Microsoft Configuring Windows Server Hybrid Advanced Services Sample Questions (Q86-Q91):

NEW QUESTION # 86

You have an on-premises IIS web server that hosts a web app named App1. You plan to migrate App1 to a container and run the container in Azure. You need to perform the following tasks:

- * Export App1 to a ZIP file.
- * Create a container image based on App1.

The solution must minimize administrative effort.

Microsoft

Answer Area

Azure Migrate

The Azure portal

Web Deploy

Windows Admin Center

Windows Server Migration Tools

Export App1 to a ZIP file: Tool

Create a container image with App1: Tool

Answer:

Explanation:

Microsoft

Answer Area

Azure Migrate

The Azure portal

Web Deploy

Windows Admin Center

Windows Server Migration Tools

Export App1 to a ZIP file: Azure Migrate

Create a container image with App1: Web Deploy

Explanation:

Azure Migrate

Web deploy

NEW QUESTION # 87

Your network contains an Active Directory Domain Services (AD DS) forest. The forest contains the domains shown in the following table.

Name	Domain controller	Configuration
fabrikam.com	DC1	PDC emulator
	DC2	Infrastructure master
	DC3	Read-only domain controller (RODC)
eu.fabrikam.com	DC4	PDC emulator
	DC5	Infrastructure master
	DC6	Read-only domain controller (RODC)

You are implementing Microsoft Defender for Identity sensors.

You need to install the sensors on the minimum number of domain controllers. The solution must ensure that Defender for Identity will detect all the security risks in both the domains.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Domain controllers that require the sensors:

DC1 and DC4 only

DC2 and DC5 only

DC1, DC2, DC4, and DC5 only

All the domain controllers in the forest

Authentication information that must be provided during the sensor installation:

An AD DS group managed service account (gMSA)

A cloud-only user from Azure Active Directory (Azure AD)

The access key generated by the Microsoft Defender for Identity portal

Answer:

Explanation:

Explanation

Text, table Description automatically generated

Domain controllers that require the sensors:	☐ DC1 and DC4 only ☐ DC2 and DC5 only ☐ DC1, DC2, DC4, and DC5 only ☒ All the domain controllers in the forest
Authentication information that must be provided during the sensor installation:	☐ An AD DS group managed service account (gMSA) ☐ A cloud-only user from Azure Active Directory (Azure AD) ☒ The access key generated by the Microsoft Defender for Identity portal

NEW QUESTION # 88

You have an Azure subscription.

You plan to deploy a virtual machine named VM1 to the East US Azure region and use Azure Site Recovery between availability zones.

You need to configure the disks on VM1 and the virtual network. The solution must meet the following requirements:

- * Maximize the availability of VM1.
- * Maintain the private IP address of VM1 during failover and failback operations.

What should you configure? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Disk configuration:

Virtual network configuration:

Answer:

Explanation:

Answer Area

Disk configuration:

Virtual network configuration:

NEW QUESTION # 89

You have a server named Server1 that runs Windows Server.

On Server1, you create a Data Collector Set named CollectorSet1 based on the Basic template.

You need to configure CollectorSet1 to meet the following requirements:

- * Older performance counter logs must be overwritten by new ones.
- * Performance counter logging must stop if there is less than 500 MB of free disk space.

What should you configure for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Older performance counter logs must be overwritten by new ones:	☐ The Configuration properties ☐ The Data Manager properties ☐ The Performance Counter properties
Performance counter logging must stop if there is less than 500 MB of free disk space:	☐ The Configuration properties ☐ The Data Manager properties ☐ The Performance Counter properties

Answer:

Explanation:

Older performance counter logs must be overwritten by new ones:	☐ The Configuration properties ☐ The Data Manager properties ☒ The Performance Counter properties
Performance counter logging must stop if there is less than 500 MB of free disk space:	☐ The Configuration properties ☐ The Data Manager properties ☒ The Performance Counter properties

Explanation:

Older performance counter logs must be overwritten by new ones:	☐ The Configuration properties ☐ The Data Manager properties ☒ The Performance Counter properties
Performance counter logging must stop if there is less than 500 MB of free disk space:	☐ The Configuration properties ☐ The Data Manager properties ☒ The Performance Counter properties

NEW QUESTION # 90

You are planning the migration of APP3 and APP4 to support the Azure migration plan.

What should you do on Cluster1 and in Azure before you perform the migration? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

On Cluster1:	☒ Configure Azure Network Adapter. ☒ Create a Point-to-Site (P2S) VPN connection to Vnet1. ☐ Import the Azure Migrate appliance. ☐ Install the Azure File Sync agent. ☐ Install the Windows Server Migration Tools.
In Azure:	☐ Create a premium block blobs Azure Storage account. ☐ Create a private endpoint. ☒ Create a VPN gateway. ☒ Create an Azure Migrate project.

Answer:

Explanation:

The screenshot shows a graphical user interface with two main sections: 'On Cluster1:' and 'In Azure:'. Each section has a dropdown arrow to its right. Under 'On Cluster1:', the steps are: 'Configure Azure Network Adapter.', 'Create a Point-to-Site (P2S) VPN connection to Vnet1.', 'Import the Azure Migrate appliance.', 'Install the Azure File Sync agent.', and 'Install the Windows Server Migration Tools.'. Under 'In Azure:', the steps are: 'Create a premium block blobs Azure Storage account.', 'Create a private endpoint.', 'Create a VPN gateway.', and 'Create an Azure Migrate project.'. A Microsoft logo is visible on the left side of the interface.

Explanation:

Graphical user interface, text, application Description automatically generated

This screenshot is similar to the one above, showing the same migration steps for 'On Cluster1:' and 'In Azure:'. However, in this version, the step 'Import the Azure Migrate appliance.' under 'On Cluster1:' and the step 'Create an Azure Migrate project.' under 'In Azure:' are highlighted with a grey background.
