Both practice tests are customizable, simulate actual exam scenarios, and help you overcome mistakes.

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q22-Q27):

NEW QUESTION # 22

Which SAP AI solution helps optimize supply chain operations?

Please choose the correct answer.

Response:

- A. SAP Digital Assistant
- **B. SAP AI for Supply Chain**
- C. SAP Business Workflow
- D. SAP AI Core

Answer: B

NEW QUESTION # 23

Which of the following API types does SAP recommend to use to achieve clean core integrations? Note:

There are 2 correct answers to this question.

- A. RFC
- **B. OData**
- C. Doc
- **D. SOAP**

Answer: B,D

Explanation:

SAP recommends specific API types to achieve clean core integrations, ensuring extensibility and maintainability in cloud-based SAP systems. The correct answers are SOAP and OData, as these are explicitly documented as preferred API types for clean core integrations.

SAP documentation explains: "To achieve clean core integrations in SAP S/4HANA Cloud and other cloud solutions, SAP recommends using modern API types such as OData and SOAP for seamless connectivity and extensibility." OData (Open Data Protocol) is widely used for "REST-based integrations," enabling "standardized, scalable access to SAP data and processes" in solutions like SAP S/4HANA Cloud. SOAP (Simple Object Access Protocol) is recommended for "secure, reliable integrations," particularly in scenarios requiring structured data exchange, such as financial transactions. These API types support SAP's clean core strategy by "minimizing custom code and ensuring upgradability." The incorrect options-RFC and Doc-are not recommended for clean core integrations. RFC (Remote Function Call) is a legacy protocol, less suitable for modern cloud architectures due to its complexity and lack of standardization. Doc is not a recognized API type in SAP's integration framework. SAP's emphasis on clean core principles, as seen in SAP Business Technology Platform integrations, confirms the preference for SOAP and OData.

NEW QUESTION # 24

How does SAP Ariba contribute to supply chain sustainability? Please choose the correct answer.

- **A. By monitoring supplier risks and compliance**
- B. By managing workforce training
- C. By providing sales forecasting insights
- D. By tracking HR compliance

Answer: A

Explanation:

SAP Ariba contributes to supply chain sustainability by enabling organizations to manage supplier relationships and ensure

compliance with sustainability standards. The correct answer is "By monitoring supplier risks and compliance," as this is the primary way SAP Ariba supports sustainable supply chain practices.

SAP documentation explains: "SAP Ariba helps organizations build sustainable supply chains by monitoring supplier risks and ensuring compliance with environmental, social, and governance (ESG) standards." It provides tools to "assess supplier performance, track compliance with sustainability regulations, and mitigate risks related to unethical practices or environmental violations." For example, SAP Ariba's supplier risk management capabilities allow companies to evaluate suppliers based on sustainability criteria, ensuring responsible sourcing and reducing environmental impact. This aligns with SAP's broader sustainability goals, as seen in solutions like SAP Sustainability Control Tower.

The incorrect options are unrelated to SAP Ariba's role in supply chain sustainability. Managing workforce training is an HR function, typically handled by SAP SuccessFactors. Providing sales forecasting insights is a marketing function, not specific to SAP Ariba. Tracking HR compliance is also an HR task, not a supply chain function. SAP Ariba's focus on supplier management and compliance makes it the clear choice for this purpose.

NEW QUESTION # 25

(What are the main categories of using AI in Cloud ERP? Note: There are 2 correct answers to this question.)

- A. Profitability optimization
- B. Productivity and efficiency
- C. Process knowledge
- D. Process-related decision optimization

Answer: B,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: The main categories of using AI in Cloud ERP are productivity and efficiency, which focus on automating tasks and streamlining workflows, and process-related decision optimization, which involves leveraging AI for better decision-making and outcome predictions in business processes.

Exact extracts supporting this:

"Challenges and benefits of Artificial Intelligence in Cloud ERP can be divided into two main categories: Process-related decision optimization; Productivity and efficiency." learning.sap.com

"These can be divided into two main categories: Process-related decision optimization." learning.sap.com (Implied the second as productivity and efficiency from context.) Other options are incorrect because:

Option C: Process knowledge is not identified as a main category; AI embeds knowledge but categories focus on optimization and efficiency.

