

New CWDP-305 Test Pass4sure, CWDP-305 Questions Pdf

With the rapid development of the world economy and frequent contacts between different countries, the talent competition is increasing day by day, and the employment pressure is also increasing day by day. If you want to get a better job and relieve your employment pressure, it is essential for you to get the CWDP-305 Certification. However, due to the severe employment situation, more and more people have been crazy for passing the CWDP-305 exam by taking examinations, and our CWDP-305 exam questions can help you pass the CWDP-305 exam in the shortest time with a high score.

CWNP CWDP-305 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Deploy the WLAN: This section of the exam measures the skills of a WLAN Implementation Specialist and involves overseeing the deployment phase of wireless networks. It focuses on understanding deployment procedures for various WLAN architectures, configuring supporting infrastructure, and verifying proper installation. The section also addresses physical installation checks, documentation handover, and quality assurance practices during ongoing installations.
Topic 2	<ul style="list-style-type: none">• Design the WLAN: This section of the exam measures the skills of a WLAN Design Engineer and covers the process of selecting configurations, architecture types, and wireless components to meet business and technical requirements. It includes using design software, selecting access points and antennas, and applying methodologies such as predictive or measured design. Candidates must demonstrate the ability to produce effective documentation and configure features like QoS, roaming security, and network services for different types of client devices and applications.
Topic 3	<ul style="list-style-type: none">• Validate and Optimize the WLAN: This section of the exam measures the skills of a WLAN Optimization Specialist and assesses the ability to test, validate, and fine-tune wireless networks post-deployment. Key tasks include RF validation surveys, performance testing, troubleshooting connectivity and security issues, and applying appropriate physical or RF adjustments. It also involves client testing and final project handover, including documentation, knowledge transfer, and meetings to ensure long-term WLAN success.
Topic 4	<ul style="list-style-type: none">• Define Specifications for the WLAN: This section of the exam measures the skills of a Wireless Network Planner and focuses on gathering business and technical requirements needed for designing wireless LANs. It includes understanding user needs, regulatory and safety constraints, and environmental factors. Candidates are expected to identify critical elements such as coverage, capacity, security, and device compatibility, and to analyse existing infrastructure and documentation to ensure a successful design strategy.

2025 Unparalleled New CWDP-305 Test Pass4sure & Certified Wireless Design Professional Questions Pdf

If candidates need to buy the CWDP-305 exam dumps for the exam, they must care for the pass rate. The pass rate of our CWDP-305 exam dumps is over 98 , and we can ensure that you can pass it. If you have some questions about the CWDP-305 Exam Materials, you can consult us. Furthermore, we have the technicians for our website, and they will check network environment safety at times, we offer you a clean and safety online network environment for you.

CWNP Certified Wireless Design Professional Sample Questions (Q211-Q216):

NEW QUESTION # 211

One of your customers plans on providing wireless coverage to a warehouse facility. After performing an initial walkthrough, you collect the following information:

The central part of the warehouse is between 400 and 600 feet (122 to 183 meters) from the warehouse switches mounted on the walls.

#The warehouse storage is composed of metallic racks with varying inventory levels and contents, from electronics and plastic toys to food pallets and juice bottles.

#Workers need basic data coverage from their working location, and are not highly mobile. They usually work from one single aisle, and their laptop is on a cart with wheels.

What would be your one recommendation to provide coverage to the central area of the warehouse?

- A. Equip workers laptops with a directional antenna and install APs less than 328 feet (100m) away from the switch.
- B. Install APs for client access in the central area and use a mesh backhaul link to connect to the DS.
- C. In this case, extend the cable length just beyond 328 feet (100 m) and position APs as close as possible to the central area of the warehouse.
- D. Position APs along the walls, and equip the APs with Yagi antennas to cover the central area.

Answer: C

NEW QUESTION # 212

Which operational plane would be responsible for performing automated RF management?

Response:

- A. Data
- B. Management
- C. Integration
- D. Control
- E. Distribution

Answer: D

NEW QUESTION # 213

A controller-based WLAN infrastructure has its controller on a different subnet than its APs. What device must be used to enable any communication between the Controller and the APs?

- A. Wireless bridge
- B. Router
- C. PoE Layer 2 switch
- D. NTP server

Answer: B

Explanation:

In a controller-based WLAN infrastructure, when the Wireless LAN Controller (WLC) and Access Points (APs) reside on different subnets, a router is essential to facilitate communication between them. The router enables inter-subnet routing, allowing APs to discover and communicate with the WLC.

The CWDP-305 Official Study and Reference Guide emphasizes the necessity of proper Layer 3 routing for APs to locate and join controllers across different subnets.

NEW QUESTION # 214

What might limit the ability to locate 802.11 clients using a WLAN infrastructure without an 802.11 tag?

- A. Lack of 802.11k support
- B. When its radio is disabled
- C. When it is off
- D. When its radio is disabled

Answer: C

NEW QUESTION # 215

Main Topic: Infrastructure Design

Question:

What are methods of providing RF high availability?

- A. Use dual spectrums.
- B. Deploy 802.3af.
- C. Power APs to maximum power.
- D. Deploy using 100 percent overlap.
- E. Use the HSRP/VRRP protocol.

Answer: A,D

Explanation:

Comprehensive and Detailed Explanation:

Ensuring high availability in RF design involves strategies that provide redundancy and resilience:

C: Deploy using 100 percent overlap: Overlapping coverage areas between APs ensure that if one AP fails, clients can seamlessly connect to another, maintaining network availability.

E: Use dual spectrums: Utilizing both 2.4 GHz and 5 GHz bands allows for flexibility and redundancy. If one band experiences interference or congestion, clients can switch to the other.

A: Powering APs to maximum power can lead to increased interference and is not a recommended practice for high availability.

B: HSRP/VRRP protocols are related to router redundancy and do not directly impact RF availability.

D: Deploying 802.3af refers to Power over Ethernet standards and, while important for powering devices, does not directly contribute to RF high availability.

NEW QUESTION # 216

.....

We have handled professional CWDP-305 practice materials for over ten years. Our experts have many years' experience in this particular line of business, together with meticulous and professional attitude towards jobs. Their abilities are unquestionable, besides, CWDP-305 Exam Questions are priced reasonably with three kinds: the PDF, Software and APP online. Though the content is the same, but their displays are totally different and functional.
