

New EAEP2201 Exam Bootcamp & EAEP2201 Reliable Torrent

LMSW EXAM – BOOTCAMP 2023 NEW SOLUTION GUIDE QUESTIONS AND ANSWERS GRADED A

3 Areas to identify in each question (PPL) - 1. Problem
2. Person
3. Last Sentence (guide to answer question)

Key words - 1. Person/Client "hot seat"
2. SAFETY Red Flags - suicide, abuse, life-threatening, unexplained marks, alcohol, recent loss
3. Strong words/adjectives
4. Age
5. Diagnosis
6. Symptoms/Duration
7. Who are you?
8. Where are you in session?
9. Quotations
10. Direct requests/concerns
11. Qualifiers (First/Next/Best)

Distractors - FARM GRITS ROAD - Answers that look appealing at first glance but are often wrong - ELIMINATE! Exam is here and now

DO NOT CHOOSE FARM GRITS ROAD - 1. FOCUS on unresolved issues/past
2. ADVICE - giving/judging
3. RECOMMEND "to a support group"
4. MAKE an appt.
5. GIVE pamphlets/literature
6. RECOMMEND a session
7. INFORM parents/speak to parents (when child/ado)
8. TERMINATE (Exceptions: Moving, client reaches goals/no new crisis, client does not pay)
9. SPEAK to supervisor (except transference/counter)
10. RESPECT self-determination (If mentally UNSTABLE)
11. OFFER contract as a reminder
12. ALLOW the clients to lead the session
13. DO nothing/say nothing

How do you answer first/next questions? - 90% of exam is SAFETY FIRST.

P.S. Free & New EAEP2201 dumps are available on Google Drive shared by VCEEngine: https://drive.google.com/open?id=1ZNPP0rN3_P5IEUpV9TeafO89jgt7I7pV

Our EAEP2201 study prep has inspired millions of exam candidates to pursue their dreams and motivated them to learn more high-efficiently. Many customers get manifest improvement. EAEP2201 simulating exam will inspire your potential. And you will be more successful with the help of our EAEP2201 training guide. Just imagine that when you have the certification, you will have a lot of opportunities to come to the bigger companies and get a higher salary.

EAEP2201 test questions have a mock examination system with a timing function, which provides you with the same examination environment as the real exam. Although some of the hard copy materials contain mock examination papers, they do not have the automatic timekeeping system. Therefore, it is difficult for them to bring the students into a real test state. With EAEP2201 Exam Guide, you can perform the same computer operations as the real exam, completely taking you into the state of the actual exam, which will help you to predict the problems that may occur during the exam, and let you familiarize yourself with the exam operation in advance and avoid rushing during exams.

EAEP2201 Exam Questions - Enterprise Administration Professional 2201 Exam Tests & EAEP2201 Test Guide

For Esri EAEP2201 certification test, are you ready? The exam comes in sight, but can you take the test with confidence? If you have not confidence to sail through your exam, here I will recommend the most excellent reference materials for you. The latest EAEP2201 Certification Training dumps that can pass your exam in a short period of studying have appeared. The dumps are provided by VCEEngine.

Passing the EAEP2201 Exam demonstrates that a GIS professional has the skills and knowledge necessary to manage enterprise GIS systems using Esri software. Enterprise Administration Professional 2201 certification can be a valuable asset for GIS professionals who are seeking to advance their careers, as it demonstrates to employers and clients that they have a high level of expertise in their field.

Esri Enterprise Administration Professional 2201 Sample Questions (Q66-Q71):

NEW QUESTION # 66

A GIS contractor is developing and testing an upcoming workflow for a client. The contractor is publishing fictional hydrant locations as a service to be consumed in a custom application. The contractor wants to consume as few resources as possible for the client's ArcGIS Server because they do not have a testing environment.

Which type of service should the contractor publish?

- A. Hosted feature service
- B. Non-hosted feature service
- C. Non-hosted map service
- D. Scene service

Answer: A

Explanation:

The contractor should publish a hosted feature service. Hosted feature services are managed entirely by the ArcGIS Data Store, not by the ArcGIS Server site directly. This means they consume fewer server resources since they are not managed by a dedicated ArcGIS Server site's memory or CPU at runtime the way traditional services are.

From ArcGIS documentation:

"Hosted feature layers (services) are stored in and powered by the ArcGIS Data Store, relieving ArcGIS Server from managing service processes. This is ideal for testing, lightweight apps, or non-production workflows when minimizing load on the GIS Server is desired."

