How to Prepare For C_CPI_2506 SAP Certified Associate - Integration Developer?

The BraindumpsPass offers three formats for applicants to practice and prepare for the SAP Certified Associate - Integration Developer (C_CPI_2506) exam as per their needs. The pdf format of BraindumpsPass is portable and can be used on laptops, tablets, and smartphones. Print real SAP Certified Associate - Integration Developer (C_CPI_2506) exam questions in our PDF file. The pdf is user-friendly and accessible on any smart device, allowing applicants to study from anywhere at any time.

SAP C_CPI_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
Topic 2	<ul style="list-style-type: none">• SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.
Topic 3	<ul style="list-style-type: none">• Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Topic 4	<ul style="list-style-type: none">• SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.

SAP Certified Associate - Integration Developer Sample Questions (Q12-Q17):

NEW QUESTION # 12

You want to integrate a SOAP adapter into an integration process and enable the adapter to send messages to the integration flow. Which user role must you set up in the SOAP adapter?

- A. MessagingSend
- **B. ESBMessaging send**
- C. MessagingsendtoCI

Answer: B

Explanation:

To integrate a SOAP adapter into an integration process and enable the adapter to send messages to the integration flow, you must set up the ESBMessaging send user role in the SOAP adapter. The ESBMessaging send user role grants the permission to send messages to the Enterprise Service Bus (ESB) of the Cloud Integration capability. The ESB is responsible for routing and delivering messages between different integration flows and adapters. Reference: Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 13

Which SAP Cloud Integration process event allows you to run integration flows directly after deployment?

- A. Content Modifier
- **B. Timer**
- C. Router
- D. Message Digest

Answer: B

Explanation:

A Timer event allows you to run integration flows directly after deployment. A Timer event is triggered by a predefined schedule or interval, such as every hour, every day, or every month. You can use a Timer event to initiate an integration process based on a time-based condition. Reference: Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 14

What are API Management components?Note: There are 2 correct answers to this question.

- A. API Entity
- B. Authorization server
- **C. Product**
- **D. API Designer**

Answer: C,D

Explanation:

Key API Management components in SAP Integration Suite:

API Designer # Used to design APIs, import specifications (OpenAPI, RAML), and define metadata.

Product # Groups one or more APIs into a package that can be published to API Business Hub Enterprise.

Other options:

Authorization Server # Part of security infrastructure, not a direct API Management component.

API Entity # Not a defined component; the actual entities are API Proxies, Providers, and Products.

Thus, correct components are API Designer and Product.

NEW QUESTION # 15

In a Data Store write operation, you want to set an Entry ID by reading a header value from an incoming message. Which notation do you use to implement this?

- A. S{receiverheader}
- B. S{receiverheader}
- C. \${header.receiver}
- D. S\${headerreceiver}

Answer: C

Explanation:

In SAP Cloud Integration, dynamic configuration values (headers, properties, body elements) are accessed using Expression Language (EL) notation:

`${header.<headerName>}` # Accesses a message header value.

`${property.<propertyName>}` # Accesses a message property.

`${body}` # Accesses the payload.

Therefore, when you want to set an Entry ID in a Data Store Write operation using a header value, the correct syntax is `${header.receiver}`.

NEW QUESTION # 16

In a Content Modifier, you want to set up a call to the message body of the previous Content Modifier. Which notation do use to implement this?

- A. S[bodyin]
- B. S{in body}
- C. S(inbody)
- D. S{body.in}

Answer: B

Explanation:

To access the message body of the previous Content Modifier step in an integration flow, you must use the notation `S{in body}` in the current Content Modifier step. This notation means that you want to read the value from the in-message body of the exchange container. The exchange container is used to store additional data besides the message that is being processed by SAP Integration Suite. It has two message containers: in-message and out-message. The in-message contains the original message that was received by the integration flow, while the out-message contains the modified message that will be sent by the integration flow. Reference: Content Modifier Basics | SAP Help Portal, Exchange Container | SAP Help Portal

NEW QUESTION # 17

.....

SAP is one of the international top companies in the world providing wide products line which is applicable for most families and companies, and even closely related to people's daily life.
