At QuestionsTube, you can read C1000-173 free demo questions in pdf file, so you can check the questions and answers before deciding to download the IBM C1000-173 practice questions. These free demo questions are parts of the C1000-173 exam questions. Download and read them carefully, you will find that the C1000-173 test questions of QuestionsTube will be your great learning materials online. Share some C1000-173 exam online questions below.

1. Which of the following best describes the importance of encryption of data at rest in IBM Cloud Pak

P.S. Free 2025 IBM C1000-173 dumps are available on Google Drive shared by PrepAwayTest: https://drive.google.com/open?id=1IY9e70qA2n6yrGjC6_84BOj12eLW2hvO

Our company is thoroughly grounded in our values. They begin with a prized personal and organizational quality--Integrity--and end with a shared concern for the candidates who are preparing for the C1000-173 exam. Our values include Innovation, Teamwork, Customer Focus, and Respect for Customers. These C1000-173 values guide every decision we make, everywhere we make them. As you can sense by now, and we really hope that you can be the next beneficiary of our C1000-173 training materials. You can just free download the demo of our C1000-173 training materials to check.

In today's competitive industry, only the brightest and most qualified candidates are hired for high-paying positions. Obtaining C1000-173 is a wonderful approach to be successful because it can draw in prospects and convince companies that you are the finest in your field. Pass the C1000-173 Exam to establish your expertise in your field and receive certification. However, passing the IBM Cloud Pak for Data v4.7 Architect C1000-173 exam is challenging.

C1000-173: IBM Cloud Pak for Data v4.7 Architect PDF - Testinsides C1000-173 actual - C1000-173 test dumps

Our PrepAwayTest have a lot of IT professionals and the exam practice questions and answers we provide have been certified by many IT elites. Besides, the exam practice questions and answers have wide coverage of the content of the examination and the correct rate is up to 100%. Although there are many similar websites, perhaps they can provide you study guide and online services, our PrepAwayTest is leading these many websites. The reason of making the PrepAwayTest stand out in so many peers is that we have a lot of timely updated practice questions and answers which accurately and correctly hit the exam. So we can well improve the exam pass rate and make the people ready to participate in IBM Certification C1000-173 Exam safely use practice questions and answers provided by PrepAwayTest to pass the exam. PrepAwayTest 100% guarantee you to pass IBM certification C1000-173 exam.

IBM C1000-173 Exam Syllabus Topics:

Topic	Details
Topic 1	Security Requirements: This domain targets a Security Architect and focuses on planning security for a Cloud Pak for Data deployment. It includes managing certificates that secure communications, identity management systems, and access and authorization controls to enforce secure and compliant user and service interactions. The auditing features and their integration with enterprise audit systems are crucial to ensure traceability and accountability. Asset interchange security involves safeguarding data movement between services.
Topic 2	Architect with AI Series: This section measures the skills of an AI Solution Architect and includes designing architectures for solutions involving various IBM Watson AI services. Architecting with Watson Assistant involves creating conversational AI interfaces. Watson Discovery solutions focus on building cognitive search and content analytics applications. Watson Pipelines solutions involve orchestrating data science workflows. Watson OpenScale architectures enable AI model monitoring and governance. Architecting with Match 360 supports personalized engagement by integrating multi-channel customer insights.
Topic 3	Architect with Data Governance Services: This section evaluates skills of a Data Governance Specialist, covering the architecture of knowledge catalogs to enable data discovery and management. Data Privacy architectures ensure compliance with regulatory requirements around data protection. Knowledge Accelerators involve designing solutions that speed up data governance processes through predefined policies and templates.
Topic 4	- Plan for a Cloud Pak for Data Implementation: This section of the exam measures the skills of an Implementation Consultant and covers determining which Cloud Pak for Data services to deploy based on organizational needs. It involves sizing the Kubernetes - OpenShift cluster appropriately for workload demands and planning backup and restore strategies to ensure data protection. Planning for high availability and disaster recovery is essential to maintain uninterrupted service. Multi-tenancy requirements must be understood to support multiple user groups securely on shared infrastructure. Migration requirements need assessment to transition existing data and workloads smoothly.
Topic 5	Architect with Analytic Services: This domain targets a Data Analytics Architect and focuses on designing solutions using analytic components of Cloud Pak for Data. Architecting with DataStage involves creating data integration and ETL pipelines. Data Refinery architectures prepare and cleanse data for analysis. Db2 Big SQL solutions address querying large distributed data sets with SQL, facilitating analytics across diverse data sources.

