Good practice on the success rate of CCAS quiz guide is not fully indicate that you have mastered knowledge is skilled, therefore, the CCAS test material let the user consolidate learning content as many times as possible, although the practice seems very boring, but it can achieve the result of good consolidate knowledge.

## ACAMS Certified Cryptoasset Anti-Financial Crime Specialist Examination Sample Questions (Q26-Q31):

### NEW QUESTION # 26

Which Is the general consensus among Jurisdictions who have performed a national risk assessment about cryptoasset activities conducted in their countries?

- **A. There Is a rising level of money laundering risks related lo cryptoasset activities**
- B. The level of money laundering risk linked to cryptoasset activities is very dependent on a country's geographical position.
- C. With increased awareness about cryptoasset activities, the money laundering risk levels become lower.

**Answer: A**

Explanation:

D, Where the adoption rate of digital banking Is high, a decreased level of money laundering risks related to cryptoasset activities is reported Explanation:

National risk assessments conducted across various jurisdictions consistently report that money laundering risks related to cryptoasset activities are rising. The growing adoption, complexity, and use of cryptoassets for illicit purposes contribute to elevated risk levels.

While geography (B), awareness (C), and digital banking adoption (D) can influence risk factors, the overarching trend is an increase in ML risks tied to cryptoassets.

This conclusion is supported by FATF's global guidance and numerous national risk assessment reports reviewed by the DFSA and related authorities

### NEW QUESTION # 27

Which risk category covers threats from ransomware actors demanding payment in cryptoassets?

- **A. Cyber-enabled financial crime risk**
- B. Counterparty risk
- C. Operational risk
- D. Liquidity risk

**Answer: A**

Explanation:

Ransomware schemes are categorized as cyber-enabled financial crimes. AML/CFT frameworks require that such risks be assessed and mitigated through blockchain analytics, sanctions screening, and transaction monitoring for known ransomware wallet addresses.

### NEW QUESTION # 28

According to the Financial Crimes Enforcement Network's Guidance 2019-G0001 pertaining to convertible virtual currencies, a money transmitter includes companies that:

- **A. Exchange digital tokens.**
- B. Provide the delivery, communication, or network access services to only support money transmission services.
- C. Act as payment processors to facilitate the purchase of, or payment of a bill for, a good or service through a clearance and settlement system.
- D. Operate a clearance and settlement system or otherwise act as intermediaries solely between Bank Secrecy Act-regulated institutions.

**Answer: A**

Explanation:

The FinCEN 2019 guidance clarifies that money transmitters include entities that exchange digital tokens or convertible virtual currencies as part of their business activities. This includes exchanges and platforms that transfer virtual currencies.

Providing infrastructure services (B), operating clearance systems solely among regulated institutions (C), or acting as payment processors for goods/services (D) without handling value transfer do not fall under the money transmitter definition per this guidance.

### NEW QUESTION # 29

Which statement regarding cryptocurrencies, digital assets, and blockchain is correct?

- A. Digital assets can only operate on a blockchain.
- B. Cryptocurrencies, blockchain, and digital assets can all be used as a means of payment.
- C. Cryptocurrencies and blockchain are the same and are terms used interchangeably.
- **D. Cryptocurrencies use encryption techniques operating independently from a central bank.**

**Answer: D**

Explanation:

Cryptocurrencies are digital currencies secured by cryptography, operating independently from any central bank or government.

Blockchain is the underlying distributed ledger technology supporting cryptocurrencies and other digital assets.

Cryptocurrencies and blockchain are not the same (B). Digital assets can exist off-blockchain (C), such as tokenized assets on centralized databases. While cryptocurrencies can be used as payment, blockchain itself is a technology, not a payment method (D).

### NEW QUESTION # 30

A virtual asset service provider (VASP) is using public information on the blockchain to trace a wallet address. Which additional step is necessary to identify the owner or controller of that address?

- A. Screen the wallet address for any historical transaction activity.
- B. Review the wallet address information periodically.
- C. Obtain further information connecting wallet address to virtual asset transactions.
- **D. Acquire information to connect the wallet address to a natural person.**

**Answer: D**

Explanation:

Public blockchain data is pseudonymous, meaning wallet addresses alone do not reveal the owner's identity. To identify the natural person controlling the wallet, the VASP must acquire additional information, typically through customer due diligence (CDD) processes or data obtained from exchanges and counterparties, linking the wallet address to an individual.

Periodic review (A), transaction screening (C), and obtaining transactional data (D) support ongoing monitoring but do not alone establish identity.

AML and FATF guidance emphasize that ownership linkage requires collecting identifying information beyond blockchain data to comply with AML regulations.

### NEW QUESTION # 31

.....

The rapid development of information will not infringe on the learning value of our CCAS study materials, because our customers will have the privilege to enjoy the free update for one year. You will receive the renewal of CCAS study materials through the email. And our CCAS study materials have three different version can meet your demands.
