Quiz 2025 GAQM Useful CASPO-001: New Certified Agile Scrum Product Owner (CASPO) Test Forum

GAQM Certification CASPO-001 Exam is very popular among the IT people to enroll in the exam. Passing GAQM certification CASPO-001 exam can not only change your work and life can bring, but also consolidate your position in the IT field. But the fact is that the passing rate is very low.

GAQM CASPO-001 certification exam is an ideal certification for anyone who is interested in agile methodologies, including product owners, product delivery teams, project managers, and business analysts. CASPO-001 Exam is intended to provide individuals with the necessary knowledge and skills to deliver great products using Agile Scrum.

GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q67-Q72):

NEW QUESTION # 67

What are two typical activities for a Product Owner in a Sprint? (Choose the best two answers)

- A. Attend every Daily Scrum to answer functional questions on the discussed Sprint Backlog items.
- B. Collaborate with stakeholders, user communities, and product managers.
- C. Work with the Developers on Product Backlog refinement.
- D. Create financial reporting upon the spent hours reported by the Developers.
- E. Update the work plan for the Developers on a daily basis.

Answer: B,C

Explanation:

The Product Owner's role during a Sprint centers on maximizing value through Product Backlog management and stakeholder engagement, as outlined in the Scrum Guide.

* C: Refinement is a key activity: "The Product Owner may do the above work [Product Backlog management], or may delegate the responsibility to others. Regardless, the Product Owner remains accountable." Collaborating with Developers ensures items are clear and "Ready."

* E: Stakeholder collaboration is critical: "The Product Owner is also accountable for effective Product Backlog management, which includes... representing the needs of many stakeholders in the Product Backlog."

* A: Attending every Daily Scrum isn't typical; it's the Developers' event, and the Product Owner attends only if needed.

* B: The Developers manage their work plan (Sprint Backlog); the Product Owner doesn't update it.

NEW QUESTION # 68

When a Developers determines that it has over-committed itself for a Sprint, who has to be present when reviewing and adjusting the Sprint work selected? (Choose the best answer)

- A. The Product Owner and all stakeholders.
- **B. The Product Owner and the Developers.**
- C. The Scrum Master, project manager, and Developers.
- D. The Developers.

Answer: B

Explanation:

The Scrum Guide states that the Sprint Backlog is owned by the Developers, who are responsible for planning and executing the work to achieve the Sprint Goal. If they realize they've over-committed, they must adjust the Sprint Backlog. However, since the Product Owner is accountable for maximizing value and managing the Product Backlog, their involvement is critical to ensure adjustments align with value delivery and the Sprint Goal. The Scrum Guide notes: "The Product Owner may influence the Developers by helping them understand and select trade-offs." Option A includes a non-existent "project manager" role in Scrum, making it incorrect.

Option C involves stakeholders, who are not part of mid-Sprint adjustments (they provide feedback at the Sprint Review). Option D excludes the Product Owner, which is insufficient given their role. Thus, B is correct.

NEW QUESTION # 69

The process of regular inspection and adaptation employs knowledgeable and skilled inspectors. What are two ways in which the Product Owner takes the lead in the inspection process? (Choose the best two answers)

- **A. At the Sprint Review the Product Owner shares the current state of Product Backlog, which, combined with the inspection of the Increment, leads to an updated Product Backlog.**
- **B. The Product Owner invites stakeholders to the Sprint Review to learn how the current state of the marketplace influences what is the most valuable thing to do next.**
- C. At the end of Sprint Planning the Product Owner verifies the Sprint Backlog for completeness in order to allow the Sprint to start.
- D. At the Daily Scrum the Product Owner inspects the Sprint burn-down for progress towards a complete Increment and re-planning the team's work.

Answer: A,B

Explanation:

The Product Owner leads inspection related to value and backlog management:

* A: At the Sprint Review, they present the Product Backlog state, adapting it based on Increment feedback, per: "The Product Owner discusses the Product Backlog as it stands."

* D: Inviting stakeholders ensures market insights inform value, aligning with: "The Product Owner may invite other people to attend."

* B: Daily Scrum is for Developers; the Product Owner doesn't inspect burn-downs there.

NEW QUESTION # 70

How important is it for a Product Owner to order Product Backlog items by value points? (Choose the best answer)

- A. Using value points is the ultimate way for a Product Owner to predict the value that the product will provide.
- **B. It is a good practice, keeping in mind that market reception is the best measure of value.**
- C. Calculating value points is an upfront approach that conflicts with the empiricism of Scrum, and is therefore not acceptable.

Answer: B

Explanation:

The Scrum Guide tasks the Product Owner with ordering the Product Backlog to maximize value, but it doesn't mandate a specific method like "value points." Option B is correct—using value points (e.g., in techniques like WSJF-Weighted Shortest Job First) is a helpful practice, but empirical validation (market reception) remains the ultimate measure, aligning with Scrum's focus on inspection and adaptation. Option A overstates value points as "ultimate," ignoring real-world feedback. Option C is too rigid; Scrum allows flexibility in tools as long as empiricism is upheld. Thus, B is the best answer.

NEW QUESTION # 71

The Product Owner manages the Product Backlog. Who is accountable for estimating the effort to complete the Product Backlog items? (Choose the best answer)

- A. The Product Owner. The Product Owner is required to commit on delivery to the users and the stakeholders.
- B. The PMO. They have all the history on projects delivered, and this enables the IT department to make delivery commitments.
- **C. The Developers. As a collective, they have a complete view of the work needed to transform Product Backlog items into Increments of product.**

Answer: C

Explanation:

Effort estimation is a technical task owned by the Developers, who execute the work. The Scrum Guide notes:

"The Developers are responsible for... planning how to deliver the Increment." During Sprint Planning and refinement, they estimate effort based on their expertise.

* A: Correct—the Developers collectively assess what's needed to meet the Definition of "Done."

* B: PMO isn't a Scrum role; estimation stays within the team.

NEW QUESTION # 72
