

New Cisco 300-620 Test Simulator - Latest 300-620 Training

Exam Cisco 300-620 Learning - Latest 300-620 Exam Papers

People always tend to neglect the great power of accumulation, thus the 300-620 study material can not only benefit you in learning process but also help people achieve a good kind of learning design. We have full confidence to ensure that you will have an enjoyable study experience with our 300-620 Study Materials, which are designed to ensure your interest and help you pass the exam more easily. You will have a better understanding after reading the following advantages.

Cisco 300-620 Exam Topics:

Topic	Weight	Objectives
ACI Management	25%	1. Implement all of the 4 and 5 in the 4 2. Implement 4 and 5 in the 4 3. Implement 4 and 5 in the 4 4. Implement 4 and 5 in the 4 5. Implement 4 and 5 in the 4
Integration	15%	1. Implement 4 and 5 in the 4 2. Implement 4 and 5 in the 4 3. Implement 4 and 5 in the 4 4. Implement 4 and 5 in the 4 5. Implement 4 and 5 in the 4
ACI Packet Forwarding	15%	1. Implement 4 and 5 in the 4 2. Implement 4 and 5 in the 4 3. Implement 4 and 5 in the 4 4. Implement 4 and 5 in the 4 5. Implement 4 and 5 in the 4

DOWNLOAD the newest Prep4King 300-620 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1z488ifb2Uljke3jrTA5tg9ne6UZj6fCV>

You can free download Cisco 300-620 exam demo to have a try before you purchase 300-620 complete dumps. Instant download for 300-620 trustworthy Exam Torrent is the superiority we provide for you as soon as you purchase. We ensure that our 300-620 practice torrent is the latest and updated which can ensure you pass with high scores. Besides, Our 24/7 customer service will solve your problem, if you have any questions.

Understanding functional and technical aspects of Implementing Cisco Application Centric Infrastructure (300-620 DCACI) Host-Based Analysis

The following will be discussed in **CISCO 300-620 Exam Dumps**:

- Implement Layer 2 out (STP/MCP basics)
- Implement Layer 3 out (excludes transit routing and VRF route leaking)
- Drive agility with policy driven automation for cloud deployments

Latest 300-620 Training & 300-620 Latest Exam Guide

300-620 dumps at Prep4King are always kept up to date. Every addition or subtraction of 300-620 exam questions in the exam syllabus is updated in our braindumps instantly. Practice on real 300-620 exam questions and we have provided their answers too for your convenience. If you put just a bit of extra effort, you can score the highest possible score in the real 300-620 exam because our 300-620 Exam Preparation dumps are designed for the best results. Start learning the futuristic way. 300-620 exam practice software allows you to practice on real 300-620 questions. The 300-620 Practice Exam consists of multiple practice modes, with practice history records and self-assessment reports. You can customize the practice environment to suit your learning objectives.

Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q312-Q317):

NEW QUESTION # 312

Which statement regarding ACI Multi-Pod and TEP pool is true?

- A. The IP addresses used in the IPN network can overlap TEP pool of the APIC.
- **B. A different TEP pool must be assigned to each Pod.**
- C. The Pod1 TEP pool must be split and a portion of the TEP pool allocated to each Pod.
- D. The same TEP pool is used in all Pods.

Answer: B

NEW QUESTION # 313

An engineer associates EPG-A with a VMM domain and sets the Deployment and Resolution preferences to Immediate. The host that will generate endpoints for EPG-A is attached to Leaf-101 and Leaf-102 using eth1/1. However, no configuration for EPG-A appears to have been pushed to the leaf switches. Which action must be taken for the configuration to be pushed to f-101 and Leaf-102?

- A. Enable LACP on the leaf switch ports.
- B. Configure both ports for trunking.
- C. Disable and enable eth1/1 on both leaf switches.
- **D. Enable CDP or LLDP on the host.**

Answer: D

Explanation:

The scenario involves associating EPG-A with a Virtual Machine Manager (VMM) domain, setting the Deployment and Resolution preferences to Immediate, and attaching the host (generating endpoints for EPG-A) to Leaf-101 and Leaf-102 via eth1/1. However, no configuration for EPG-A is pushed to the leaf switches. This suggests an issue with the discovery or communication between the ACI fabric and the host. Let's analyze the options based on Cisco ACI documentation.

Requirement Analysis

The VMM domain integration (e.g., VMware vCenter) relies on protocols like Cisco Discovery Protocol (CDP) or Link Layer Discovery Protocol (LLDP) to detect and map virtualized endpoints to the correct EPG.

The "Immediate" preference ensures that policies are applied as soon as endpoints are detected, but this requires proper protocol support for host discovery.

No configuration on the leaf switches indicates a failure in endpoint detection or policy application.

Option Evaluation

A . Enable CDP or LLDP on the host:

ACI uses CDP or LLDP to discover hosts and their interfaces when integrated with a VMM domain. If the host does not have CDP or LLDP enabled, the ACI fabric cannot detect the host's attachment to Leaf-101 and Leaf-102, preventing EPG-A configuration from being pushed. Enabling these protocols on the host resolves the issue.

