SAP Certified Specialist - Project Manager - SAP Activate for Agile Implementation Management Sample Questions (Q11-Q16):

NEW QUESTION # 11

What does a cutover involve? Note: There are 2 correct answers to this question.

- A. Switching productive operations to new system
- B. Completing solution end-user documentation
- C. Presenting completed functionality to key users
- D. Aligning business and technical cutover plans

Answer: A,D

NEW QUESTION # 12

What are the core capabilities in SAP Cloud ALM for operations? Note: There are 3 correct answers to this question.

- A. License management
- B. Upgrade analysis
- C. Monitoring
- D. Event and alert management
- E. Operation automation

Answer: C,D,E

Explanation:

SAP Cloud ALM for operations supports several core capabilities essential for the maintenance and optimal functioning of SAP systems:

* A. Monitoring: This includes comprehensive system monitoring, covering performance metrics, system health, and more, crucial for maintaining the reliability and availability of SAP solutions.

* C. Event and alert management: This capability ensures that any incidents or anomalies within the SAP environment are detected, alerted, and managed efficiently, allowing for quick resolution and minimal disruption.

* D. Operation automation: Automating daily operations tasks is key to reducing manual overhead, increasing efficiency, and ensuring consistency across processes within the SAP environment. Option B (License management) and E (Upgrade analysis) while important, are not listed as part of the core capabilities for SAP Cloud ALM for operations per the usual categorization by SAP.

Answer: A,C

NEW QUESTION # 15

Which of the following belong to the Application Design and Configuration workstream in the Explore phase?

Note: There are 2 correct answers to this question.

- A. Fit-to-standard workshop
- B. Integration prerequisites confirmation
- C. Change Impact Analysis
- D. Configuration definition

Answer: A,D

Explanation:

In the Explore phase, within the Application Design and Configuration workstream, the following activities are performed:

* A. Configuration definition: This involves defining how the SAP system will be configured to meet the business requirements. It includes setting parameters and options within the system to tailor it to the business's needs.

* D. Fit-to-standard workshop: These workshops are a key component of the Explore phase, where business processes are matched with the standard SAP functionality to identify any required configurations or gaps.

Both activities are critical for ensuring that the system is designed and configured accurately to support the business processes effectively. References:

* SAP S/4HANA Cloud setup and configuration

* Explore phase activities in SAP projects
