. In this scenario, what is required to accomplish this task?

- A. Confirm that the database server is not running on the host.
- **B. Confirm that the database server is running on the host.**
- C. Confirm that the iSCSI service is disabled on the host.
- D. Confirm multipathing for iSCSI is enabled on the host.

Answer: B

NEW QUESTION # 178

.....

PrepAwayPDF ensure that the first time you take the exam will be able to pass the exam to obtain the exam certification. Because PrepAwayPDF can provide to you the highest quality analog Network Appliance NS0-528 Exam will take you into the exam step by step. PrepAwayPDF guarantee that Network Appliance NS0-528 exam questions and answers can help you to pass the exam successfully.