Option D: Profitability optimization is a potential outcome but not a primary category; emphasis is on decision and productivity aspects.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: From the SAP Learning course "Positioning SAP Business AI," unit "Summarizing Key Solutions of Business AI," and "Understanding SAP Business AI for SAP S/4HANA Cloud," which categorize AI usage in Cloud ERP as decision optimization and productivity/efficiency, supporting positioning within the SAP Business Suite per C_BCBAI_2502 materials.

NEW QUESTION # 26

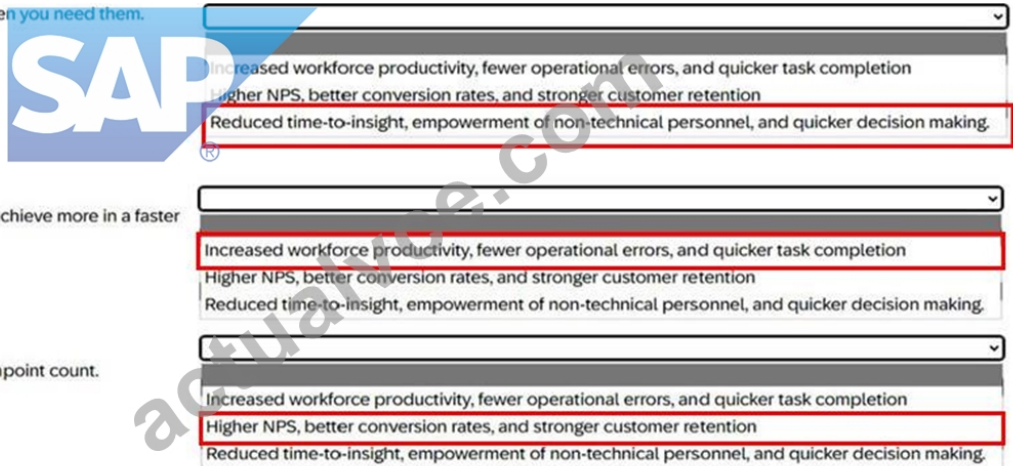

Match the outcomes in the dropdown lists to the capabilities of Joule

Get the insights you need, when you need them.	Increased workforce productivity, fewer operational errors, and quicker task completion Higher NPS, better conversion rates, and stronger customer retention Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.
Enable every employee to achieve more in a faster way.	Increased workforce productivity, fewer operational errors, and quicker task completion Higher NPS, better conversion rates, and stronger customer retention Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.
Make every customer touchpoint count.	Increased workforce productivity, fewer operational errors, and quicker task completion Higher NPS, better conversion rates, and stronger customer retention Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.

Answer:

Explanation:

Get the insights you need, when you need them.

A screenshot of a SAP Business AI Solutions interface. It features three horizontal panels, each with a dropdown menu on the left and a list of benefits on the right. The first panel has the text 'Get the insights you need, when you need them.' and the second panel has 'Enable every employee to achieve more in a faster way.' The third panel has 'Make every customer touchpoint count.' Each panel's dropdown menu is open, showing three options: 'Increased workforce productivity, fewer operational errors, and quicker task completion', 'Higher NPS, better conversion rates, and stronger customer retention', and 'Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.' The third option in each list is highlighted with a red border. A large 'SAP' logo is visible in the background on the left side.

Increased workforce productivity, fewer operational errors, and quicker task completion
Higher NPS, better conversion rates, and stronger customer retention
Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.

Increased workforce productivity, fewer operational errors, and quicker task completion
Higher NPS, better conversion rates, and stronger customer retention
Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.

Increased workforce productivity, fewer operational errors, and quicker task completion
Higher NPS, better conversion rates, and stronger customer retention
Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.

NEW QUESTION # 27

.....

Just like the old saying goes, there is no royal road to success, and only those who do not dread the fatiguing climb of gaining its numinous summits. In a similar way, there is no smoothly paved road to the C-BCBAI-2502 Certification. You have to work on it and get started from now.
