New CWSP-208 Exam Prep & Online CWSP-208 Training

If you feel nervous about the exam, then you can try the CWSP-208 exam dumps of us. It will help you to release your nerves. CWSP-208 Soft test engine can stimulate the real exam environment, if you use this version, it will help you know the procedures of the exam. In addition, CWSP-208 Exam Materials are verified by experienced experts, and the quality can be guaranteed. CWSP-208 exam dumps have both questions and answers, and they may benefit your practice.

Firmly believe in an idea, the CWSP-208 exam questions are as long as the user to follow our steps, follow our curriculum requirements, users can be good to achieve their goals, to obtain the CWSP-208 qualification certificate of the target. Before you make your decision to buy our CWSP-208 learning guide, you can free download the demos to check the quality and validity. Then you can know the CWSP-208 training materials more deeply.

Online CWSP-208 Training, CWSP-208 Latest Braindumps Ppt

How to pass the CWSP-208 exam and gain a certificate successfully is of great importance to people who participate in the exam. Here our company can be your learning partner and try our best to help you to get success in the CWSP-208 exam. Why should you choose our company with CWSP-208 Preparation braindumps? We have the leading brand in this carrer and successfully help tens of thousands of our customers pass therir CWSP-208 exam and get admired certification.

CWNP Certified Wireless Security Professional (CWSP) Sample Questions (Q119-Q124):

NEW QUESTION # 119
You work as the security administrator for your organization. In relation to the WLAN, you are viewing a dashboard that shows security threat, policy compliance and rogue threat charts. What type of system is in view?

- A. WLAN Emulation System
- B. Distributed RF Spectrum Analyzer
- C. Wireless VPN Management Systems
- D. Wireshark Protocol Analyzer
- E. Wireless Intrusion Prevention System

Answer: E

Explanation:
A WIPS (Wireless Intrusion Prevention System) is designed to monitor WLAN activity and provide visualization and reporting related to:
Security threats (e.g., DoS attacks, rogue devices)
Policy compliance (e.g., allowed SSIDs, encryption types)
Rogue threat classification (e.g., rogue, neighbor, ad hoc)
The dashboard displaying this type of security-centric overview is characteristic of a WIPS platform.

CWSP-208 Study Guide, Chapter 7 - WIPS Visualization and Monitoring
CWNP CWSP-208 Objectives: "Threat Visualization and Reporting"

NEW QUESTION # 120
Given: An 802.1X/EAP implementation includes an Active Directory domain controller running Windows Server 2012 and an AP from a major vendor. A Linux server is running RADIUS and it queries the domain controller for user credentials. A Windows client

is accessing the network.
What device functions as the EAP Supplicant?

- A. Windows client
- B. Access point
- C. Windows server
- D. An unlisted switch
- E. Linux server
- F. An unlisted WLAN controller

Answer: A

Explanation:
In an 802.1X/EAP authentication model:
Supplicant: The device requesting access (the Windows client).
Authenticator: The AP or switch enforcing access decisions.
Authentication Server: The RADIUS server (Linux in this case), which communicates with a backend credential database (Active Directory).
The Windows client runs the EAP supplicant software to initiate authentication.
Incorrect:
A). The Linux server is the Authentication Server (not Supplicant).
C). The AP acts as the Authenticator.
D). The Windows Server is the credential store, not the supplicant.

NEW QUESTION # 121
You are implementing a wireless LAN that will be used by point-of-sale (PoS) systems in a retail environment. Thirteen PoS computers will be installed. To what industry requirement should you ensure you adhere?

- A. ISA99
- B. PCI-DSS
- C. Directive 8500.01
- D. HIPAA

Answer: B

Explanation:
PCI-DSS (Payment Card Industry Data Security Standard) applies to all entities that process, store, or transmit credit card data. Since Point-of-Sale (PoS) systems handle such transactions in retail environments, the wireless network supporting them must comply with PCI-DSS. This includes encrypting wireless transmissions, segmenting network traffic, and implementing WIPS for rogue detection and logging.

CWSP-208 Study Guide, Chapter 3 - WLAN Policy & Regulatory Compliance
CWNP CWSP-208 Objectives: "Industry Standards & Compliance (e.g., PCI-DSS, HIPAA)"

NEW QUESTION # 122
A single AP is configured with three separate WLAN profiles, as follows:
1. SSID: ABCData - BSSID: 00:11:22:00:1F:C3 - VLAN 10 - Security: PEAPv0/EAP-MSCHAPv2 with AES-CCMP - 3 current clients
2. SSID: ABCVoice - BSSID: 00:11:22:00:1F:C4 - VLAN 60 - Security: WPA2-Personal with AES-CCMP
- 2 current clients
3. SSID: Guest - BSSID: 00:11:22:00:1F:C5 - VLAN 90 - Security: Open with captive portal authentication
- 3 current clients
Three STAs are connected to ABCData. Three STAs are connected to Guest. Two STAs are connected to ABCVoice.
How many unique GTKs and PTKs are currently in place in this scenario?

- A. 2 GTKs - 5 PTKs

- B. 1 GTK - 8 PTKs
- C. 3 GTKs - 8 PTKs
- D. 2 GTKs - 8 PTKs

Answer: C

Explanation:
PTK (Pairwise Transient Key) is established per-client, so:
ABCData: 3 clients = 3 PTKs
ABCVoice: 2 clients = 2 PTKs
Guest: 3 clients = 3 PTKs
Total: 8 PTKs
GTK (Group Temporal Key) is shared per SSID, so:
One GTK per SSID (ABCData, ABCVoice, Guest)
Total: 3 GTKs

IEEE 802.11 Key Management Architecture

NEW QUESTION # 123

Given: During 802.1X/LEAP authentication, the username is passed across the wireless medium in clear text.
From a security perspective, why is this significant?

- A. The username is an input to the LEAP challenge/response hash that is exploited, so the username must be known to conduct authentication cracking.
- B. 4-Way Handshake nonces are based on the username in WPA and WPA2 authentication.
- C. The username can be looked up in a dictionary file that lists common username/password combinations.
- D. The username is needed for Personal Access Credential (PAC) and X.509 certificate validation.

Answer: A

Explanation:
In Cisco LEAP (Lightweight EAP), the username is sent in clear text as part of the 802.1X authentication process. LEAP uses a challenge/response authentication mechanism that is susceptible to offline dictionary attacks because the attacker only needs to know the username and capture the challenge/response exchange to perform brute-force guessing of passwords. The username is used in generating the hash for the authentication exchange, making its disclosure critical for an attacker.
Incorrect:
A). PACs are used in EAP-FAST, not LEAP.
C). The 4-Way Handshake nonces are unrelated to the username.
D). While dictionary files may include username/password combos, the cryptographic significance in LEAP is due to the challenge/response mechanism.

NEW QUESTION # 124

......

Firstly, our company always feedbacks our candidates with highly-qualified CWSP-208 study guide and technical excellence and continuously developing the most professional exam materials. Secondly, our CWSP-208 study materials persist in creating a modern service oriented system and strive for providing more preferential activities for your convenience. Last but not least, we have free demos for your reference, as in the following, you can download which CWSP-208 Exam Materials demo you like and make a choice. Therefore, you will love our CWSP-208 study materials!
