SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 2	Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 3	Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q30-Q35):

NEW QUESTION # 30

You can choose multiple field configurations and migrate them to the production site by creating a package in your test site. Which of the following steps should be included? Note: There are 3 correct answers to this question.

- A. If you are migrating fields that are associated with enumerations, you should load those enumerations in the production site before migrating the fields.
- B. Publish the form template within the test site in order to add the form fields in the package.
- C. Make sure you update the string resource files in the production site before migrating the corresponding field configurations from test to production site.
- D. Discard any other packages that appear in My Action Items.
- E. The Flex Master Data (FMD) templates must be defined and their data should be loaded in the production site before migrating FMD custom fields.

Answer: A,C,E

NEW QUESTION # 31

During which SAP Activate Methodology phase do you migrate the configuration to Production?

- A. Move
- B. Push
- C. Deploy
- D. Migrate

Answer: C

Explanation:

The Deploy phase is when final cutover activities take place, including migrating configurations and master data to production, running final system tests, and performing the go-live. The other options are not standard SAP Activate phases for Ariba.

NEW QUESTION # 32

You have a custom string field with a list of values. The values are represented as an Enumeration. Which of the following applies to this scenario?

- A. The display order in the drop down matches the order defined in the enumeration file
- B. The user can filter the values using the search box in the chooser
- C. In the enumeration file, the Value column must only contain whole numbers
- D. The display order of the values is alphabetical

Answer: A,B

NEW QUESTION # 33

Which scenarios are applicable when moving templates from the test site to the production site by Intelligent Configuration Manager (ICM)? (Select 2 correct answers)

- A. Batch imports are available for templates when migrating configuration bundles.
- B. Draft templates on the source site are skipped.
- C. Published templates with flex master data references in the test site are migrated to the production site during the first migration attempt.
- D. New templates that successfully migrated to the production site are in Draft state.

Answer: B,D

Explanation:

ICM only migrates published templates; draft templates are skipped (A). When templates are imported into production, they arrive in draft state by default to allow review and publishing before use (C). Batch imports for templates (B) are not supported; migration is typically handled per template. Flex master data references require manual migration steps and are not migrated automatically during the initial template transfer (D).

NEW QUESTION # 34

How can you make the attributes of a Flex Master Data field reportable?

- A. When the Flex Master Data Template is created, the attributes can be marked as reportable or not.
- B. Flex Master Data objects automatically include all attributes as reportable without any additional configuration.
- C. Create a custom reportable field and use a defaulting expression to set the value of the Flex Master Data attribute
- D. Flex Master Data objects and their attributes cannot be made reportable

Answer: A