* Option B (Non-hosted map service) would require server-side management and is more resource-intensive.

* Option C (Scene service) is used for 3D visualization and is not appropriate for 2D hydrant location data.

* Option D (Non-hosted feature service) would also consume more ArcGIS Server resources.

Reference: ArcGIS Enterprise - Understanding hosted layers vs. services on GIS Server

NEW QUESTION # 67

A client develops a tiered approach to back up their ArcGIS Enterprise base deployment using the webgisdrtool. The client has no map service or hosted tile layer caches. All spatial data is stored in the ArcGIS Data Store (relational). The client will perform full webgisdr backups every Sunday and incremental webgisdr backups Monday through Saturday. The default settings of an ArcGIS Enterprise deployment must be modified to support this. Which action should the administrator perform?

- A. Increase the heap size of the ArcGIS Data Store to support incremental backups
- B. Decrease the max connections during backups to reduce the number of users connected.
- C. Enable point-in-time recovery on the ArcGIS Data Store to support daily backups

Answer: C

NEW QUESTION # 68

An organization recently upgraded Portal for ArcGIS. The organization must reduce the number of named users to the maximum allowed by the authorization file and delete members in bulk.

Which action should the administrator perform?

- A. Use command line utilities

- B. Batch delete users with ArcPy
- C. Delete users using the Member tab

Answer: A

Explanation:

The most efficient and supported method for managing and removing multiple users after a Portal for ArcGIS upgrade is by using command line utilities, specifically the deleteusers utility included with Portal for ArcGIS. This tool allows administrators to batch delete user accounts by referencing a file that lists usernames. This method is especially useful when needing to quickly reduce the number of named users to comply with licensing restrictions.

Deleting users individually via the Member tab (Option B) is time-consuming and inefficient when dealing with large numbers of accounts. Using ArcPy (Option C) is not supported for managing Portal users in bulk.

NEW QUESTION # 69

An ArcGIS analyst is curating a series of basemaps for field crews editing utility infrastructure in the field.

The analyst must ensure optimal performance.

Which type of service should be published?

- A. Dynamic map service
- B. Vector tile service
- C. Cached map service

Answer: B

Explanation:

For field operations, Vector Tile Services are highly efficient and suitable for basemaps. They offer fast rendering, smaller file sizes, and are easily scalable across various devices, including those with limited bandwidth or processing capabilities. Vector tiles also support dynamic styling and are ideal for offline use, which is often necessary for field crews working in areas with limited connectivity.

Cached map services (Option A) are raster-based and can be larger in size, making them less optimal for mobile use. Dynamic map services (Option C) require real-time data rendering, which can be resource-intensive and may not perform well in field conditions with limited connectivity.

Reference Source: ArcGIS Enterprise documentation on customizing basemaps

NEW QUESTION # 70

A GIS administrator is analyzing the usage statistics of ArcGIS Enterprise. The administrator needs to pull tabular statistics on various groups and users about the type of content that they produce and consume.

Which action should the administrator perform?

- A. Open ArcGIS Server statistics to create a report for commonly used items.
- B. Use ArcGIS Monitor to capture desired information over a period of time in a report.
- C. Run usage reports in Portal for ArcGIS to determine the effect on the organization.

Answer: C

Explanation:

Portal for ArcGIS provides built-in usage reports that allow administrators to monitor how members are using, sharing, and contributing resources. These reports offer insights into content creation, usage patterns, and group activities. Administrators can generate and export these reports in tabular formats for further analysis.

ArcGIS Server statistics focus on service-level metrics and do not provide detailed user or group content statistics. ArcGIS Monitor captures system performance metrics but is not designed for detailed content usage analysis by users or groups.

NEW QUESTION # 71

.....

Knowledge makes prominent contributions to human civilization and progress. In the 21st century, the rate of unemployment is

increasing greatly. Many jobs are replaced by intelligent machines. You must learn practical knowledge such as our EAEP2201 actual test guide, which cannot be substituted by artificial intelligence. Now, our EAEP2201 learning prep can meet your demands. You will absorb the most useful knowledge with the assistance of our study materials. The EAEP2201 certificate is valuable in the job market. But you need professional guidance to pass the exam. For instance, our EAEP2201 exam questions fully accords with your requirements.
