

New C-CPI-2506 Exam Fee, C-CPI-2506 Valid Test Sample

P.S. Free & New C-CPI-2506 dumps are available on Google Drive shared by Pass4sures: https://drive.google.com/open?id=1_DJLKNBqUWask05boOuXBZX1QzXOKr8u

Only 20-30 hours on our C-CPI-2506 learning guide are needed for the client to prepare for the test and it saves our client's time and energy. Most people may wish to use the shortest time to prepare for the C-CPI-2506 test and then pass the test with our C-CPI-2506 Study Materials successfully because they have to spend their most time and energy on their jobs, learning, family lives and other important things. And our C-CPI-2506 exam braindumps won't let you down!

SAP C-CPI-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Topic 2	SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.
Topic 3	Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
Topic 4	SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.

SAP C-CPI-2506 Valid Test Sample, New C-CPI-2506 Test Question

The SAP C-CPI-2506 practice tests on this software will allow you to self-assess your progress. It also allows you to schedule your SAP C-CPI-2506 practice exam. It imitates the actual pattern of the C-CPI-2506 Exam. This format works on Windows-based devices and requires no internet connection. The dedicated support team works hard to resolve any problem at any time.

SAP Certified Associate - Integration Developer Sample Questions (Q59-Q64):

NEW QUESTION # 59

Which of the following does SAP Graph provide?

- A. Unified cache of SAP-managed business data
- **B. Unified view of SAP-managed business data**
- C. Abstraction of business data for end users

Answer: B

Explanation:

SAP Graph provides a unified API layer that offers a business-centric, semantically harmonized view of SAP-managed data across multiple SAP solutions (e.g., S/4HANA, SuccessFactors, Ariba).

It does not cache data; instead, it provides real-time access.

It is not only an abstraction for end users, but specifically designed as a unified view for developers and applications.

Thus, the correct answer is Unified view of SAP-managed business data.

NEW QUESTION # 60

Which log level must you use to examine the payload at specific processing steps in an integration flow?

- A. Info
- B. Error
- **C. Trace**
- D. Debug

Answer: C

Explanation:

In SAP Cloud Integration, the log levels are:

Info # Default, logs basic execution details.

Debug # Logs processing steps, but not message payload.

Error # Logs only failures.

Trace # Captures message payloads at specific processing steps, used for deep troubleshooting.

Thus, to examine payload at runtime, the log level must be set to Trace.

NEW QUESTION # 61

What authentication method does the Service Key use to grant access when you generate a Service Key for an SAP Integration Suite Event Mesh message client?

- **A. auth 2.0 client authentication**
- B. 509 client certificates
- C. API Key authentication
- D. Basic Authentication

Answer: A

Explanation:

When generating a Service Key for an SAP Integration Suite Event Mesh message client, the credentials contain details required for authentication and connection.

Event Mesh uses OAuth 2.0 client credential flow for secure access.

The Service Key includes:

Client ID

Client Secret

OAuth Token URL

These values are used by applications to authenticate and obtain tokens before accessing Event Mesh queues or topics. Other methods (Basic Authentication, API Keys, X.509 certificates) are not used by default for Event Mesh service keys.

NEW QUESTION # 62

What can you use to prevent overload in an OData request and reply call?

- A. Stop parameter
- B. HTTP adapter
- C. Query filter
- **D. Paging**

Answer: D

Explanation:

To prevent overload in an OData request and reply call, you can use paging. Paging is a technique that allows you to retrieve a large number of data sets in smaller chunks or pages. You can use the OData query options \$top and \$skip to specify how many records you want to fetch and how many records you want to skip in each request. This reduces the network load and improves the performance of the OData service. Reference: OData API | SAP Help Portal, SAP Integration Suite: enrich a payload with OData Service | SAP Blogs

NEW QUESTION # 63

How do you configure a SOAP adapter for asynchronous processing?

- A. Message Exchange Pattern: Request-Reply. Process Settings: Robust
- B. Message Exchange Pattern: Request-Reply. Process Settings: WS Standard
- C. Message Exchange Pattern: One-Way. Process Settings: WS Standard
- **D. Message Exchange Pattern: One-Way. Process Settings: Robust**

Answer: D

Explanation:

For asynchronous processing in a SOAP adapter (SAP Cloud Integration):

Use Message Exchange Pattern = One-Way # Indicates no response is expected.

Choose Process Settings = Robust # Ensures message reliability and error handling in async flows.

Other combinations:

Request-Reply # Used for synchronous scenarios, not async.

WS Standard # Not the correct configuration for async reliability in CPI SOAP adapter.

Thus, correct async configuration is: One-Way + Robust.

NEW QUESTION # 64

.....

Our C-CPI-2506 training materials are the latest, valid and accurate study material for candidates who are eager to clear C-CPI-2506 exams. You can actually grasp the shortest time to do as much interesting and effective things you like as possible. C-CPI-2506 real questions are high value & high pass rate with competitive price products. And our pass rate of C-CPI-2506 Study Guide is as high as 99% to 100%. As long as you study with our C-CPI-2506 exam questions, you will pass the C-CPI-2506 exam easily.
