## 1Z0-1122-25 Valid Test Simulator - 1Z0-1122-25 Exam Certification

Our 1Z0-1122-25 questions answers study guide is the best option for you to pass exam easily. Our experts are busy in providing the most updated content that could ensure your 100% success in 1Z0-1122-25 actual test. The up-to-date Oracle exam dumps consist of latest practice questions answers and explanations. We are devoted to take appropriate steps in improving our products like 1Z0-1122-25 Pass Guide.

## Oracle Cloud Infrastructure 2025 AI Foundations Associate Sample Questions (Q21-Q26):

### NEW QUESTION # 21

How do Large Language Models (LLMs) handle the trade-off between model size, data quality, data size and performance?

- A. They focus on increasing the number of tokens while keeping the model size constant.
- B. They prioritize larger model sizes to achieve better performance.
- C. They disregard model size and prioritize high-quality data only.
- **D. They ensure that the model size, training time, and data size are balanced for optimal results.**

**Answer: D**

Explanation:

Large Language Models (LLMs) handle the trade-off between model size, data quality, data size, and performance by balancing these factors to achieve optimal results. Larger models typically provide better performance due to their increased capacity to learn from data; however, this comes with higher computational costs and longer training times. To manage this trade-off effectively, LLMs are designed to balance the size of the model with the quality and quantity of data used during training, and the amount of time dedicated to training. This balanced approach ensures that the models achieve high performance without unnecessary resource expenditure.

### NEW QUESTION # 22

How does AI enhance human efforts?

- A. By deleting data humans need to handle
- B. By completely replacing human workers in all tasks
- **C. By processing data at a speed and effectiveness far beyond human capability**
- D. By increasing the physical strength of humans

**Answer: C**

Explanation:

AI enhances human efforts by processing large volumes of data quickly and accurately, performing complex computations that would be time-consuming or impossible for humans to handle manually. This allows humans to focus on more strategic, creative, and decision-making tasks, leveraging AI's ability to provide insights, automate repetitive processes, and support decision-making. AI does not physically enhance human capabilities, nor does it replace human workers in all tasks. Instead, it serves as an augmentation tool, amplifying human productivity and capabilities.

### NEW QUESTION # 23

You are part of the medical transcription team and need to automate transcription tasks. Which OCI AI service are you most likely to use?

- A. Language
- **B. Speech**
- C. Document Understanding
- D. Vision

**Answer: B**

Explanation:

For automating transcription tasks in a medical transcription team, the most appropriate OCI AI service to use would be the "Speech" service. This service is designed to convert spoken language into text, which is essential for transcribing spoken medical reports or consultations into written form. The OCI Speech service provides capabilities such as speech-to-text conversion, which is specifically tailored for handling audio input and producing accurate transcriptions.

### NEW QUESTION # 24

Which statement describes the Optical Character Recognition (OCR) feature of Oracle Cloud Infrastructure Document Understanding?

- **A. It recognizes and extracts text from a document.**
- B. It provides real-time translation of text.

- C. It enhances the visual quality of documents.
- D. It converts audio files into text.

**Answer: A**

Explanation:

The Optical Character Recognition (OCR) feature of Oracle Cloud Infrastructure (OCI) Document Understanding recognizes and extracts text from documents. This capability is fundamental for converting printed or handwritten text into a machine-readable format, allowing for further processing, such as text analysis, search, and archiving. OCI's OCR is an essential tool in automating document processing workflows, enabling businesses to digitize and manage their documents efficiently.

#### **NEW QUESTION # 25**

You are working on a multilingual public announcement system. Which AI task will you use to implement it?

- **A. Text to speech**
- B. Text summarization
- C. Audio recording
- D. Speech recognition

**Answer: A**

Explanation:

For a multilingual public announcement system, the AI task that would be most relevant is "Text to Speech" (TTS). This task involves converting written text into spoken words, which can then be broadcasted over public address systems in multiple languages.

Text to Speech technology is crucial for creating accessible and understandable announcements in different languages, especially in environments like airports, train stations, or public events where clear verbal communication is essential. The TTS system would be configured to support multiple languages, allowing it to deliver announcements to diverse audiences effectively.

#### **NEW QUESTION # 26**

.....

You may doubt about such an amazing data of our pass rate on our 1Z0-1122-25 learning prep, which is unimaginable in this industry. But our 1Z0-1122-25 exam questions have made it. You can imagine how much efforts we put into and how much we attach importance to the performance of our 1Z0-1122-25 Study Guide. We use the 99% pass rate to prove that our 1Z0-1122-25 practice materials have the power to help you go through the exam and achieve your dream.
