A Enterprise Administration Professional 2201 (EAEP2201) practice questions is a helpful, proven strategy to crack the Enterprise Administration Professional 2201 (EAEP2201) exam successfully. It helps candidates to know their weaknesses and overall performance. BootcampPDF software has hundreds of Enterprise Administration Professional 2201 (EAEP2201) exam dumps that are useful to practice in real-time. The Enterprise Administration Professional 2201 (EAEP2201) practice questions have a close resemblance with the actual Enterprise Administration Professional 2201 (EAEP2201) exam.

Esri EAEP2201 Certification Exam is a comprehensive exam that covers a wide range of topics related to the administration of enterprise GIS systems. EAEP2201 exam covers topics such as enterprise geodatabase design, administration and maintenance, web GIS deployment and management, server and portal administration, and security management. EAEP2201 exam also includes questions related to best practices for managing enterprise GIS systems, as well as troubleshooting and performance tuning.

Esri EAEP2201 (Enterprise Administration Professional 2201) Certification Exam is a professional certification that is designed to validate the knowledge and skills of individuals who are responsible for the administration of Esri's ArcGIS Enterprise software. Enterprise Administration Professional 2201 certification exam tests the knowledge and skills required to manage an ArcGIS Enterprise deployment, including the installation, configuration, and maintenance of the software.

Esri EAEP2201 Certification is recognized globally and is highly valued by employers in the GIS industry. It demonstrates that an individual has the skills and knowledge required to effectively manage GIS systems in an enterprise environment. Certified professionals are in high demand and are offered lucrative job opportunities. Enterprise Administration Professional 2201 certification exam is an investment in an individual's career that can lead to higher salaries, job security, and career advancement.

Explore the Benefits and Esri EAEP2201 Exam Preparation Strategies

You can use your smart phones, laptops, the tablet computers or other equipment to download and learn our EAEP2201 learning dump. Moreover, our customer service team will reply the clients' questions patiently and in detail at any time and the clients can contact the online customer service even in the midnight. The clients at home and abroad can purchase our EAEP2201 Certification Questions online. Our service covers all around the world and the clients can receive our EAEP2201 study practice guide as quickly as possible.

Esri Enterprise Administration Professional 2201 Sample Questions (Q18-Q23):

NEW QUESTION # 18

An organization recently upgraded Portal for ArcGIS. The organization must reduce the number of named users to the maximum allowed by the authorization file and delete members in bulk.

Which action should the administrator perform?

- A. Delete users using the Member tab
- **B. Batch delete users with ArcPy**
- C. Use command line utilities

Answer: B

NEW QUESTION # 19

An ArcGIS analyst is curating a series of basemaps for field crews editing utility infrastructure in the field.

The analyst must ensure optimal performance.

Which type of service should be published?

- **A. Vector tile service**
- B. Dynamic map service
- C. Cached map service

Answer: A

Explanation:

For field operations, Vector Tile Services are highly efficient and suitable for basemaps. They offer fast rendering, smaller file sizes, and are easily scalable across various devices, including those with limited bandwidth or processing capabilities. Vector tiles also support dynamic styling and are ideal for offline use, which is often necessary for field crews working in areas with limited connectivity.

Cached map services (Option A) are raster-based and can be larger in size, making them less optimal for mobile use. Dynamic map services (Option C) require real-time data rendering, which can be resource-intensive and may not perform well in field conditions with limited connectivity.

Reference Source: ArcGIS Enterprise documentation on customizing basemaps

NEW QUESTION # 20

Users are reporting service timeouts and performance issues. The administrator notices that only the minimum number of instances are running during performance spikes. They want to monitor usage trends before adjusting instance settings.

Which action should the administrator perform?

- **A. Create a report of server statistics in ArcGIS Server Manager**
- B. Monitor Task Manager on each ArcGIS Server machine
- C. Enable Windows Performance Monitor
- D. Change the log level to Debug in ArcGIS Server Manager

Answer: A

Explanation:

To monitor usage patterns, including the number of requests and instances in use, ArcGIS Server provides statistics reports in Server Manager. These reports show peak and average service usage, helping administrators decide how to scale service instance counts.

From ArcGIS Server documentation:

"Use the ArcGIS Server Manager statistics reporting tool to monitor service usage trends over time. This data helps inform adjustments to instance counts."

* Option A gives only raw system metrics, not service-specific insights.

* Option B (Debug logs) causes overhead and isn't appropriate for monitoring trends.

Reference: ArcGIS Server - Monitoring and Reporting Service Usage Statistics

NEW QUESTION # 21

After upgrading, a GIS administrator tries to log in to Portal for ArcGIS using admin credentials. The portal site doesn't display correctly and an error is shown. Login fails.

What should the administrator do?

- **A. Clear the browser's cache**
- B. Reinstall the ArcGIS Web Adaptor
- C. Roll back the upgrade
- D. Run portalscan.py

Answer: A

Explanation:

After an upgrade, Portal for ArcGIS often changes web elements, scripts, and cached content. If the browser is using old cached files, the portal page may not render correctly, and authentication may fail. Clearing the browser cache ensures that new files are loaded.

From Esri documentation:

"After upgrading ArcGIS Enterprise, clear the browser's cache to ensure that all updated components and scripts are loaded properly."

* Option A is a diagnostic tool, not a fix.

* Option B may be excessive if the issue is simply browser cache.

* Option D is not a standard troubleshooting step.

Reference: ArcGIS Enterprise - Post-Upgrade Troubleshooting and Web Adaptor Behavior

NEW QUESTION # 22

A GIS administrator must determine which type of service to use when publishing a new basemap for the organization. The basemap must meet several requirements:

- * Support offline workflows
 - * Use as little storage space as possible
 - * High-resolution display
 - * Easily incorporate data updates periodically made to a feature service
- Which service type should be used?

- **A. Vector tile service**
- B. Dynamic map service
- C. Cached map service

Answer: A

Explanation:

Vector tile services are optimized for high-resolution display and efficient storage, making them ideal for offline workflows. They allow for smaller file sizes compared to raster tiles and support dynamic styling.

Additionally, vector tile services can be updated by regenerating tiles from updated feature services, facilitating easy incorporation of data updates.

NEW QUESTION # 23

.....

For candidates who are searching for EAEP2201 training materials for the exam, the quality of the EAEP2201 exam dumps must be your first concern. Our EAEP2201 exam materials can reach this requirement. With a professional team to collect the first-hand information of the exam, we can ensure you that the EAEP2201 Exam Dumps you receive are the latest information for the exam. Moreover, we also pass guarantee and money back guarantee, if you fail to pass the exam, we will refund your money, and no other questions will be asked.
