

New 2V0-16.25 Test Pass4sure - Reliable 2V0-16.25 Mock Test

You can easily install VMware 2V0-16.25 exam questions file on your desktop computer, laptop, tabs, and smartphone devices and start VMware vSphere Foundation 9.0 Administrator (2V0-16.25) exam dumps preparation without wasting further time. Whereas the other two VMware 2V0-16.25 Practice Test software is concerned, both are the mock VMware vSphere Foundation 9.0 Administrator (2V0-16.25) exam that will give you a real-time 2V0-16.25 practice exam environment for preparation.

VMware 2V0-16.25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Troubleshoot and Optimize the VMware Solution: This section of the exam measures the ability of Systems Engineers to troubleshoot and optimize VMware-based environments. While no explicit testable objectives are listed, candidates are expected to apply their problem-solving skills to diagnose, resolve, and enhance VMware solutions for improved reliability and performance.
Topic 2	• VMware vSphere Foundation Fundamentals: This section of the exam measures the skills of Virtualization Engineers and focuses on the essentials of virtualization technology. It introduces the principles of virtualization, explores use cases, and highlights the value it brings to businesses. Candidates are expected to demonstrate knowledge of VMware compute components such as vCenter and ESX, cluster configuration, and lifecycle management of virtual machines. It also covers secure workload operations, encryption, and managing resources with content libraries. In addition, storage fundamentals are examined through configuring vSphere storage, deploying VMware vSAN clusters, defining storage policies, and ensuring data availability. Networking fundamentals are also introduced, requiring the ability to differentiate between VMware vSphere networking components.
Topic 3	• Plan and Design the VMware by Broadcom Solution: This section of the exam measures the ability of VMware Solution Architects to plan and design solutions. While there are no specific testable objectives included, the focus is on preparing professionals to design VMware-based solutions that align with organizational goals and best practices.
Topic 4	• IT Architectures, Technologies, Standards: This section of the exam measures the understanding of IT Infrastructure Architects and covers foundational concepts of architectures, emerging technologies, and industry standards. Although no testable objectives are listed here, it establishes the baseline knowledge needed to interpret and design VMware-related environments effectively.

Topic 5	• Deploy, Configure, and Operate VMware vSphere Foundation (VVF): This section of the exam measures the expertise of Data Center Administrators and emphasizes hands-on skills in deploying and configuring VMware vSphere Foundation environments. Candidates must understand the components of a VVF deployment, configure Supervisors within clusters, and manage identity, access control, licensing, and certificate management. The objectives also extend to lifecycle management within the vSphere Foundation. Furthermore, it explores operational tasks including monitoring and analyzing logs, configuring alerting, managing dashboards, and integrating with VMware Cloud Foundation (VCF) Operations. Candidates will also be tested on cost and pricing configuration, compliance monitoring, and security hardening practices. Finally, automation skills are validated through deploying services with Supervisors, running Kubernetes workloads, using VM services, and integrating VCF Operations Orchestrator to support enterprise automation.

2025 New 2V0-16.25 Test Pass4sure | Reliable Reliable 2V0-16.25 Mock Test: VMware vSphere Foundation 9.0 Administrator 100% Pass

With the rapid market development, there are more and more companies and websites to sell 2V0-16.25 guide torrent for learners to help them prepare for exam. If you have known before, it is not hard to find that the study materials of our company are very popular with candidates, no matter students or businessman. Welcome your purchase for our 2V0-16.25 Exam Torrent. As is an old saying goes: Client is god! Service is first! 2V0-16.25 Guide Braindumps can simulate limited-timed examination and online error correcting, and have 24/7 Service Online, 2V0-16.25 Exam Torrent is the best and wisest choice for you to prepare your test.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q18-Q23):

NEW QUESTION # 18

An administrator is tasked to configure VMware Cloud Foundation (VCF) Operations alerts to notify only relevant stakeholders when alerts trigger.

Which configuration step will satisfy the requirement?

- A. Configure notification for only critical alerts.
- B. Configure notification to use generic contact information.
- C. Configure notification to write a file to an output folder.
- **D. Configure notification to specific alert recipients.**

Answer: D

Explanation:

In VCF Operations, alerts can be configured with notification settings. To ensure only relevant stakeholders receive alerts:

* You assign specific recipients to notifications.

* This avoids alert fatigue and ensures teams only see alerts they are responsible for.

Other options:

* A. Write to file# Not for stakeholder notifications.

* B. Only critical alerts# Reduces volume, but still not targeted to relevant recipients.

* D. Generic contact info# Sends to broad groups, not selective.

VMware Cloud Foundation 9.0 - Alerting and Notification Settings

VMware Docs: Configuring Notifications in vRealize Operations

NEW QUESTION # 19

Which component must be added after an initial deployment of VMware vSphere Foundation (VVF) to provide a central location for logs collection?

- A. VCF Operations
- B. Fleet Manager

- C. VCF Operations for Networks
- **D. VCF Operations for Logs**

Answer: D

Explanation:

After deploying vSphere Foundation, to centralize log collection and analysis, you must add:

* VCF Operations for Logs, which provides log ingestion, alerting, and centralized troubleshooting.

