Under the hatchet of fast-paced development, we must always be cognizant of social long term goals and the direction of the development of science and technology. Adapt to the network society, otherwise, we will take the risk of being obsoleted. Although our Associate-Cloud-Engineer exam dumps have been known as one of the world's leading providers of exam materials, you may be still suspicious of the content. For your convenience, we especially provide several demos for future reference and we promise not to charge you of any fee for those downloading. Therefore, we welcome you to download to try our Associate-Cloud-Engineer Exam for a small part. Then you will know whether it is suitable for you to use our Associate-Cloud-Engineer test questions. There are answers and questions provided to give an explicit explanation. We are sure to be at your service if you have any downloading problems.

There are a lot of leading experts and professors in different field in our company. The first duty of these leading experts and professors is to compile the Associate-Cloud-Engineer exam questions. In order to meet the needs of all customers, the team of the experts in our company has done the research of the Associate-Cloud-Engineer study materials in the past years. As a result, they have gained an in-depth understanding of the fundamental elements that combine to produce world class Associate-Cloud-Engineer practice materials for all customers.

Test Associate-Cloud-Engineer Voucher - Exam Associate-Cloud-Engineer Braindumps

If you want to get a comprehensive idea about our real Associate-Cloud-Engineer study materials. It is convenient for you to download the free demo, all you need to do is just to find the "Download for free" item, and you will find there are three kinds of versions of Associate-Cloud-Engineer learning guide for you to choose from namely, PDF Version Demo, PC Test Engine and Online Test Engine, you can choose to download any one version of our Associate-Cloud-Engineer exam questions as you like.

Google Associate Cloud Engineer Exam Sample Questions (Q63-Q68):

NEW QUESTION # 63

A colleague handed over a Google Cloud Platform project for you to maintain. As part of a security checkup, you want to review who has been granted the Project Owner role. What should you do?

- A. Enable Audit Logs on the IAM & admin page for all resources, and validate the results.

- B. Navigate to Identity-Aware Proxy and check the permissions for these resources.
- **C. Use the command `gcloud projects get-iam-policy $PROJECT_ID --flatten="bindings[].members" --format="table(bindings.members)" --filter="bindings.role:roles/owner"` outputs all the users and service accounts associated with the role 'roles/owner' in the project in question.** <https://groups.google.com/g/google-cloud-dev/c/Z6sZs7TvygQ?pli=1>
- D. In the console, validate which SSH keys have been stored as project-wide keys.

Answer: C

Explanation:

A simple approach would be to use the command flags available when listing all the IAM policy for a given project. For instance, the following command: `gcloud projects get-iam-policy $PROJECT_ID --flatten="bindings[].members" --format="table(bindings.members)" --filter="bindings.role:roles/owner"` outputs all the users and service accounts associated with the role 'roles/owner' in the project in question. <https://groups.google.com/g/google-cloud-dev/c/Z6sZs7TvygQ?pli=1>

NEW QUESTION # 64

You are creating an application that will run on Google Kubernetes Engine. You have identified MongoDB as the most suitable database system for your application and want to deploy a managed MongoDB environment that provides a support SLA. What should you do?

- **A. Deploy MongoDB Atlas from the Google Cloud Marketplace**
- B. Download a MongoDB installation package and run it on Compute Engine instances
- C. Download a MongoDB installation package, and run it on a Managed Instance Group
- D. Create a Cloud Bigtable cluster and use the HBase API

Answer: A

Explanation:

MongoDB Atlas is actually managed and supported by third-party service providers.

<https://console.cloud.google.com/marketplace/details/gc-launcher-for-mongodb-atlas/mongodb-atlas>

NEW QUESTION # 65

Your company uses a large number of Google Cloud services centralized in a single project. All teams have specific projects for testing and development. The DevOps team needs access to all of the production services in order to perform their job. You want to prevent Google Cloud product changes from broadening their permissions in the future. You want to follow Google-recommended practices. What should you do?

- **A. Grant all members of the DevOps team the role of Project Editor on the production project.**
- B. Create a custom role that combines the required permissions. Grant the DevOps team the custom role on the organization level.
- C. Grant all members of the DevOps team the role of Project Editor on the organization level.
- D. Create a custom role that combines the required permissions. Grant the DevOps team the custom role on the production project.

Answer: A

NEW QUESTION # 66

You built an application on your development laptop that uses Google Cloud services. Your application uses Application Default Credentials for authentication and works fine on your development laptop. You want to migrate this application to a Compute Engine virtual machine (VM) and set up authentication using Google-recommended practices and minimal changes. What should you do?

- A. Store credentials for service accounts with appropriate access for Google services in a config file, and deploy this config file with your application.
- B. Assign appropriate access for Google services to the service account used by the Compute Engine VM.
- C. Store credentials for your user account with appropriate access for Google services in a config file, and deploy this config file with your application.
- **D. Create a service account with appropriate access for Google services, and configure the application to use this account.**

Answer: D

Explanation:

In general, Google recommends that each instance that needs to call a Google API should run as a service account with the minimum permissions necessary for that instance to do its job. In practice, this means you should configure service accounts for your instances with the following process: Create a new service account rather than using the Compute Engine default service account. Grant IAM roles to that service account for only the resources that it needs. Configure the instance to run as that service account. Grant the instance the <https://www.googleapis.com/auth/cloud-platform> scope to allow full access to all Google Cloud APIs, so that the IAM permissions of the instance are completely determined by the IAM roles of the service account. Avoid granting more access than necessary and regularly check your service account permissions to make sure they are up-to-date.

https://cloud.google.com/compute/docs/access/create-enable-service-accounts-for-instances#best_practices

NEW QUESTION # 67

You have a single binary application that you want to run on Google Cloud Platform. You decided to automatically scale the application based on underlying infrastructure CPU usage. Your organizational policies require you to use virtual machines directly. You need to ensure that the application scaling is operationally efficient and completed as quickly as possible. What should you do?

- A. Create an instance template, and use the template in a managed instance group that scales up and down based on the time of day.
- B. Create an instance template, and use the template in a managed instance group with autoscaling configured.
- C. Create a Google Kubernetes Engine cluster, and use horizontal pod autoscaling to scale the application.
- D. Use a set of third-party tools to build automation around scaling the application up and down, based on Stackdriver CPU usage monitoring.

Answer: C

NEW QUESTION # 68

.....

Our Google Associate-Cloud-Engineer exam questions are designed to provide you with the most realistic Associate-Cloud-Engineer experience possible. Each question is accompanied by an accurate answer, prepared by our team of experts. We also offer free Google Associate-Cloud-Engineer Exam Questions updates for 1 year after purchase, as well as a free Associate-Cloud-Engineer practice exam questions demo before purchase.
