

New 1Z0-771 Test Labs, Exam 1Z0-771 Materials

DOWNLOAD the newest PracticeDump 1Z0-771 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1qiSR81USneJCeEBK_dnSqyHExwvXG-U9

If you are still afraid of trying our 1Z0-771 exam quiz, you will never have a chance to grow. Opportunities are always for those who prepare themselves well. The only way to harvest wealth is challenging all the time. Our 1Z0-771 practice materials are waiting for you. Cheer up for yourself. There is nothing that you will lose for our demos of the 1Z0-771 study materials are totally free to download.

Oracle 1Z0-771 Exam Syllabus Topics:

Topic	Details
Topic 1	Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.
Topic 2	Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.
Topic 3	Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.
Topic 4	Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.

Topic 5	• Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.
Topic 6	• Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.
Topic 7	• Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.
Topic 8	• Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.
Topic 9	• Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.
Topic 10	• Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.
Topic 11	• Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.
Topic 12	• Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.
Topic 13	• Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.
Topic 14	• Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.
Topic 15	• Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.

Exam 1Z0-771 Materials & Training 1Z0-771 For Exam

As we all know it is not easy to obtain the 1Z0-771 certification, and especially for those who cannot make full use of their sporadic time. But you are lucky, we can provide you with well-rounded services on 1Z0-771 practice braindumps to help you improve ability. You would be very pleased and thankful if you can spare your time to have a look about features of our 1Z0-771 Study Materials. With the pass rate high as 98% to 100%, you can totally rely on our 1Z0-771 exam questions.

Oracle APEX Cloud Developer Professional Sample Questions (Q26-Q31):

NEW QUESTION # 26

You need to ensure that "How may I help you today?" is the first message displayed by the AI assistant. Which attribute of the Show AI Assistant Dynamic Action should be configured in the Property Editor to achieve this?

- A. AI Assistant Name
- B. Initial Prompt
- C. Welcome Message

Answer: C

Explanation:

The Show AI Assistant Dynamic Action in Oracle APEX triggers the display of the AI Assistant interface. To customize the first message users see:

Welcome Message: This attribute in the Property Editor defines the initial text displayed when the AI Assistant appears. Setting it to "How may I help you today?" ensures this exact phrase greets users, enhancing user experience by setting a friendly tone. It's a static, developer-defined string, distinct from AI-generated responses.

Initial Prompt: This attribute defines the starting input or context sent to the AI model, not the visible message shown to users. It's typically hidden and used to guide the AI's behavior (e.g., "Act as a support agent").

AI Assistant Name: This sets the assistant's identity (e.g., "Alex"), displayed in the UI, but it's not the greeting message.

This configuration is critical for branding or guiding user interaction from the outset, and it's adjustable per dynamic action instance, offering flexibility across pages.

NEW QUESTION # 27

Which two statements are true about creating and using dynamic actions?

- A. You can execute JavaScript code by creating a dynamic action.
- B. After you create a dynamic action, you cannot add more true actions.
- C. If no client-side condition is defined, true actions will not fire.
- D. If a client-side condition is defined, the true action will fire when the condition is met.

Answer: A,D

Explanation:

Dynamic Actions in APEX enable responsive behavior:

If a client-side condition is defined, the true action will fire when the condition is met: A condition (e.g., `this.browserEvent === 'click'`) ensures the true action (e.g., Show, Hide) executes only when true, enhancing precision in event handling.

You can execute JavaScript code by creating a dynamic action: The "Execute JavaScript Code" action type allows custom scripts (e.g., `alert('Clicked!');`), extending functionality beyond declarative options.

Cannot add more true actions: False; multiple true actions can be added post-creation.

No condition, true actions won't fire: False; without a condition, true actions fire unconditionally on the event.

Dynamic Actions are a cornerstone of interactive UIs in APEX.

NEW QUESTION # 28

What do you achieve by performing the "Refresh Working Copy" task?

- A. Get the latest updates from the Main application.
- B. Merge the Working Copy changes with the Main application.
- C. Update the changes from one Working Copy to another.

Answer: A

Explanation:

Working Copies in APEX allow safe experimentation:

C . Get the latest updates from the Main application: "Refresh Working Copy" (in App Builder > Working Copies) pulls changes from the Main application into the Working Copy, ensuring it reflects the latest state (e.g., new pages, fixes) without overwriting Working Copy changes.

A . Merge with Main: Merging is a separate "Merge Working Copy" task.

B . Update between Working Copies: Not supported; refreshing is Main-to-Working only.

Practical note: Use this to sync collaborative development efforts.

NEW QUESTION # 29

What are two reasons to enable the "Used by App Builder" option while creating a Generative AI Server?

- A. To author SQL powered by Generative AI
- B. To build applications using natural language powered by Generative AI
- C. To create a Working Copy of your application
- D. To create a REST-enabled database object

Answer: A,B

Explanation:

Enabling "Used by App Builder" for a Generative AI Server allows:

Author SQL powered by Generative AI: Integrates AI-driven SQL generation in App Builder.

Build applications using natural language: Enables natural language prompts to create app components.

Options A and B are unrelated to this setting, as it's specific to AI integration in App Builder.

NEW QUESTION # 30

Which two SQL format options does the APEX Assistant provide when using the "Create Data Model using AI" feature?

- A. MySQL
- B. Oracle SQL
- C. Quick SQL
- D. Oracle PL/SQL

Answer: B,C

Explanation:

The "Create Data Model using AI" feature in APEX Assistant leverages AI to generate data models based on natural language input.

The supported SQL format options are:

Quick SQL: A shorthand syntax for defining database objects, which APEX can convert into full DDL.

Oracle SQL: Standard SQL syntax compatible with Oracle Database for creating tables and other objects.

MySQL is not supported as it's specific to a different database system, and Oracle PL/SQL is a procedural language, not a format for defining data models in this context.

NEW QUESTION # 31

.....

Our company is trying to satisfy every customer's demand. Of course, we also attach great importance on the quality of our 1Z0-771 real test. Every product will undergo a strict inspection process. In addition, there will have random check among different kinds of 1Z0-771 Study Materials. The quality of our 1Z0-771 exam quiz deserves your trust. Most of our customers are willing to introduce their friends to purchase our 1Z0-771 learning dumps.
