Our Exam-Killer devote themselves for years to develop the C-S4PM-2504 exam software to help more people who want to have a better development in IT field to pass C-S4PM-2504 exam. Although there are so many exam materials about C-S4PM-2504 exam, the C-S4PM-2504 exam software developed by our Exam-Killer professionals is the most reliable software. Practice has proved that almost all those who have used the software we provide have successfully passed the C-S4PM-2504 Exam. Many of them just use spare time preparing for C-S4PM-2504 SAP exam, and they are surprised to pass the certificated exam.

For candidates who preparing for the exam, knowing the latest information for the exam is quite necessary. C-S4PM-2504 exam cram of us can offer free update for 365 days for you, and we have skilled professionals examine the update every day, once we have the update version, we will send you the first time. C-S4PM-2504 training materials is not only high-quality, but also contain certain quantity, therefore they will be enough for you to pass the exam. We have a professional service team, and the service staffs have professional knowledge for C-S4PM-2504 Exam Materials, if you have any questions, you can consult us.

Free PDF Quiz 2025 SAP C-S4PM-2504: SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects – High-quality New Dumps Sheet

If you want to make one thing perfect and professional, then the first step is that you have to find the people who are good at them. In this C-S4PM-2504 exam braindumps field, our experts are the core value and truly helpful with the greatest skills. So our C-S4PM-2504 practice materials are perfect paragon in this industry full of elucidating content for exam candidates of various degrees to use for reference. Just come to buy our C-S4PM-2504 study guide!

SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q20-Q25):

NEW QUESTION # 20

Where is the initial list of known integrations documented?

- A. In the Fit-to-Standard Workshops
- **B. In the Digital Discovery Assessment**
- C. In SAP Cloud ALM
- D. In the Business Driven Configuration Questionnaire

Answer: B

Explanation:

Documenting the initial list of known integrations is a key step in planning the SAP S/4HANA Cloud Public Edition implementation. The correct tool or process must be identified to ensure accurate capture of integration needs.

* Option A: In the Fit-to-Standard WorkshopsIncorrect. SAP Cloud ALM is used to manage implementation tasks and requirements but is not the primary tool for initially documenting integration requirements. The SAP Cloud ALM Documentation states, "SAP Cloud ALM supports requirement management, but initial integration lists are typically captured in earlier discovery tools."

* Option B: In the Digital Discovery AssessmentCorrect. The Digital Discovery Assessment, conducted during the Discover phase, is designed to capture the initial list of known integration requirements. The SAP S/4HANA Cloud Implementation Guide confirms, "The Digital Discovery Assessment includes sections to document known integration requirements, ensuring that all necessary interfaces are identified early in the project."

* Option C: In the Business Driven Configuration QuestionnaireIncorrect. The Business Driven Configuration Questionnaire (BDCQ) is used to gather configuration values and validate solution fit during the Explore phase, not to document initial integration requirements. The SAP Activate Methodology Guide notes, "BDCQs focus on configuration details, not high-level integration planning."

* Option D: In the Fit-to-Standard WorkshopsIncorrect. Fit-to-Standard workshops, conducted in the Explore phase, refine integration requirements but do not serve as the initial documentation point. The SAP S/4HANA Cloud Study Guide explains, "Integration requirements are validated and detailed in Fit-to-Standard workshops, building on the initial list from the DDA." Extract from Official Documentation:

* SAP S/4HANA Cloud Implementation Guide(<https://help.sap.com>): "The Digital Discovery Assessment is the first step in identifying integration requirements, capturing a preliminary list of systems and interfaces that will connect with SAP S/4HANA Cloud."

* SAP Activate Methodology Guide: "The Discover phase uses the Digital Discovery Assessment to document initial integration needs, which are later refined in the Explore phase." Additional Context:

The DDA's role in capturing integration requirements ensures that the project team has a clear understanding of the system landscape early on, facilitating effective planning and resource allocation.

