The cost of the exam is \$200, and it can be taken either online or in-person at a testing center.

Salesforce Certified Advanced Administrator Sample Questions (Q89-Q94):

NEW QUESTION # 89

The security department at AW Computing wants to prevent users from exporting more data than they need. Included in this request is limiting records containing sensitive information, such as bank accounts and Personal Identifiable Information (PII).

Which feature should an administrator recommend to help limit what data is exported?

- **A. Export Data Settings**
- B. Salesforce Platform Encryption
- C. Muted Permission Sets
- D. Salesforce Shield

Answer: A

Explanation:

Explanation

Export Data Settings is a feature that allows you to control which users can export data from Salesforce and how much data they can export at a time. You can enable or disable the Export Reports permission for different profiles or permission sets, and set a maximum number of records that can be exported per hour for your org. You can also restrict the export of sensitive data by using field-level security or encryption.

https://help.salesforce.com/s/articleView?id=sf.admin_general_permissions.htm&type=5

NEW QUESTION # 90

Users at AW Computing are receiving a duplicate message when they enter contacts with common first and last names.

Management wants to improve the user experience but also keep the data Integrity of contacts.

What should an administrator implement for this issue?

- A. Change the duplicate rule to report Instead of alert so the message is avoided.
- B. Add a secondary matching rule to the duplicate rule to match on the associated customer.
- **C. Include the Email field to the existing matching rule for a more exact match.**
- D. Update the matching method on the rule from fuzzy to exact for First Name and Last Name.

Answer: C

Explanation:

A matching rule is a rule that defines how records are compared for duplication based on certain fields or fuzzy logic. By including more fields or changing the matching method, you can make the matching rule more or less strict and reduce false positives or negatives. In this case, including the email field to the existing matching rule for contacts can help avoid duplicate messages for common names by checking if the email addresses are also identical. References:

NEW QUESTION # 91

A user at Cloud Kicks has informed the administrator that they are unable to log in to Salesforce via multi-factor authentication. Which two areas should the administrator review to understand potential root causes?

Choose 2 answers

- A. Setup Audit Trail
- B. Debug Logs
- C. Login History
- D. Identity Verification History

Answer: C,D

Explanation:

Identity verification history and login history are two areas that the administrator can review to understand potential root causes of multi-factor authentication issues. Identity verification history shows the methods and results of identity verification attempts for a user, such as email verification, SMS verification, or app verification. Login history shows the status, source, and location of login attempts for a user, as well as any login errors or challenges that occurred. These two areas can help the administrator identify if the user entered the correct verification code, if the user's device or app is compatible with multi-factor authentication, or if there are any network or security issues that prevent successful verification. References:

NEW QUESTION # 92

When should an administrator apply a permission set to a user or group of users versus configuring the user's profile with the necessary access?

- A. When an organization's sharing model is too broad and they need to restrict access beyond what their sharing model and existing profiles provide.
- B. When a user is part of a team with an assigned profile that covers the majority of their needs but requires more access than the rest of their team.
- C. When a user is part of a team with an assigned profile that covers the majority of their needs but requires just a little less access than the rest of their team.
- D. When an organization has opted out of using the standard profiles and created custom profiles.

Answer: B

NEW QUESTION # 93

Ursa Major Solar has a global customer base. Recent issues with customs have greatly delayed shipping to Canadian customers. While the Country field is already on the page layout, the sales team wants Canadian customers highlighted as a potential challenge for fulfillment until the shipping issue is resolved.

How should the administrator solve this issue?

- A. Add a rich text component to the Lightning page. Use conditional visibility to only show the component if the account is Canadian.
- B. Modify the page layouts to move the Country field into its own section.
- C. Create an in-app guidance prompt for Canadian records.
- D. Create a new record type and page layout for Canadian customers, ensuring their pages look different.

Answer: A

Explanation:

A rich text component allows administrators to add custom text or images to a Lightning page. Conditional visibility allows administrators to control when a component is visible based on criteria such as field values or device type. By using these features, administrators can highlight Canadian customers as a potential challenge for fulfillment without modifying the page layout or creating a new record type.
