

New Exam 1Z0-1163-1 Braindumps - Valid 1Z0-1163-1 Study Notes

We know deeply that a reliable 1Z0-1163-1 exam material is our company's foothold in this competitive market. High accuracy and high quality are the most important things we always looking for. We understand our candidates have no time to waste, everyone wants an efficient learning. So we take this factor into consideration, develop the most efficient way for you to prepare for the 1Z0-1163-1 exam, that is the real questions and answers practice mode, firstly, it simulates the real Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 test environment perfectly, which offers greatly help to our customers. Secondly, it includes printable PDF Format, also the instant access to download make sure you can study anywhere and anytime. All in all, high efficiency of 1Z0-1163-1 Exam Material is the reason for your selection.

Oracle 1Z0-1163-1 Exam Syllabus Topics:

Topic	Details
Topic 1	• OMBPs for Procurement: This section tests the abilities of Procurement Specialists in managing procurement operations within Oracle Cloud Applications. It covers the flow of procurement processes, integration points with other SCM modules, and best practices for improving procurement efficiency. Candidates will gain insights into the key metrics used to evaluate procurement performance and cost-effectiveness.
Topic 2	• Oracle Cloud Applications and Oracle Modern Best Practice (OMBP): This section of the exam measures the skills of Cloud Application Consultants in understanding Oracle Cloud Applications and their capabilities. It covers the key offerings within the Oracle Cloud ecosystem and highlights the features of the Oracle SCM suite. Candidates will learn about data flow between the SCM OMBPs and how these processes optimize supply chain management.
Topic 3	• OMBPs for Logistics: This section tests the expertise of Logistics Coordinators in optimizing logistics and transportation management within Oracle Cloud Applications. It covers the process flows, best practices for logistics operations, and integration of different logistics modules. Candidates will understand performance metrics that impact supply chain visibility, efficiency, and customer satisfaction.
Topic 4	• OMBPs for Manufacturing: This section measures the skills of Manufacturing Operations Managers in utilizing Oracle Cloud's manufacturing capabilities. It explains the flow of manufacturing processes, module integration, and best practices that enhance operational efficiency. Candidates will analyze metrics that assess productivity, cost control, and overall manufacturing performance.

Valid 1Z0-1163-1 Study Notes & Test 1Z0-1163-1 Pdf

If you have BraindumpsPrep's Oracle 1Z0-1163-1 exam training materials, we will provide you with one-year free update. This means that you can always get the latest exam information. As long as the Exam Objectives have changed, or our learning material changes, we will update for you in the first time. We know your needs, and we will help you gain confidence to pass the Oracle 1Z0-1163-1 Exam. You can be confident to take the exam and pass the exam.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q46-Q51):

NEW QUESTION # 46

What is the primary function of Receipt Accounting in Oracle Fusion Cloud SCM?

- A. It records the receipt of goods and services, creating accounting entries for financial reporting.
- B. It ensures supplier invoices are paid on time.
- C. It eliminates the need for cost accounting.
- D. It validates contract terms for procurement.

Answer: A

Explanation:

Receipt Accounting (D) in Oracle Fusion Cloud SCM records the receipt of goods and services, generating accounting entries that reflect these transactions for financial reporting and cost tracking. When a shipment of 500 units arrives, Receipt Accounting logs the event, assigns costs (e.g., \$5,000), and creates entries like "Inventory Debit" and "Accounts Payable Credit," ensuring financial accuracy. Option A is incorrect-timely invoice payment is a downstream accounts payable process, not Receipt Accounting's role. Option B is false-contract validation occurs in procurement, not here. Option C is wrong-Receipt Accounting feeds into Cost Accounting, enhancing, not eliminating it. This function ensures compliance with accounting standards, provides visibility into goods received, and supports accurate financial statements, bridging physical and financial supply chain activities.

NEW QUESTION # 47

Which process in Oracle Fusion Cloud SCM ensures that inventory levels are maintained efficiently?

- A. Manufacturing Execution.
- B. Replenishment Planning.
- C. Supplier Qualification.
- D. Cost Accounting.