Reference:

B . Configure both ports for trunking:

Configuring ports as trunk ports allows multiple VLANs, which is necessary for EPG encapsulation. However, this is typically handled by the VMM domain integration and does not address the lack of configuration push if discovery fails due to missing CDP/LLDP.

C . Enable LACP on the leaf switch ports:

Link Aggregation Control Protocol (LACP) is used for port channels (e.g., vPC), but it is not required for basic EPG deployment with VMM domains. The issue is related to host discovery, not link aggregation.

D . Disable and enable eth1/1 on both leaf switches:

This is a troubleshooting step to reset the port state, but it does not address the root cause (lack of CDP/LLDP for host detection).

It is a reactive measure, not a solution.

Final Answer Justification

A is correct because enabling CDP or LLDP on the host allows the ACI fabric to detect the host and push the EPG-A configuration to Leaf-101 and Leaf-102. This is a standard requirement for VMM domain integration in ACI.

Primary Cisco Reference:

Cisco APIC Layer 4 to Layer 7 Services Deployment Guide, "VMM Domain Configuration." Cisco ACI Best Practices, "Host Discovery with CDP/LLDP."

NEW QUESTION # 314

An engineer must configure VMM domain integration on a Cisco UCS B-Series server that is connected to a Cisco ACI fabric.

Drag and drop the products used to create VMM domain from the bottom into the sequence in which they should be implemented at the top. Products are used more than once.

On the interface, create a dynamic VLAN pool.
On the interface, create a VMware vCenter domain.
On the interface, create a vCenter/vShield controller.
On the user interface, verify that the VMware vDS is created.

APIC

vCenter

UCS Manager

Answer:

Explanation:

On the interface, create a dynamic VLAN pool.
On the interface, create a VMware vCenter domain.
On the interface, create a vCenter/vShield controller.
On the user interface, verify that the VMware vDS is created.

APIC

vCenter

UCS Manager

NEW QUESTION # 315

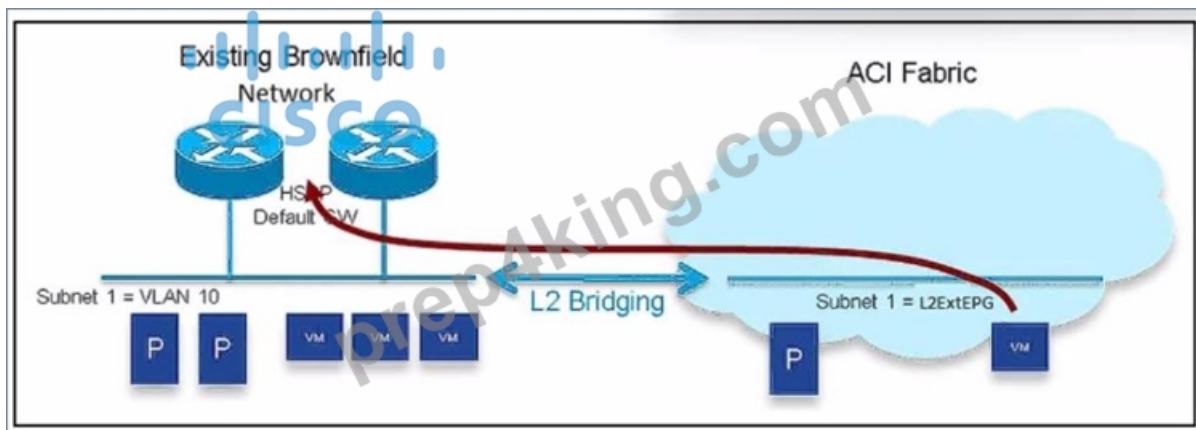

Which type of port is used for in-band management within ACI fabric?

- A. spine switch port
- B. leaf access port
- C. APIC console port
- D. management port

Answer: B

NEW QUESTION # 316

Refer to the exhibit.

An engineer must migrate workloads from the brownfield network to the Cisco ACI fabric. The VLAN 10 default gateway remains in the router located in the brownfield Network. The bridge domain has already been associated with L2out. Which two actions must be taken to migrate the workloads? (Choose two.)

- A. Select Limit IP Learning to Subnet.
- B. Map the MAC address of the default gateway to the bridge domain
- C. Set L2 Unknown Unicast Flood.
- D. Configure Multi-Destination Flooding Flood in Encapsulation.
- E. Enable ARP Flooding

Answer: C,E

NEW QUESTION # 317

.....

Many candidates find the Cisco 300-620 exam preparation difficult. They often buy expensive study courses to start their Implementing Cisco Application Centric Infrastructure (300-620) certification exam preparation. However, spending a huge amount on such resources is difficult for many Cisco exam applicants. The latest Cisco 300-620 Exam Dumps are the right option for you to prepare for the 300-620 certification test at home. Prep4King has launched the 300-620 exam dumps with the collaboration of world-renowned professionals.
