

New 2V0-17.25 Exam Pattern | Free 2V0-17.25 Exam Questions

BONUS!!! Download part of VCETorrent 2V0-17.25 dumps for free: https://drive.google.com/open?id=1SdWqbL698Jc7oTF28guT5_-R-MitLNew

Generally speaking, you can achieve your basic goal within a week with our 2V0-17.25 study guide. Besides, for new updates happened in this line, our experts continuously bring out new ideas in this 2V0-17.25 exam for you. The new supplemental updates will be sent to your mailbox if there is and be free. Because we promise to give free update of our 2V0-17.25 Learning Materials for one year to all our customers.

Our VMware VMware Cloud Foundation 9.0 Administrator web-based practice test software has all the specifications of the desktop VMware Cloud Foundation 9.0 Administrator practice exam software. This web-based VMware Cloud Foundation 9.0 Administrator (2V0-17.25) practice test software doesn't need any installation or plugins. You can attempt the VMware VMware Cloud Foundation 9.0 Administrator web-based practice test using Chrome, Firefox, Opera, Internet Explorer, or VMware Edge. Our browser-based VMware Cloud Foundation 9.0 Administrator (2V0-17.25) practice exam software is also compatible with Windows, Mac, Linux, Android, and iOS.

Free 2V0-17.25 Exam Questions - 2V0-17.25 Valid Test Guide

Our products are officially certified, and 2V0-17.25 exam materials are definitely the most authoritative product in the industry. In order to ensure the authority of our 2V0-17.25 practice prep, our company has really taken many measures. First of all, we have a

professional team of experts, each of whom has extensive experience. Secondly, before we write 2V0-17.25 Guide quiz, we collect a large amount of information and we will never miss any information points.

VMware 2V0-17.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment.
Topic 2	<ul style="list-style-type: none">Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation.
Topic 3	<ul style="list-style-type: none">Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments.
Topic 4	<ul style="list-style-type: none">IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q22-Q27):

NEW QUESTION # 22

Which VMware license edition typically provides the most comprehensive set of features, including DRS, HA, and vMotion?

- A. Essentials
- B. Foundation
- C. Standard
- D. Enterprise Plus

Answer: D

Explanation:

Enterprise Plus is the top-tier edition that generally includes advanced features such as Distributed Resource Scheduler (DRS), High Availability (HA), and vMotion, among others.

NEW QUESTION # 23

An organization is planning to manage a diverse set of databases across multiple VMware Cloud Foundation environments.

Which three capabilities of Data Services Manager would help in managing these databases efficiently?

(Choose three.)

- A. Centralized monitoring and alerting for all managed databases.

- B. Policy-based backup and recovery for databases.
- C. Automated database provisioning and deployment.
- D. Automated VM migration between on-premises and cloud environments.
- E. Integration with vSAN for optimized storage management

Answer: A,B,C

Explanation:

Centralized monitoring and alerting for all managed databases: Data Services Manager enables centralized monitoring and alerting for databases across multiple environments, providing visibility and proactive management.

Policy-based backup and recovery for databases: Data Services Manager allows for the implementation of backup and recovery policies to ensure the safety and availability of databases.

Automated database provisioning and deployment: With Data Services Manager, administrators can automate the deployment and provisioning of databases, streamlining the management process.

NEW QUESTION # 24

An administrator is tasked with migrating a set of virtual machines between data centers using HCX.

To minimize downtime and ensure data consistency, which two HCX migration options should be considered? (Choose two.)

- A. HCX Bulk Migration
- B. HCX Cold Migration
- C. HCX vMotion
- D. HCX Replication Assisted vMotion (RAV)
- E. HCX Network Extension

Answer: E

Explanation:

VM storage policies in a VMware vSphere environment are used to define and enforce specific storage requirements for virtual machines, such as performance (e.g., IOPS), availability (e.g., RAID levels), and redundancy. These policies ensure that VMs are placed on storage that meets their particular needs and that storage resources are utilized effectively.

NEW QUESTION # 25

An administrator must replace a component's certificate in VCF with an external CA-signed certificate. What format must be used when creating the certificate?

- A. P7B
- B. PFX
- C. DER
- D. PEM

Answer: D

Explanation:

The VCF 9.0 Security and Certificates Guide states: "VCF supports only certificates in PEM format when replacing system component certificates with those signed by an external Certificate Authority." PEM is the standard Base64 format with .crt and .key files. PFX (PKCS#12) is used for Windows stores but not supported in VCF automation. P7B is for certificate chains, while DER is binary encoding. Thus, the required format for certificates in VCF is PEM.

NEW QUESTION # 26

An administrator is troubleshooting a high CPU usage issue of the SDDC Manager VM. Access to SDDC Manager UI is exhibiting degraded performance.

What two steps should the administrator take to diagnose the issue? (Choose two.)

- A. Review the CPU usage of the ESXi management domain hosts to identify any that are overcommitted.
- B. Reboot the SDDC Manager VM to clear any temporary issues.
- C. Reconfigure the DRS settings to be more aggressive in load balancing.
- D. Upgrade the vSphere version to the latest release.

- E. Login to SDDC Manager using console with root credentials, run the top command to identify any services that may be consuming high %CPU.

Answer: A,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

When troubleshooting high CPU usage on the SDDC Manager VM, the recommended diagnostic steps are:

Login to SDDC Manager using console with root credentials, run the top command to identify any services that may be consuming high %CPU (B): The official documentation instructs administrators to use system monitoring commands such as top or htop within the SDDC Manager appliance to determine if specific processes or services are causing elevated CPU usage. This helps pinpoint the root cause inside the VM.

Review the CPU usage of the ESXi management domain hosts to identify any that are overcommitted (D): High CPU usage within the SDDC Manager VM could also result from overall CPU contention on the physical ESXi hosts. Checking host-level CPU usage can help determine if the underlying infrastructure is contributing to the performance issue. The documentation emphasizes reviewing host resource metrics to ensure the management cluster is not overcommitted.

Other options such as rebooting the VM, upgrading vSphere, or modifying DRS settings are not recommended as initial diagnostic steps according to official guidance. Rebooting or changing configurations without proper analysis may disrupt services or not address the root cause.

NEW QUESTION # 27

.....

As the famous saying goes, time is life. Time is so important to everyone because we have to use our limited time to do many things. Especially for candidates to take the 2V0-17.25 exam, time is very precious. They must grasp every minute and every second to prepare for it. From the point of view of all the candidates, our 2V0-17.25 training quiz give full consideration to this problem. And we can claim that if you study our 2V0-17.25 study materials for 20 to 30 hours, you can pass the exam for sure.