:

SAP Help Portal: SAP S/4HANA Cloud Implementation Guide (<https://help.sap.com>).

SAP Activate Methodology Guide: Outlines the Discover phase and DDA.

SAP Cloud ALM Documentation: Clarifies its role in requirement management.

NEW QUESTION # 21

How does an implementation consultant support customer experts during Fit-to-Standard workshops? Note: There are 2 correct answers to this question.

- A. Determine set up instructions for customer-driven integrations.
- B. Conduct end-user training on active scope items.
- **C. Highlight areas that require configuration or customization decisions.**
- **D. Demonstrate SAP Best Practice business processes in the starter system.**

Answer: C,D

NEW QUESTION # 22

If a customer wants to develop their own custom application and integrate it with SAP S/4HANA Cloud Public Edition, what tools would you recommend to develop the app? Note: There are 2 correct answers to this question.

- A. SAP Business Application Studio
- B. SAP Cloud Portal Service
- C. SAP HANA Cloud
- D. SAP Build

Answer: A,D

Explanation:

Developing custom applications for integration with SAP S/4HANA Cloud Public Edition requires tools that support extensibility and development within the SAP ecosystem.

* Option A: SAP HANA CloudIncorrect. SAP HANA Cloud is a database service, not a development tool for building custom applications. While it may store data for applications, it is not used for app development.

* Option B: SAP Cloud Portal ServiceIncorrect. SAP Cloud Portal Service is used for creating and managing portal sites, not for developing custom applications.

* Option C: SAP Business Application StudioCorrect. SAP Business Application Studio is a cloud- based development environment for building custom applications and extensions for SAP S/4HANA Cloud. It supports development using SAPUI5, Fiori elements, and other technologies, making it ideal forcustom app development. SAP's documentation highlights its role in extensibility.

* Option D: SAP BuildCorrect. SAP Build is a low-code/no-code platform that enables non-developers and developers to create custom applications and integrations. It is recommended for rapid application development and integration with SAP S/4HANA Cloud, as per SAP's extensibility guidelines.

:

SAP Business Application Studio Documentation: Describes its role in custom app development (<https://help.sap.com>).

SAP Build Overview: Highlights its use for low-code app development (<https://www.sap.com>).

SAP S/4HANA Cloud Extensibility Guide: Recommends SAP Business Application Studio and SAP Build for custom development.

NEW QUESTION # 23

When doing a new implementation on premise or private cloud, which system is recommended to demonstrate standard functionality in the Explore phase?

- A. Trial
- B. Sandbox
- C. Starter
- D. Development

Answer: B

Explanation:

In the Explore phase of a new implementation for SAP S/4HANA on-premise or Private Cloud, a system is used to demonstrate standard functionality, typically SAP Best Practices, to validate the solution fit during Fit- to-Standard workshops.

* Option A: DevelopmentIncorrect. The Development system is used for configuration and custom development in the Realize phase, not for demonstrating standard functionality. TheSAP S/4HANA Implementation Guidestates, "Development systems are for building and testing configurations, not for demonstrating standard processes in the Explore phase."

* Option B: StarterIncorrect. The Starter system is specific to SAP S/4HANA Cloud Public Edition, not on-premise or Private Cloud implementations. TheSAP S/4HANA Cloud Study Guidenotes, "The Starter system is used in Cloud Public Edition, while on-premise or Private Cloud uses other systems for exploration."

* Option C: SandboxCorrect. The Sandbox system is recommended for demonstrating standard functionality inon-premise or Private Cloud implementations during the Explore phase. TheSAP Activate Methodology Guideexplains, "For new implementations of SAP S/4HANA on-premise or Private Cloud, the Sandbox system is used in the Explore phase to demonstrate standard functionality and support Fit-to-Standard workshops."

* Option D: TrialIncorrect. Trial systems are for evaluation or training, not for active implementation.

