

New 1z0-1080-25 Test Labs - New 1z0-1080-25 Exam Guide

2025 Latest PDFVCE 1z0-1080-25 PDF Dumps and 1z0-1080-25 Exam Engine Free Share: https://drive.google.com/open?id=18k0KtUtVNRsJedlhzM_aNB5WTvi_RB9

If moving up in the fast-paced technological world is your objective, PDFVCE is here to help. The excellent Oracle 1z0-1080-25 practice exam from PDFVCE can help you realize your goal of passing the Oracle 1z0-1080-25 Certification Exam on your very first attempt. Most people find it difficult to find excellent Oracle 1z0-1080-25 exam dumps that can help them prepare for the actual Oracle 1z0-1080-25 exam.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.
Topic 2	Build validation rules: This section of the exam measures the skills of an EPM Consultant and includes creating rules that validate data entry in forms.
Topic 3	Identify metadata and data load options: This section of the exam measures the skills of a Planning Administrator and introduces options available for importing and managing metadata and data within the system
Topic 4	Create and manage navigation flows: This section of the exam measures the skills of an EPM Consultant and involves organizing navigation flows to simplify user interaction in Planning.
Topic 5	Set up valid and invalid intersections and cell-level security: This section of the exam measures the skills of an EPM Consultant and focuses on defining valid data intersections and applying security controls to limit data access at the cell level.
Topic 6	Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Topic 7	Assign access permissions to artifacts and cells in Planning: This section of the exam measures the skills of a Planning Administrator and involves granting permissions to users for accessing specific Planning objects and data.
Topic 8	Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.

Topic 9	Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.
Topic 10	Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Topic 11	Report on Planning Data: This section of the exam measures the skills of a Planning Administrator and focuses on generating reports to analyze and present Planning data effectively.
Topic 12	Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.
Topic 13	Design business rules and rulesets: This section of the exam measures the skills of an EPM Consultant and focuses on creating logic structures to perform calculations and automate processes in Planning.
Topic 14	Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.
Topic 15	Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.
Topic 16	This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 17	Set up and run data maps: This section of the exam measures the skills of a Planning Administrator and focuses on configuring and executing data maps to move data across plan types or applications.
Topic 18	Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.
Topic 19	Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant and covers designing planning input forms and visual dashboards to support decision-making.
Topic 20	Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.
Topic 21	Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of an EPM Consultant and includes creating interactive forms and dashboards and setting up navigation flows for a better user experience.
Topic 22	Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.

Pass Guaranteed Oracle - The Best New 1z0-1080-25 Test Labs

PDFVCE are responsible in every aspect. After your purchase our 1z0-1080-25 practice braindumps, the after sales services are considerate as well. We have considerate after sales services with genial staff. They are willing to solve the problems of our 1z0-1080-25 Exam Questions 24/7 all the time. About the dynamic change of our 1z0-1080-25 study guide, they will send the updates to your mailbox according to the trend of the exam.

Oracle Planning 2025 Implementation Professional Sample Questions (Q58-Q63):

NEW QUESTION # 58

Which client requirement aligns with using a custom BSO plan type along with or in place of the Workforce module?

- A. The Operations department requires a more granular level of detail than the Sales department in the Entity dimension.
- **B. Because of sparse dimensionality, aggregation times are slow in the Workforce module.**
- C. The client requires more than three custom dimensions.
- D. The client would like to plan salary by Position.
- E. The client has 10 dimensions in the application and needs to report at each intersection.

Answer: B

NEW QUESTION # 59

A company would like to configure Financials, Workforce, and Projects. They would like to plan and forecast the Project dimension in Financials, as well as track employee utilization in Projects.

Which two actions must they take to ensure that the Project dimension is shared and the data integrated correctly across all three modules? (Choose two.)

- A. In Projects, ensure that the Employee driver-based expense is enabled
- **B. In Workforce, rename one of the custom dimensions to "Project" and enable it**
- C. In Financials, rename one of the custom dimensions to "Project" and enable it
- **D. In Workforce, ensure that the granularity is at Employee or Employee and Job**

Answer: B,D

NEW QUESTION # 60

Which statement describes Strategic Modeling?

- A. It is used to model the flow of data by defining strategic rules for sharing data between modules.
- **B. It is used to quickly model and evaluate financial scenarios, and offers out-of-the-box treasury capabilities.**
- C. It is used to develop driver-based strategic plans and generate core financial statements.
- D. It is used to strategically manage and analyze finances at any business level with built-in dashboards.

