New 1Z0-1163-1 Test Objectives - New 1Z0-1163-1 Exam Camp

P.S. Free & New 1Z0-1163-1 dumps are available on Google Drive shared by BraindumpsPass: https://drive.google.com/open?id=1eWCiFI4COMn6r0ePF5GcTDPXOOP0iSaE

In the era of rapid development in the IT industry, we have to look at those IT people with new eyes. They use their high-end technology to create many convenient place for us. And save a lot of manpower and material resources for the state and enterprises. And even reached unimaginable effect. Of course, their income must be very high. Do you want to be the kind of person? Do you envy them? Or you are also IT person, but you do not get this kind of success. Do not worry, BraindumpsPass's Oracle 1Z0-1163-1 Exam Material can help you to get what you want. To select BraindumpsPass is equivalent to choose a success.

You can use this format of Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) actual questions on your smart devices. In addition to the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) PDF dumps, we also offer Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) practice exam software. You will find the same ambiance and atmosphere when you attempt the real Oracle 1Z0-1163-1 exam.

New Oracle 1Z0-1163-1 Exam Camp | 1Z0-1163-1 Online Exam

Pass rate is 98.65% for 1Z0-1163-1 exam cram, and we can help you pass the exam just one time. 1Z0-1163-1 training materials cover most of knowledge points for the exam, and you can have a good command of these knowledge points through practicing, and you can also improve your professional ability in the process of learning. In addition, 1Z0-1163-1 Exam Dumps have free demo for you to have a try, so that you can know what the complete version is like. We offer you free update for one year, and the update version will be sent to your mail automatically.

Oracle 1Z0-1163-1 Exam Syllabus Topics:

Topic	Details
Topic 1	• Oracle Cloud Applications and Oracle Modern Best Practice (OMBP): This section of the exam measures the skills of Cloud Application Consultants in understanding Oracle Cloud Applications and their capabilities. It covers the key offerings within the Oracle Cloud ecosystem and highlights the features of the Oracle SCM suite. Candidates will learn about data flow between the SCM OMBPs and how these processes optimize supply chain management.
Topic 2	• OMBPs for Procurement: This section tests the abilities of Procurement Specialists in managing procurement operations within Oracle Cloud Applications. It covers the flow of procurement processes, integration points with other SCM modules, and best practices for improving procurement efficiency. Candidates will gain insights into the key metrics used to evaluate procurement performance and cost-effectiveness.
Topic 3	• OMBPs for Manufacturing: This section measures the skills of Manufacturing Operations Managers in utilizing Oracle Cloud's manufacturing capabilities. It explains the flow of manufacturing processes, module integration, and best practices that enhance operational efficiency. Candidates will analyze metrics that assess productivity, cost control, and overall manufacturing performance.
Topic 4	• OMBPs for Logistics: This section tests the expertise of Logistics Coordinators in optimizing logistics and transportation management within Oracle Cloud Applications. It covers the process flows, best practices for logistics operations, and integration of different logistics modules. Candidates will understand performance metrics that impact supply chain visibility, efficiency, and customer satisfaction.
Topic 5	• Oracle Cloud Success Navigator & Oracle Cloud Quality Standards: This section evaluates the skills of Cloud Implementation Managers in leveraging Oracle Cloud Success Navigator and Quality Standards for cloud adoption. It explains how best practices are embedded into Oracle Cloud Applications and applied using Starter Configuration. Candidates will understand how to optimize cloud performance and ensure successful deployments following Oracle's quality guidelines.
Topic 6	• OMBPs for Sustainability: This section assesses the knowledge of Sustainability Specialists in integrating environmental and social responsibility into supply chain and procurement processes. It focuses on the benefits of aligning sustainability goals with business operations, ensuring compliance with global regulations, and implementing eco-friendly best practices.
Topic 7	• OMBPs for Supply Chain Planning: This section assesses the knowledge of Supply Chain Planners in managing planning modules within Oracle SCM. It explains process flows, integration points, and how different planning modules work together. Candidates will learn about best practices for designing efficient planning workflows and key metrics used to measure supply chain responsiveness and effectiveness.
Topic 8	• OMBPs for Order Management: This section evaluates the proficiency of Order Fulfillment Analysts in managing Oracle Cloud's order management modules. It covers the process flow and integration of different components to streamline order processing. Candidates will study key design considerations and metrics related to customer satisfaction, order fulfillment efficiency, and accuracy in managing customer demand.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q22-Q27):

NEW QUESTION # 22

How can Oracle Fusion Applications ensure that supply planning recommendations reflect the latest supplier information?

- A. Implementing manual verification of supplier information before updating supply plans.
- B. Using separate forecasting models for procurement and supply chain planning.
- C. By enabling real-time supplier collaboration to update supply planning with lead times and inventory availability.
- D. Increasing reorder points in inventory management.

