# New 2V0-17.25 Test Sims, Latest 2V0-17.25 Real Test

At the beginning of the launch of our 2V0-17.25 exam torrent, they made a splash in the market. We have three versions which are the sources that bring prestige to our company. Our PDF version of VMware Cloud Foundation 9.0 Administrator prepare torrent is suitable for reading and printing requests. You can review and practice with it clearly just like using a processional book. It can satisfy the fundamental demands of candidates with concise layout and illegible outline. The second one of 2V0-17.25 Test Braindumps is software versions which are usable to windows system only with simulation test system for you to practice in daily life. The last one is app version of 2V0-17.25 exam torrent suitable for different kinds of electronic products.

VMware 2V0-17.25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments.
Topic 2	• Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation.

Topic 3	• IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies.
Topic 4	• VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment.

2026 VMware 2V0-17.25: Reliable New VMware Cloud Foundation 9.0 Administrator Test Sims

Our 2V0-17.25 test guide has become more and more popular in the world. Of course, if you decide to buy our 2V0-17.25 latest question, we can make sure that it will be very easy for you to pass your exam and get the certification in a short time, first, you just need 5-10 minutes can receive 2V0-17.25 Exam Torrent that you can learn and practice it. Then you just need 20-30 hours to practice our study materials that you can attend your exam. It is really spend your little time and energy.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q38-Q43):

NEW QUESTION # 38
An administrator must obtain an overview of all vSAN and non-vSAN datastores within a VCF environment using VCF Operations. Where should the administrator access this information?

- A. Storage Overview
- B. VCF Health
- C. Data Protection & Recovery
- D. Diagnostic Findings

Answer: A

Explanation:
The VCF Operations Dashboards Guide describes the Storage Overview dashboard:
"The Storage Overview dashboard provides visibility into capacity, performance, and health across vSAN and non-vSAN datastores. Administrators can track datastore utilization, latency, throughput, and availability from a single pane of glass." Diagnostic Findings (B) shows troubleshooting insights, not full storage details. Data Protection & Recovery (C) covers backup/replication information. VCF Health (D) focuses on SDDC Manager, vCenter, NSX, and host health, not datastore metrics.
Therefore, the required datastore overview is accessed through the Storage Overview dashboard in VCF Operations.

NEW QUESTION # 39
An administrator is tasked with enabling Workload Management (vSphere IaaS control plane) on a VMware Cloud Foundation workload domain.
Which three of the following are prerequisites for enabling Workload Management? (Choose three.)

- A. Install the vSphere Client on all ESXi hosts.
- B. Verify that all ESXi hosts are running vSphere 7.0 or later.
- C. Configure NTP and DNS settings for all management components.
- D. Ensure that the cluster has at least three ESXi hosts.

Answer: B,C,D

Explanation:
For Workload Management in VMware Cloud Foundation, a minimum of three ESXi hosts is required to create a robust, highly available vSphere cluster.
Proper NTP and DNS configuration is essential to ensure time synchronization and proper resolution of network names, which are critical for Workload Management.
The hosts must be running vSphere 7.0 or later to be compatible with the latest features and requirements for Workload Management.

NEW QUESTION # 40

An administrator successfully removed a host from a VMware vSphere cluster and decommissioned it in SDDC Manager.
What must be done before the host can be recommissioned and added back to the SDDC Manager inventory?

- A. Loq in to the host console and select "Reset System Configuration" from the ESXi DCUI.
- B. From the host console, use the /sbin/qenerate-certifcates command to qenerate a new self-siqned certificate.
- C. Manually uninstall the NSX VIBs on the host.
- D. Reinstall ESXi on the host.

Answer: A

Explanation:
Before the host can be recommissioned and added back to the SDDC Manager inventory, you must reset the system configuration.
This can be done from the ESXi Direct Console User Interface (DCUI) by selecting the "Reset System Configuration" option. This will remove any previous configuration and allow the host to be re-added to the environment.

NEW QUESTION # 41

An administrator has been tasked with creating a real-time view of key performance indicators for their VMware Cloud Foundation private cloud and an automated monthly report that shows the capacity consumed by each development team who use the environment.
Which VCF component should the administrator configure to complete their objectives?

- A. VMware Aria Operations for Logs
- B. VMware Aria Operations for Networks
- C. VMware Aria Operations for Applications
- D. VMware Aria Operations

Answer: D

Explanation:
VMware Aria Operations provides comprehensive monitoring, analytics, and performance management for the entire VMware Cloud Foundation environment. It enables real-time views of key performance indicators (KPIs) and can be configured to generate automated reports on capacity consumption, which aligns with the administrator's objectives.

NEW QUESTION # 42

A vSphere administrator wants to integrate array-based storage management features with VMware, such as snapshot offloading and QoS.
Which approaches facilitate this?

- A. In-guest iSCSI driver configuration
- B. Vendor-specific VIBs or plug-ins installed on ESXi
- C. Using Resource Pools for disk-based QoS
- D. vSphere Virtual Volumes (vVols) integration

Answer: B,D

Explanation:
vVols enable direct integration with storage arrays, and installing vendor-specific VIBs/plug-ins lets ESXi communicate advanced storage features. In-guest iSCSI (B) bypasses many vSphere-managed features. Resource Pools (D) manage CPU/memory, not storage QoS at the array level.

NEW QUESTION # 43

......

These VMware 2V0-17.25 exam questions have a high chance of coming in the actual VMware Cloud Foundation 9.0 Administrator 2V0-17.25 test. You have to memorize these VMware 2V0-17.25 questions and you will pass the VMware 2V0-17.25 test with brilliant results. The price of VMware 2V0-17.25 updated exam dumps is affordable. You can try the free demo version of any VMware Cloud Foundation 9.0 Administrator 2V0-17.25 exam dumps format before buying.