Other options:

- * B. VCF Operations# Focuses on performance/capacity, not log collection.
- * C. VCF Operations for Networks# Focuses on networking insights.
- * D. Fleet Manager# Used for multi-instance management, not logging.

NEW QUESTION # 20

What are two roles of VMware Tools within a virtual machine (VM)? (Choose two.)

- A. Manages the virtual machine hardware configuration.
- **B. Provides Guest OS heartbeat service.**
- **C. Provides device drivers for the VM.**
- D. Provides journaling of file system metadata changes for fast recovery.
- E. Stores the virtual machine configuration files.

Answer: B,C

Explanation:

VMware Tools is a suite of services and drivers installed in a VM. It provides:

* Guest OS heartbeat service (B): Used by vCenter to monitor VM health.

* Device drivers (C): Optimized drivers for network, storage, graphics, and mouse/keyboard integration.

Other options:

- * A. Journaling of file system metadata# Provided by the guest OS filesystem, not VMware Tools.
- * D. Stores VM configuration files# Handled by vCenter/ESXi, not VMware Tools.
- * E. Manages VM hardware configuration# Done via vSphere Client, not VMware Tools.

NEW QUESTION # 21

An administrator is tasked to optimize storage utilization in an existing VMware vSAN Original Storage Architecture (OSA) cluster.

The cluster has the following configuration:

- * Eight-node cluster with 1 disk group per node.
- * Virtual machines (VMs) are configured with 1 failure - RAID-1 storage policy.
- * Storage utilization is at 70%.

Which action can the administrator take to reduce the existing storage utilization with the minimum impact to the cluster?

- A. Enable Compression only on the cluster.
- B. Enable Deduplication and Compression on the cluster.
- **C. Change the storage policy to 2 failure - RAID-6.**
- D. Change the storage policy to 3 failure - RAID-1.

Answer: C

Explanation:

In vSAN Original Storage Architecture (OSA) cluster, the choice of storage policy directly impacts storage efficiency and resilience:

* Current Setup:

* Eight-node cluster, 1 disk group per node.

* VMs are using FTT=1 RAID-1 (mirroring) policy.

- * Storage utilization is already at 70%.
- * RAID-1 (Mirroring):
- * Each piece of data is mirrored, requiring 2x storage capacity.
- * Space efficiency ~50%.
- * RAID-6 (Erasure Coding, FTT=2):
- * Requires a minimum of 6 hosts, satisfied here with 8.
- * Uses erasure coding instead of full mirroring, giving ~67% space efficiency.
- * Provides resilience against 2 host failures while using less space than RAID-1.

Thus, switching from RAID-1 FTT=1 to RAID-6 FTT=2 reduces overall storage utilization while still improving resilience.

Why not the other options?

- * A. Enable Deduplication and Compression## In OSA, enabling this requires a cluster-wide disk group reformat, which is disruptive and not the minimal impact choice.
- * B. Change policy to 3 failure - RAID-1## Increases redundancy but consumes much more capacity, worsening utilization.
- * C. Enable Compression only## Not available in OSA (only in ESA). OSA supports deduplication + compression together, not compression-only.
- * D. Change to 2 failure - RAID-6## Meets resilience requirements, reduces storage usage, and is supported on 8-node OSA clusters.

NEW QUESTION # 22

A network failure of a host occurred in a VMware vSphere Foundation (VVF) vSphere cluster. None of the virtual machines (VMs) restarted on unaffected hosts and the VMs were unreachable until the problem was corrected.

vSphere HA and DRS are enabled, and all tests when powering off a host were successful.

What is the cause of this behavior?

- A. vSphere HA has not been enabled on the cluster.
- **B. Host Isolation Response is disabled in vSphere HA.**
- C. vSphere DRS has not been enabled on the cluster.
- D. The VMs have "should run on" host affinity rule applied.

Answer: B

Explanation:

In this scenario, a network failure occurred on a host, and VMs on that host did not restart on other hosts, even though HA and DRS were enabled.

* This indicates that vSphere HA detected an isolation event (the host lost network connectivity) but took no action, because the Host Isolation Response was disabled.

* Normally, with Host Isolation Response set to "Power Off and Restart VMs," HA restarts affected VMs on surviving hosts.

* Since powering off a host manually triggers a restart correctly, the failure here was specific to isolation behavior.

Other options:

- * B. Affinity rule "should run on"## Would still allow HA restart elsewhere if isolation occurred.
- * C. DRS not enabled## DRS only balances load; HA is responsible for restarts.
- * D. HA not enabled## Contradicts the scenario (HA was enabled).

NEW QUESTION # 23

.....

When some candidates trying to overcome an exam, they will all first think of choosing a good study material to prepare for their exam. The VMware vSphere Foundation 9.0 Administrator prep torrent has a variety of self-learning and self-assessment functions to test learning outcome, which will help you increase confidence to pass exam. Last but not least, our website platform has no viruses and you can download 2V0-16.25 Test Guide at ease. If you encounter difficulties in installation or use of 2V0-16.25 exam torrent, we will provide you with remote assistance from a dedicated expert to help you and provide 365 days of free updates that