Answer: C

Explanation:
Oracle Fusion Cloud SCM ensures supply planning recommendations are up-to-date by enabling real-time supplier collaboration through tools like the Supplier Portal and Supply Chain Collaboration features. This integration allows suppliers to provide current data on lead times and inventory availability, which is directly reflected in supply plans. Option A (manual verification) contradicts Oracle's automation-driven approach. Option B (increasing reorder points) is a reactive measure, not a solution for real-time updates. Option D (separate forecasting models) undermines the unified planning framework of Oracle Fusion. Real-time collaboration enhances planning accuracy and responsiveness.

NEW QUESTION # 23
What is a key advantage of the Production Order to Cost Update OMBP in Oracle Fusion Cloud SCM?

- A. It enhances customer relationship management, leading to effective cost analysis.
- B. It provides accurate cost calculations, leading to better decision-making and improved profitability.
- C. It provides real-time cost updates, ensuring immediate financial benefits.
- D. It automates the production process, requiring minimal human supervision.

Answer: B

Explanation:
The Production Order to Cost Update process within Oracle Manufacturing Business Process (OMBP) in Oracle Fusion Cloud SCM ensures accurate cost calculations by capturing and updating costs associated with production orders, such as materials, labor, and overhead. This accuracy supports better decision-making and improves profitability by enabling precise cost analysis and pricing strategies. Option A is irrelevant as it ties to CRM, not cost updates. Option B exaggerates automation-human oversight remains necessary. Option D focuses on real-time updates, which is secondary to the primary benefit of accuracy emphasized in Oracle documentation.

NEW QUESTION # 24
What is the primary purpose of the Supply Chain Orchestration process in Oracle Fusion Cloud SCM?

- A. It provides a manual approach to tracking supply chain transactions.
- B. It only manages warehouse operations without linking to procurement or manufacturing.
- C. It eliminates the need for supplier collaboration.
- D. It automates the execution of supply chain tasks across different applications.

Answer: D

Explanation:
The Supply Chain Orchestration process (C) in Oracle Fusion Cloud SCM automates the execution of supply chain tasks across applications like procurement, manufacturing, and inventory management. It coordinates activities-e.g., triggering a PO when inventory is low or scheduling production after an order-ensuring seamless integration. Option A is false-supplier collaboration is often required. Option B is incorrect-it links all supply chain areas, not just warehouses. Option D is wrong-automation replaces manual tracking. For example, if a customer order requires 200 units, Orchestration aligns procurement and production automatically, reducing delays and errors, and enhancing end-to-end visibility.

NEW QUESTION # 25
Which process in Oracle Fusion Cloud SCM ensures real-time communication between suppliers and buyers?

- A. Cost Accounting.
- B. Supplier Qualification.

- C. Supply Chain Collaboration.
- D. Manufacturing Execution.

Answer: C

Explanation:
Supply Chain Collaboration (B) in Oracle Fusion Cloud SCM is designed to facilitate real-time communication between suppliers and buyers through tools like the Supplier Portal and collaboration workspaces. This process enables sharing of critical information-such as order statuses, inventory levels, and delivery schedules-instantly, fostering transparency and responsiveness. For example, a buyer can notify a supplier of an urgent order change, and the supplier can confirm availability within minutes, reducing delays. Option A (Supplier Qualification) focuses on evaluating supplier eligibility, not ongoing communication. Option C (Cost Accounting) tracks financial data, unrelated to supplier-buyer interaction. Option D (Manufacturing Execution) manages shop floor activities, not external collaboration. Supply Chain Collaboration ensures a synchronized supply chain, mitigating risks like stockouts or misaligned expectations by keeping all parties informed in real time.

NEW QUESTION # 26
Which feature in Oracle Fusion Cloud SCM ensures optimal inventory levels by tracking stock movement?

- A. Cost Accounting.
- B. Supplier Qualification.
- C. Manufacturing Execution.
- D. Inventory Management.

Answer: D

Explanation:
Inventory Management (D) in Oracle Fusion Cloud SCM ensures optimal inventory levels by tracking stock movement-receipts, transfers, and consumption-and maintaining availability data across warehouses. For example, if stock drops below a reorder point (e.g., 100 units), it triggers replenishment to avoid stockouts while preventing overstocking (e.g., holding 1,000 units when demand is 200). Option A (Supplier Qualification) evaluates suppliers, not inventory levels. Option B (Manufacturing Execution) tracks production, not overall stock. Option C (Cost Accounting) analyzes costs, not physical stock movement. Inventory Management balances service levels with cost efficiency, using real-time data to adjust stock dynamically, critical for operational success and customer satisfaction.

NEW QUESTION # 27
.....

The third and last format is the 1Z0-1163-1 desktop practice exam software form that can be used without an active internet connection. This software works offline on the Windows operating system. The practice exams benefit your preparation because you can attempt them multiple times to improve yourself for the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Professional-Cloud-Developercertification test. Our 1Z0-1163-1 Exam Dumps are customizable, so you can set the time and questions according to your needs.
