Oracle Fusion Cloud Procurement 2023 Implementation Professional - Delta Sample Questions (Q36-Q41):

NEW QUESTION # 36

Which of the following security features is available in the Supplier Portal in Oracle Fusion Cloud Procurement?

- A. Role-based access control.
- B. Data encryption.
- C. Two-factor authentication.
- D. All of the above.

Answer: D

Explanation:

The Supplier Portal in Oracle Fusion Cloud Procurement provides various security features to ensure the confidentiality, integrity, and availability of data. It includes role-based access control, which allows administrators to assign specific roles and permissions to users based on their responsibilities. Two-factor authentication adds an extra layer of security by requiring users to provide a second form of authentication, such as a temporary code sent to their mobile device. Additionally, data encryption is utilised to protect

sensitive information from unauthorized access or interception.

NEW QUESTION # 37

During a Oracle Procurement Cloud implementation, you are going to implement Purchasing and Self Services Procurement. Identify the configuration step that will ensure that the tasks related to the other Procurement Cloud products like Supplier Portal Cloud are not available in Functional Setup Manager (FSM) during configuration.

- A. Enable all modules during Configure Offerings and disable the tasks related to unrelated modules in FSM. Provisioning Offerings The Provisioned column on the Configure Offerings page shows whether or not an offering is provisioned. While you are not prevented from configuring offerings that have not been provisioned, ultimately the users are not able to perform the tasks needed to enter setup data for those offerings until appropriate enterprise applications (Java EE applications) are provisioned and their location (end point URLs) is registered. - B. Enable tasks related to Supplier Model during Configure Offering
- C. Enable only ,Purchasing, and ,Self Service Procurement, during Configure Offering.
- D. Enable ,Procurement, pillar and do not assign the tasks to the implementation consultant in FSM.

Answer: C

NEW QUESTION # 38

In Oracle Fusion Cloud Procurement, what is the purpose of the self-service procurement feature?

- A. To provide employees with access to training and development resources.
- B. To enable employees to submit their expenses for reimbursement.
- C. To facilitate procurement activities by allowing employees to create and manage their own requisitions.
- D. To allow employees to manage their personal information.

Answer: C

Explanation:

The self-service procurement feature in Oracle Fusion Cloud Procurement enables employees to create and manage their own requisitions for goods or services they require. It empowers employees to have control over their procurement needs and reduces the dependency on the procurement department for every request. This feature streamlines the requisitioning process and improves efficiency by ensuring that employees can directly initiate and manage their procurement requests.

NEW QUESTION # 39

While configuring offerings, you had deselected the "Supply Chain Financial Orchestration of Procurement Flows" check box and had locked the feature. However, because of changes in the business requirements, you are required to enable the feature. Identify the prerequisite step to perform this change.

- A. Set the implementation status to „In Progress,, of the Procurement Offering.
- B. Navigate to the „Select Feature Choices,, page of the Procurement Offering and unlock the feature.
- C. Deselect the „Enable for Implementation,, check box of the Procurement Offering.
- D. Change the Provisioned to „No,, of the Procurement Offering

Answer: B

NEW QUESTION # 40

What are the benefits of effectively managing Qualifications in Oracle Fusion Cloud Procurement?

- A. Enhanced financial performance and cost savings.
- B. Increased purchasing efficiency and process automation.
- C. Improved supplier selection and reduced risk.
- D. Streamlined contract management and compliance.

Answer: C

Explanation:

Effectively managing Qualifications in Oracle Fusion Cloud Procurement provides the benefits of improved supplier selection and reduced risk. By evaluating and managing supplier qualifications, organizations can ensure that they are working with reliable and competent suppliers, reducing the risk of poor performance or non-compliance. This leads to more successful procurement outcomes.