IBM Cloud Pak for Data v4.7 Architect Sample Questions (Q14-Q19):

NEW QUESTION # 14

In the context of Match 360, what is a significant factor for achieving a unified customer view?

- A. Focusing on a single data format
- B. Disregarding data source reliability
- C. Integrating disparate data sources effectively
- D. Avoiding real-time data synchronization

Answer: C

NEW QUESTION # 15

In Watson Discovery, what is the primary purpose of using query enrichment with machine learning models?

- A. To enhance the accuracy of search responses
- B. To reduce the data ingestion rate
- C. To increase the storage requirements
- D. To simplify the query language

Answer: A

NEW QUESTION # 16

What must be created to enable the Cloud Pak for Data platform to use a company's custom CA certificate to validate certificates from internal servers?

- A. A configmap that contains the company's CA certificate.
- B. A secret that contains the company's CA certificate.
- C. A configmap that contains all internal server certificate chains.
- D. A secret containing a wildcard certificate for all internal servers.

Answer: A

Explanation:

To enable IBM Cloud Pak for Data to trust certificates from internal servers using a custom Certificate Authority (CA), the correct method is to create a Kubernetes ConfigMap that contains the CA certificate. This ConfigMap is referenced by the platform's foundational services to include the CA in the trusted root store.

Secrets are typically used for storing sensitive data like private keys and TLS certificates but are not used for adding trusted root CAs at the platform level. A ConfigMap is explicitly required by the platform to inject the CA trust into the certificate validation chain.

NEW QUESTION # 17

Which potential problem can Watson OpenScale detect and mitigate?

- A. Drift
- B. Limited storage capacity
- C. New data overwrites
- D. Complex rule set

Answer: A

Explanation:

Watson OpenScale includes advanced monitoring capabilities for deployed AI models, including drift detection. Data drift refers to changes in input data distributions over time, which can degrade model performance. OpenScale continuously compares incoming data to the original training data to detect deviations and alert users when retraining may be required. It does not manage storage, data overwrites, or rule-based systems, making option B the only correct choice.

NEW QUESTION # 18

What are two ways to customize Knowledge Accelerators to meet specific requirements?

- A. Change Knowledge Accelerator content inline.
- B. Place Knowledge Accelerator content in a "development" vocabulary separate from the main stream "enterprise vocabulary".
- C. Use a GitHub Repo to manage any changes.
- D. Customize the content in a separate namespace.
- E. Create a separate project for any customized content.

Answer: B,E

Explanation:

Customization of Knowledge Accelerators in IBM Cloud Pak for Data is a structured process to preserve the integrity of base content while allowing for extension. The recommended approaches include:

Creating a separate project for customizations, so that changes are isolated and easily managed without affecting the source accelerator.

Using a "development" vocabulary where custom terms and structures are created. This is separate from the "enterprise vocabulary," which contains the unmodified, original Knowledge Accelerator content.

Inline editing of the original content is discouraged. Use of GitHub or namespaces is not part of the official customization workflow.

NEW QUESTION # 19

.....

Our C1000-173 study prep has inspired millions of exam candidates to pursue their dreams and motivated them to learn more high-efficiently. Many customers get manifest improvement. C1000-173 simulating exam will inspire your potential. And you will be more successful with the help of our C1000-173 training guide. Just imagine that when you have the certification, you will have a lot of opportunities to come to the bigger companies and get a higher salary.
