

New GitHub-Advanced-Security Cram Materials & New GitHub-Advanced-Security Exam Test

What's more, part of that PrepPDF GitHub-Advanced-Security dumps now are free: <https://drive.google.com/open?id=18fSJG7wKVXqyDLYFQFdXAA2RQGgK6bBf>

The valid GitHub Advanced Security GHAS Exam (GitHub-Advanced-Security) practice tests are available in GitHub-Advanced-Security pdf format which works on all smart devices. When you have all the actual GitHub-Advanced-Security questions in a pdf document, it will be easy for you to prepare successfully for the GitHub-Advanced-Security test in a short time. Practice makes a man perfect and we can apply the same thing here.

What do you think of using PrepPDF GitHub GitHub-Advanced-Security Exam Dumps? PrepPDF GitHub GitHub-Advanced-Security certification training dumps, it may be said, is the most excellent reference materials among all exam-related reference materials. Why? There are four reasons in the following. Firstly, PrepPDF exam dumps are researched by IT experts who used their experience for years and can figure out accurately the scope of the examinations. Secondly, PrepPDF exam dumps conclude all questions that can appear in the real exam. Thirdly, PrepPDF exam dumps ensures the candidate will pass their exam at the first attempt. If the candidate fails the exam, PrepPDF will give him FULL REFUND. Fourthly, PrepPDF exam dumps have two versions: PDF and SOFT version. With the two versions, the candidates can pass their exam with ease.

New GitHub GitHub-Advanced-Security Exam Test - Test GitHub-Advanced-Security Valid

One of the key factors for passing the exam is practice. Candidates must use GitHub-Advanced-Security practice test material to be able to perform at their best on the real exam. This is why PrepPDF has developed three formats to assist candidates in their GitHub GitHub-Advanced-Security Preparation. These formats include desktop-based GitHub GitHub-Advanced-Security practice test software, web-based practice test, and a PDF format.

GitHub Advanced Security GHAS Exam Sample Questions (Q36-Q41):

NEW QUESTION # 36

What happens when you enable secret scanning on a private repository?

- **A. GitHub performs a read-only analysis on the repository.**
- B. Dependency review, secret scanning, and code scanning are enabled.
- C. Your team is subscribed to security alerts.
- D. Repository administrators can view Dependabot alerts.

Answer: A

Explanation:

When secret scanning is enabled on a private repository, GitHub performs a read-only analysis of the repository's contents. This includes the entire Git history and files to identify strings that match known secret patterns or custom-defined patterns.

GitHub does not alter the repository, and enabling secret scanning does not automatically enable code scanning or dependency review - each must be configured separately.

NEW QUESTION # 37

Which key is required in the update settings of the Dependabot configuration file?

- A. rebase-strategy
- B. assignees
- C. commit-message
- **D. package-ecosystem**

Answer: D

Explanation:

In a dependabot.yml configuration file, package-ecosystem is a required key. It defines the package manager being used in that update configuration (e.g., npm, pip, maven, etc.).

Without this key, Dependabot cannot determine how to analyze or update dependencies. Other keys like rebase-strategy or commit-message are optional and used for customizing behavior.

NEW QUESTION # 38

A secret scanning alert should be closed as "used in tests" when a secret is:

- **A. Solely used for tests.**
- B. In the readme.md file.
- C. In a test file.
- D. Not a secret in the production environment.

Answer: A

Explanation:

If a secret is intentionally used in a test environment and poses no real-world security risk, you may close the alert with the reason "used in tests". This helps reduce noise and clarify that the alert was reviewed and accepted as non-critical.

Just being in a test file isn't enough unless its purpose is purely for testing.

NEW QUESTION # 39

What step is required to run a SARIF-compatible (Static Analysis Results Interchange Format) tool on GitHub Actions?

- A. The CodeQL action uploads the SARIF file automatically when it completes analysis.
- B. By default, the CodeQL runner automatically uploads results to GitHub on completion.
- C. Use the CLI to upload results to GitHub.
- **D. Update the workflow to include a final step that uploads the results.**

Answer: D

Explanation:

When using a SARIF-compatible tool within GitHub Actions, it's necessary to explicitly add a step in your workflow to upload the

analysis results. This is typically done using the upload-sarif action, which takes the SARIF file generated by your tool and uploads it to GitHub for processing and display in the Security tab.
Without this step, the results won't be available in GitHub's code scanning interface.

NEW QUESTION # 40

As a repository owner, you want to receive specific notifications, including security alerts, for an individual repository. Which repository notification setting should you use?

- A. All Activity
- B. Participating and @mentions
- C. Ignore
- D. Custom

Answer: D

Explanation:

Using the Custom setting allows you to subscribe to specific event types, such as Dependabot alerts or vulnerability notifications, without being overwhelmed by all repository activity. This is essential for repository maintainers who need fine-grained control over what kinds of events trigger notifications.

This setting is configurable per repository and allows users to stay aware of critical issues while minimizing notification noise.

NEW QUESTION # 41

.....

If you don't have enough time to study for your GitHub GitHub Advanced Security GHAS Exam exam, PrepPDF provides GitHub GitHub-Advanced-Security Pdf questions. You may quickly download GitHub GitHub-Advanced-Security exam questions in PDF format on your smartphone, tablet, or desktop. You can Print GitHub GitHub-Advanced-Security pdf questions and answers on paper and make them portable so you can study on your own time and carry them wherever you go. GitHub evolves swiftly, and a practice test may become obsolete within weeks of its publication. We provide free updates for GitHub GitHub-Advanced-Security Exam Questions for three months after the purchase to ensure you are studying the most recent GitHub solutions.
