First of all, our system is very advanced and will not let your information leak out. It is totally safe to visit our website and buy our Category-7A-General-and-Household-Pest-Control learning prep. You won't worry anything with our services.

OCPE Pesticide Applicator Category 7A General and Household Pest Control Exam Sample Questions (Q33-Q38):

NEW QUESTION # 33

Which of the following rodents is considered to live in colonies rather than individual territories?

- A. House mouse
- **B. Norway rat**
- C. White-footed mouse

Answer: B

Explanation:

Norway rats (*Rattus norvegicus*) are social rodents that live in colonies with a hierarchical structure, often nesting in burrows or building basements. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 8: Rodents) describes their colonial behavior. Option A (white-footed mouse) and Option B (house mouse) are more solitary or live in smaller family groups, not large colonies.

NEW QUESTION # 34

Bedbugs go through:

- **A. Gradual metamorphosis (nymphs similar to adult stage)**
- B. Just two stages (egg and adult)
- C. Four distinct stages of development (egg, larva, pupa, and adult)

Answer: A

Explanation:

Bedbugs undergo gradual metamorphosis, also known as incomplete metamorphosis, which includes three stages: egg, nymph, and adult. Nymphs resemble smaller versions of adults and go through several molts before reaching maturity. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 7: Bedbugs) confirms this life cycle. Option A (four stages: egg, larva, pupa, adult) describes complete metamorphosis, typical of insects like beetles, not bedbugs. Option C (two stages) is incorrect, as nymph stages are a critical part of bedbug development.

NEW QUESTION # 35

Lice infestations are best treated by a:

- A. Heat treatment
- B. Residual pesticide treatment
- **C. Doctor or public health official**

Answer: C

Explanation:

Lice infestations (e.g., head lice) are a public health concern and are best treated by a doctor or public health official using FDA-

approved pediculicides or non-chemical methods like combing. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 7: Lice) notes that lice treatments are typically medical, not structural pest control, and fall outside the scope of Category 7A applicators. Option B (residual pesticide treatment) is not appropriate for lice on humans. Option C (heat treatment) may be used for items like bedding but not directly for lice infestations on people.

NEW QUESTION # 36

The yellow jacket is a:

- A. Social bee usually nesting in trees
- B. Solitary wasp nesting in the ground
- C. Ant with wings
- D. Social wasp usually nesting in the ground

Answer: D

Explanation:

Yellow jackets are social wasps that typically nest in the ground, often in abandoned rodent burrows or other cavities. They live in colonies with a queen and workers, as described in the General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 7: Wasps). Option B (social bee) is incorrect, as yellow jackets are wasps, not bees, and they do not typically nest in trees. Option C (solitary wasp) is incorrect, as yellow jackets are social. Option D (ant with wings) is incorrect, as yellow jackets are distinct from ants.

NEW QUESTION # 37

Power sprayers:

- A. Need to have their calibration checked to ensure the proper amount of pesticide is being delivered
- B. Need an annual calibration
- C. Are pre-calibrated at the factory and further calibration is not necessary

Answer: A

Explanation:

Power sprayers must be calibrated to ensure the correct amount of pesticide is applied, as application rates can vary due to wear, nozzle changes, or pressure adjustments. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 5: Pesticide Application) stresses that applicators should check calibration regularly to ensure accuracy, especially for Category 7A applications. Option A is incorrect because factory calibration does not account for field conditions or equipment changes. Option C (annual calibration) is a good practice but not a strict requirement; the need for calibration depends on usage and equipment condition.

NEW QUESTION # 38

.....

The APP version of our Category-7A-General-and-Household-Pest-Control study guide provides you with mock exams, time-limited exams, and online error correction and let you can review on any electronic device. So that you can practice our Category-7A-General-and-Household-Pest-Control exam questions on Phone or IPAD, computer as so on.
