156-587 Certificate Exam | Exam 156-587 Vce Format

Once you pass the exam and obtain the 156-587 certificate, your life will take place great changes. On one hand, your job career will become more promising. All tasks will be finished excellently and efficiently because you have learned many useful skills from our 156-587 training guide. On the other hand, you will get more opportunities to be employed by the big company and get a brighter future with the 156-587 certification.

CheckPoint Check Point Certified Troubleshooting Expert - R81.20 Sample Questions (Q51-Q56):

NEW QUESTION # 51

What is the most efficient way to read an IKEv2 Debug?

- A. vi on the cti
- B. notepad++
- C. any xml editor
- **D. IKEview**

Answer: D

NEW QUESTION # 52

What is NOT a benefit of the 'fw ctl zdebug' command?

- **A. Cannot be used to debug additional modules**
- B. Clean the buffer
- C. Collect debug messages from the kernel
- D. Automatically allocate a 1MB buffer

Answer: A

NEW QUESTION # 53

The management configuration stored in the Postgres database is partitioned into several relational database domains. What is the purpose of the Global Domain?

- A. This domain is used as the global database to back up the objects referencing the corresponding object attributes from the System Domain.
- B. Global Domains is used by the IPS software blade to map the IDs to the corresponding countries according to the IpToCountry.csv file.
- C. This domain is used as the global database to track the changes made by multiple administrators on the same objects prior to publishing.
- **D. This domain is used as the global database for MDSM and contains global objects and policies.**

Answer: D

Explanation:

The Global Domain is one of the relational database domains in the Postgres database that stores the management configuration. The purpose of the Global Domain is to serve as the global database for Multi-Domain Security Management (MDSM) and contain the global objects and policies that are shared across all domains. The Global Domain also stores the global settings, such as the administrator roles, the LDAP servers, the IPS profiles, and the SmartEvent views. The Global Domain can be managed by the Global Domain Administrator or the Super User Administrator using the SmartConsole. The Global Domain can be backed up and restored using the mds_backup and mds_restore commands.