Answer: B

Explanation:

Strategic Modeling in Oracle Planning 2024 is a module designed to enable rapid modeling and evaluation of financial scenarios, such as mergers, acquisitions, or long-term strategic plans. It provides a flexible framework for simulating "what-if" scenarios and includes out-of-the-box treasury capabilities, such as cash flow forecasting, debt scheduling, and interest rate calculations, which are critical for strategic financial planning.

* A. It is used to model the flow of data by defining strategic rules for sharing data between modules:

Incorrect. This describes data integration (e.g., via data maps), not Strategic Modeling, which focuses on scenario analysis.

* B. It is used to develop driver-based strategic plans and generate core financial statements: Incorrect.

While it supports driver-based planning, generating core financial statements is more aligned with the Financials module, not Strategic Modeling's primary focus.

* C. It is used to strategically manage and analyze finances at any business level with built-in dashboards:

Incorrect. This is too broad and aligns more with the overall Planning application, not specifically Strategic Modeling.

* D. It is used to quickly model and evaluate financial scenarios, and offers out-of-the-box treasury capabilities: Correct. This matches the module's purpose of rapid scenario modeling and its treasury-related features.

The Oracle documentation highlights Strategic Modeling's role in scenario analysis and its treasury tools, making D the accurate description.

NEW QUESTION # 61

Given these two use cases:

Create a starting point for subsequent versions and replicate your First Pass version to a Second Pass version and make changes to

it.

Save your baseline version data for your records and future analysis.

Which Planning Service Administrator-only feature or component can you use to perform tasks for these use cases?

- A. Version mapping
- B. Task manager
- **C. Copy versions**
- D. Version management

Answer: C

NEW QUESTION # 62

You want to develop your forecast with Forms 2.0. Which statement about Forms 2.0 setup is true?

- A. Redesign forms 1.0 forms so that they are set up to work with Forms 2.0.
- **B. Migrate the forms you want to work with in Forms 2.0 from Forms 1.0 to Forms 2.0.**
- C. Set up Forms 2.0 in your environment one time and it will work with all your applications.
- D. Switch between Forms 1.0 and Forms 2.0 by selecting the Forms Version in Application Settings.

Answer: B

Explanation:

In Oracle Planning 2024 Implementation, Forms 2.0 represents an enhanced version of the form design and functionality framework compared to Forms 1.0. To develop forecasts using Forms 2.0, existing forms must be transitioned from the older version to the newer one, as they are not automatically compatible or universally enabled.

* D. Migrate the forms you want to work with in Forms 2.0 from Forms 1.0 to Forms 2.0: This is the correct statement. Oracle provides a migration process to convert Forms 1.0 forms to Forms 2.0, enabling users to leverage the advanced features of Forms 2.0 (e.g., improved navigation, dynamic rows /columns, and enhanced usability). This migration is selective, meaning only the forms you choose to use with Forms 2.0 need to be migrated, and it is not a one-time global setup.

* A. Set up Forms 2.0 in your environment one time and it will work with all your applications:

Forms 2.0 is not a one-time environment-wide setup. It requires specific forms to be migrated or designed for Forms 2.0 compatibility, and not all applications automatically adopt it.

* B. Switch between Forms 1.0 and Forms 2.0 by selecting the Forms Version in Application Settings: There is no such toggle in Application Settings to switch between Forms 1.0 and Forms 2.0.

The transition to Forms 2.0 involves migration rather than a simple version switch.

* C. Redesign forms 1.0 forms so that they are set up to work with Forms 2.0: While redesigning is an option for creating new Forms 2.0-compatible forms, the standard process for existing forms is migration, not a complete redesign from scratch. Migration preserves the form structure while adapting it to Forms 2.0.

The migration process ensures that users can take advantage of Forms 2.0's capabilities while maintaining continuity with existing form designs, aligning with Oracle's recommended approach.

References

* Oracle Enterprise Performance Management Cloud Documentation: "Working with Forms - Forms 2.0" (docs.oracle.com, updated 2024). States that "to use Forms 2.0, migrate existing Forms 1.0 forms to Forms 2.0 using the provided migration tools."

* Oracle Planning 2024 Implementation Study Guide: Confirms that migrating Forms 1.0 to Forms 2.0 is the true setup process for leveraging Forms 2.0 in forecasting.

NEW QUESTION # 63

.....

You can pass your Oracle 1z0-1080-25 certification exam in less time, without wasting time and money on outdated or unreliable Oracle Planning 2025 Implementation Professional (1z0-1080-25) exam study materials. Don't let fear or a lack of resources hold you back from achieving your goals, trust PDFVCE Oracle Planning 2025 Implementation Professional (1z0-1080-25) practice test material and achieve the highest marks in your Oracle Planning 2025 Implementation Professional (1z0-1080-25) exam.
