- b) Estimate the probability of occurrence of each threat
- c) Assess the internal and external resources available to mitigate the identified threats

- A. b, c, d, a
- B. c, a, d, b

- **C. d, b, a, c**
- D. b, d, c, a

**Answer: C**

Explanation:

A vulnerability assessment follows a logical sequence:

- \* d) List the threats that may occur- Identify potential threats first.
- \* b) Estimate the probability of occurrence of each threat- Assess likelihood next.
- \* a) Assess the potential impact of the threat on the organization- Evaluate impact after probability.
- \* c) Assess the internal and external resources available to mitigate the identified threats- Finally, review mitigation resources. This order (d, b, a, c) ensures threats are identified before analyzing their likelihood, impact, and mitigation, aligning with standard risk assessment practices.
- \* Option A (c, a, d, b): Starts with resources, illogical without threats.
- \* Option C (b, d, c, a): Probability before listing threats is premature.
- \* Option D (b, c, d, a): Probability and resources before threats is out of sequence.
- \* "Vulnerability assessment begins with listing threats, followed by estimating probability, assessing impact, and evaluating mitigation resources in that order (d, b, a, c)" (Module: Risk Management, Section: Vulnerability Assessment Steps).