Answer: B

Explanation:

Replenishment Planning (D) in Oracle Fusion Cloud SCM ensures inventory levels are maintained efficiently by predicting demand and adjusting supply plans to replenish stock proactively. It uses forecasts and safety stock rules-e.g., ordering 300 units when stock falls to 50 and demand is expected to rise-to prevent shortages or excess inventory. Option A (Supplier Qualification) focuses on supplier evaluation, not inventory maintenance. Option B (Cost Accounting) tracks financials, not stock levels. Option C (Manufacturing Execution) manages production, not replenishment. Replenishment Planning optimizes inventory turnover, reduces carrying costs, and ensures product availability, making it a proactive inventory management tool.

NEW QUESTION # 48

Which feature in Oracle Fusion Cloud SCM tracks and manages real-time production processes?

- A. Inventory Management.
- B. Supplier Qualification.
- C. Manufacturing Execution.
- D. Cost Accounting.

Answer: C

Explanation:

Manufacturing Execution (C) in Oracle Fusion Cloud SCM tracks and manages real-time production processes on the shop floor, capturing data like work order progress, material usage, and labor hours. For example, if a worker completes 100 units, the system logs the time, resources consumed (e.g., 50 kg of steel), and any delays (e.g., machine downtime), providing live visibility. Option A

(Supplier Qualification) evaluates suppliers, not production. Option B (Cost Accounting) analyzes costs post-production, not real-time processes. Option D (Inventory Management) tracks stock, not manufacturing activities. This feature ensures production aligns with schedules, identifies bottlenecks instantly, and feeds data into cost and quality systems, enhancing operational control.

NEW QUESTION # 49

Which feature in Oracle Fusion Cloud SCM ensures that supply planning recommendations reflect the latest supplier information?

- A. Increasing reorder points in inventory management.
- B. Implementing manual verification of supplier information.
- C. Using separate forecasting models for procurement and supply chain planning.
- D. Real-time Supplier Collaboration.

Answer: D

Explanation:

Real-time Supplier Collaboration (C) in Oracle Fusion Cloud SCM ensures supply planning reflects the latest supplier information by integrating live data-e.g., lead times, inventory availability-via tools like the Supplier Portal. If a supplier updates a lead time from 5 to 7 days, planning adjusts instantly. Option A (increasing reorder points) is a static fix, not real-time. Option B (manual verification) contradicts automation goals. Option D (separate models) fragments planning, reducing accuracy. For example, real-time updates might prevent a stockout by rescheduling a delayed shipment, enhancing agility and precision in supply plans.

NEW QUESTION # 50

What is the primary purpose of the Supply Chain Orchestration process in Oracle Fusion Cloud SCM?

- A. It automates the execution of supply chain tasks across different applications.
- B. It eliminates the need for supplier collaboration.
- C. It provides a manual approach to tracking supply chain transactions.
- D. It only manages warehouse operations without linking to procurement or manufacturing.

Answer: A

Explanation:

The Supply Chain Orchestration process (C) in Oracle Fusion Cloud SCM automates the execution of supply chain tasks across applications like procurement, manufacturing, and inventory management. It coordinates activities-e.g., triggering a PO when inventory is low or scheduling production after an order-ensuring seamless integration. Option A is false-supplier collaboration is often required. Option B is incorrect-it links all supply chain areas, not just warehouses. Option D is wrong-automation replaces manual tracking. For example, if a customer order requires 200 units, Orchestration aligns procurement and production automatically, reducing delays and errors, and enhancing end-to-end visibility.

NEW QUESTION # 51

.....

It is our company that can provide you with special and individual service which includes our 1Z0-1163-1 preparation quiz and good after-sale services. Our experts will check whether there is an update on the question bank every day, so you needn't worry about the accuracy of 1Z0-1163-1 study materials. If there is an update system, we will send them to the customer automatically. As is known to all, our 1Z0-1163-1 simulating materials are high pass-rate in this field, that's why we are so famous. If you are still hesitating, our products should be wise choice for you.
