These questions and answers have been designed by Sitecore experts and can be easily downloaded on a PC, MacBook, or smartphone for comfortable and convenient learning.

BOMI International RPA Capstone Experience Sample Questions (Q54-Q59):

NEW QUESTION # 54

A property manager in a disaster-prone area wants to ensure business continuity during an emergency. What is one of the BEST ways for the manager to mitigate downtime if many of the resources inside the disaster zone are not available during the crisis?

- A. Develop relationships with property management companies in the immediate area.
- B. Develop relationships with buildings outside of the immediate area.
- **C. Develop relationships with vendors outside of the immediate area.**
- D. Develop relationships with large contractors in the immediate area.

Answer: C

Explanation:

In a disaster scenario, local vendors may be unavailable or overwhelmed. Vendors outside the immediate area are more likely to be operational and accessible, making them critical to maintaining services and minimizing downtime during a crisis.

NEW QUESTION # 55

A property manager is tasked with reducing the energy consumption of a commercial building. Which of the following is the most effective first step in achieving this goal?

- A. Install solar panels on the roof without evaluating current energy use.
- B. Ask tenants to lower their use of electricity during peak hours.
- **C. Perform a comprehensive energy audit and implement cost-effective recommendations.**
- D. Increase the building's electricity usage to take advantage of economies of scale.

Answer: C

NEW QUESTION # 56

A property manager has planned and budgeted a chiller teardown for a medical office building. The work was scheduled to be completed in March. Due to a long lead time for parts, the work was not completed until May. The property manager will need to calculate the difference between actual and budgeted costs and report this information to the building owner. What is this called?

- A. Accrual
- B. Expense
- C. Audit
- **D. Variance**

Answer: D

Explanation:

A variance is the difference between what was budgeted and what was actually spent or incurred. In this case, the property manager must report the variance in costs and timing due to the delay, which is key in financial and performance reporting.

NEW QUESTION # 57

A property manager is working on constructing a new building that has a proposed height of one hundred feet. Which of the following codes should the manager FIRST address to get the building built?

- A. Structural
- B. Building
- C. Engineering
- **D. Zoning**

Answer: D

Explanation:

Zoning codes must be addressed first because they determine whether the proposed use, height, and location of a building are legally permitted on a particular parcel of land. If the building doesn't comply with zoning regulations, other code considerations like structural or engineering won't matter until zoning is resolved.

NEW QUESTION # 58

Which of the following would occur in a Phase II Environmental Site Assessment?

- A. Review of compliance with statutes
- B. Review of adjacent and surrounding properties
- C. Review of past and current property activities
- **D. Review of soil and water samples**

Answer: D

NEW QUESTION # 59