TheSAP S/4HANA Implementation Guideclarifies, "Trial systems are for exploration outside of implementation projects, not for demonstrating standard functionality during the Explore phase." Extract from Official Documentation:

* SAP Activate Methodology Guide(SAP Community,<https://community.sap.com>): "In the Explore phase for SAP S/4HANA on-

premise or Private Cloud, the Sandbox system is recommended to demonstrate standard functionality, enabling Fit-to-Standard workshops to validate the solution fit."

* SAP S/4HANA Implementation Guide(SAP Help Portal,<https://help.sap.com>): "The Sandbox system is used in on-premise or Private Cloud implementations to showcase SAP Best Practices and standard functionality during the Explore phase, supporting requirement validation." Additional Context:

The Sandbox system's role in on-premise and Private Cloud implementations mirrors the Starter system's role in Public Cloud, providing a safe environment to explore standard processes without impacting development or production systems. This aligns with SAP Activate's focus on early validation to minimize customizations.

:

SAP Help Portal: SAP S/4HANA Implementation Guide (<https://help.sap.com>).

SAP Community: SAP Activate Methodology Guide (<https://community.sap.com>).

SAP S/4HANA Cloud Study Guide: Details system roles.

SAP Activate Methodology: Outlines Explore phase systems.

NEW QUESTION # 24

Which of the following configuration items CANNOT be changed after the initial provisioning of SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. Group currency
- B. Fiscal Year Variant
- C. Custom fields in standard objects
- D. User access rights

Answer: A,B

Explanation:

Certain configuration items in SAP S/4HANA Cloud Public Edition are locked after initial provisioning to ensure system consistency and compliance with cloud standards. This is managed through SAP Central Business Configuration (CBC).

* Option A: Group currencyCorrect. The group currency, used for financial reporting across the organization, cannot be changed after initial provisioning due to its impact on financial data integrity.

TheSAP Central Business Configuration Guidestates, "The group currency is a critical configuration item that is locked after initial provisioning to maintain consistency in financial reporting."

* Option B: Custom fields in standard objectsIncorrect. Custom fields can be added or modified post- provisioning using the Custom Fields and Logic app, supporting extensibility. TheSAP S/4HANA Cloud Extensibility Guidenotes, "Custom fields in standard objects can be created or adjusted throughout the system lifecycle to meet evolving business needs."

* Option C: User access rightsIncorrect. User access rights, managed through business roles, can be modified at any time using the Maintain Business Roles app. TheSAP S/4HANA Cloud Security Guide clarifies, "User access rights are flexible and can be updated post-provisioning to align with organizational changes."

* Option D: Fiscal Year VariantCorrect. The Fiscal Year Variant, which defines the financial calendar, is locked after provisioning to prevent disruptions in financial processes. TheSAP Central Business Configuration Guideexplains, "The Fiscal Year Variant is a non-changeable configuration item after initial provisioning, as it underpins all financial transactions and reporting." Extract from Official Documentation:

* SAP Central Business Configuration Guide(SAP Help Portal,<https://help.sap.com>):"Configuration items such as the group currency and Fiscal Year Variant are fixed after initial provisioning in SAP S/4HANA Cloud Public Edition to ensure system stability and data integrity."

* SAP S/4HANA Cloud Implementation Guide: "Certain settings, including group currency and Fiscal Year Variant, are locked post-provisioning to prevent changes that could impact financial consistency, while custom fields and access rights remain configurable." Additional Context:

The locking of group currency and Fiscal Year Variant reflects SAP's cloud strategy to maintain standardization and prevent costly reconfigurations, while allowing flexibility in areas like custom fields and access rights to support ongoing business needs.

:

SAP Help Portal: SAP Central Business Configuration Guide (<https://help.sap.com>).

SAP S/4HANA Cloud Extensibility Guide: Details custom field management.

SAP S/4HANA Cloud Security Guide: Explains access rights flexibility.

SAP S/4HANA Cloud Study Guide: Outlines configuration constraints.
