Authentic SAP C_THR92_2505 Exam Questions & Answers

The development of science and technology makes our life more comfortable and convenient, which also brings us more challenges. Many company requests candidates not only have work experiences, but also some professional certifications. Therefore it is necessary to get a professional C_THR92_2505 Certification to pave the way for a better future. The C_THR92_2505 question dumps produced by our company, is helpful for our customers to pass their exams and get the C_THR92_2505 certification within several days. Our C_THR92_2505 exam questions are your best choice.

SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting Sample Questions (Q79-Q84):

NEW QUESTION # 79

In a live data query, what are user-prompted filter types? Note: There are 2 correct answers to this question.

- A. Runtime
- B. People Scope
- C. Dynamic
- D. Filter Groups

Answer: A,B

Explanation:

- * Runtime Filters (A):
- * These are filters that the user is prompted to set when executing a report. The user can define filter criteria dynamically at runtime.
- * People Scope (D):
- * This filter type allows reports to be filtered based on groups or populations defined in the user's permissions, such as specific departments or locations.

NEW QUESTION # 80

Why is it important to consider the People step of the report definition when you share a table report with another user?

- A. The user may NOT have the same line of sight.
- B. The user may NOT have access to the relevant report domain.
- C. The user may NOT have access to run reports.
- D. The user may NOT have access to the fields in the report.

Answer: A

Explanation:

- * People Step in Report Definition:
- * The People step in a report determines the population (target group) of employees included in the report.
- * When you share the report, the recipient's line of sight (determined by their Role-Based Permissions) will affect their ability to view the data.
- * Example Scenario:
- * If the report is configured to include data for a specific department, but the user does not have permission to view data for that department, they may see limited or no data.

NEW QUESTION # 81

You are creating a calculated column to calculate an employee's organizational tenure. Why does the formula in the screenshot result in an error?

- A. An incorrect data type has been selected.
- B. An "if then else" statement needs to be included.
- C. The result of the formula is negative.
- D. An incorrect dynamic date variable has been used.

Answer: A

Explanation:

* Error Analysis

* Calculated columns in Query Designer require the correct data type to be specified based on the formula. If the selected data type does not match the formula's expected output, an error occurs.

* Why the Error Occurs

* The formula appears to involve a calculation related to dates. If the data type is not set to a compatible format (e.g., "Number" or "Date"), the calculation fails.

* Why Other Options are Incorrect

* A (Incorrect Dynamic Date Variable): The issue is not with the date variable but with the data type.

* B (If Then-Else Statement): Such a statement is unnecessary in the given formula.

* C (Negative Result): Negative results are not inherently problematic unless restricted by the data type.

NEW QUESTION # 82

You have a field in Job Information that stores the assignment of an employee to a Generic Object record for a Company Car. Company Car records include an Assignment Date of the Car. You want to create a query that includes the Employee Information, and also include the Assignment Date of the Car. You add the Job Information Table to Query Designer. What steps do you take to accomplish the query? Note; There are 2 correct answers to this question.

- A. In Job Information table, expand the Company Car Field.
- B. In Job information table, select the Assignment Date field.
- C. In the Company Car table, select the Assignment Date Field.
- D. In Related tables, add the Company Car table to the Query.

Answer: A,C

Explanation:

To include the Assignment Date of a Company Car in your query:

- * In Job Information Table, Expand the Company Car Field (A):
- * Open the Job Information table in Query Designer.
- * Locate the Company Car field and expand it to access related fields and data.
- * In the Company Car Table, Select the Assignment Date Field (D):
- * Add the Company Car table from the related tables section to the query.
- * Select the Assignment Date field from the Company Car table to include it in the query output.

NEW QUESTION # 83

You create a report page and want to change the grid column width and grid row height of the Page Designer. Where can you do this?

- A. Edit page properties
- **B. Edit designer properties**
- C. Validate page
- D. Edit Query

Answer: B

Explanation:

- * Page Designer Configuration
- * In SAP SuccessFactors, grid column widths and row heights are part of the designer's layout properties. These settings are configured in the designer properties of the page.
- * Why Other Options are Incorrect
- * A (Edit Page Properties): This is used for general page settings, not specific grid layout adjustments.
- * B (Edit Query): Query settings pertain to data retrieval, not layout.
- * D (Validate Page): Validation checks for errors but does not allow layout adjustments.
