CIPS Commercial Data Management Sample Questions (Q17-Q22):

NEW QUESTION # 17

Which of the following approaches to cyber security takes a bottom-up approach to assessing vulnerabilities meticulously item by item?

- A. component approach
- B. system approach
- C. elementary approach
- D. technology approach

Answer: A

Explanation:

This is the component approach - it looks at each individual component (each part of the IT system) in turn to check its okay. When a component is not directly controlled by the organisation (e.g. something to do with a supplier) this is called a dependency. Component approach is a bottom-up approach and is the opposite of the top-down approach which is called the 'system driven approach'. P.179 Domain: 3.2
