

New ANVE Test Camp - Latest ANVE Test Fee

P.S. Free & New ANVE dumps are available on Google Drive shared by Prep4King: <https://drive.google.com/open?id=1tL9EgEWliKYInpCG7eejxBb996SI83mA>

Our technician will check the update of ANVE exam questions every day, and we can guarantee that you can get a free update service from the date of purchase. Once you have any questions and doubts about the ANVE exam questions we will provide you with our customer service before or after the sale, you can contact us if you have question or doubt about our ANVE Exam Materials and the professional personnel can help you solve your issue about using ANVE study materials.

Axis Communications' Certification Program provides a comprehensive training platform for professionals who want in-depth knowledge of Axis solutions. This program has multiple levels of certification, and ANVE is the first level credential for Axis certified professionals. The program is delivered through an online learning platform and covers a wide range of topics on network video surveillance. Candidates can choose to pursue certification in either network video or access control or both. By earning the ANVE certification, professionals can enhance their skills and gain a competitive edge in the security industry.

Axis ANVE certification is an essential program for professionals in the network video technology industry. It is a globally recognized certification that validates the knowledge and skills of individuals in IP video surveillance systems, network video technologies, and installation and management of Axis network cameras. Axis Network Video Exam certification enhances the credibility and marketability of professionals, making it an excellent investment for those looking to advance their careers in the industry.

The Axis Network Video Exam certification exam is available for both basic and advanced levels. The basic level is designed for professionals who are new to the field of network video surveillance and covers fundamental concepts such as camera placement, lens selection, and basic network configurations. The advanced level is designed for experienced professionals and covers more complex topics such as video analytics, system integration, and advanced network security.

Axis ANVE Questions To Complete Your Preparation

With over a decade's endeavor, our ANVE practice materials successfully become the most reliable products in the industry. There is a great deal of advantages of our ANVE exam questions you can spare some time to get to know. You can visit our website, and chat with our service online or via email at any time for we are working 24/7 online. Or you can free download the demos of our ANVE learning guide on our website, just click on the buttons, you can reach whatever you want to know.

Axis Network Video Exam Sample Questions (Q45-Q50):

NEW QUESTION # 45

When using Axis' Corridor Format

- A. Axis PTZ cameras can automatically track people walking down a corridor.
- B. Privacy masks block out areas outside the specified corridor width.
- C. The depth of field is automatically adjusted to keep the entire length of a corridor in focus.
- **D. The image is rotated 90 degrees, changing the aspect ratio to 9:16.**

Answer: D

Explanation:

When using Axis' Corridor Format, the image is rotated 90 degrees, changing the aspect ratio to 9:16. This format is particularly useful for monitoring narrow, vertical areas such as hallways, corridors, and aisles, maximizing the camera's field of view in such environments and ensuring better coverage of the intended area while minimizing wasted pixels on unimportant regions like walls.

NEW QUESTION # 46

What is the most efficient method for sending a video stream to multiple recipients simultaneously?

- A. Portcast
- B. Broadcast
- C. Unicast
- **D. Multicast**

Answer: D

Explanation:

The most efficient method for sending a video stream to multiple recipients simultaneously is multicast.

Multicast allows a single video stream to be transmitted to multiple recipients, reducing the bandwidth required compared to unicast, where separate streams are sent to each recipient. This approach optimizes network resources and ensures efficient distribution of video data. Axis Communications' networking and video streaming guidelines confirm multicast as the preferred method for such scenarios.

NEW QUESTION # 47

When recording a night scene with IR, what is the consequence of using a day-and-night camera without an IR-corrected lens?

- A. The image will flicker
- B. The IR light will not be used
- **C. The focus will shift**
- D. The color fidelity will be poor

Answer: C

Explanation:

When recording a night scene with IR, using a day-and-night camera without an IR-corrected lens can cause the focus to shift. This happens because IR light and visible light have different wavelengths and refract differently through the lens. An IR-corrected lens is designed to handle both types of light without causing a focus shift, ensuring sharp images in both day and night conditions.

NEW QUESTION # 48

In a switched network with Unicast

- A. Data packets can only be sent in one direction, for example from the camera to the server.
- **B. Data packets are sent only to one recipient no other computers will receive the data.**
- C. Only one camera at a time can send data packets through the network, to avoid congestion.
- D. All data packets are transmitted in a unified size, enabling network optimization.

Answer: B

Explanation:

In a switched network with Unicast, data packets are sent from the source to a single specific recipient. No other computers on the

network will receive the data intended for that recipient. This method ensures that the communication is direct and private between the sender and the receiver, which helps in managing network bandwidth efficiently. [Reference: Axis Communications - Networking Basics for IP Surveillance]

NEW QUESTION # 49

Match each product name with the right description. Drag each gray box from the left column to the matching blue box in the right column.

Answer:

Explanation:

AXIS P3344-V	Network camera protected from dust, water and vibrations
AXIS M1031-W	Outdoor ready network camera
AXIS M3114-R	Vandal resistant network camera
AXIS Q6035-E	Wireless network camera
