PCCP vs PVC Pipe Comparison

First used in the early 1940's, Prestressed Concrete Cylinder Pipe (PCCP) combines a water tight steel cylinder with structural concrete and high tensile steel wire to produce a high-performance pipe suitable for a wide range of water conveyance applications, such as transmission mains, force mains, reclaimed water, industrial, intake and discharge pipelines. PCCP is used in buried applications, as well as above ground and subaqueous lines. It's cement-rich mortar coating electrochemically protects the steel components from corrosion. Being a rigid pipe, PCCP has a high load carrying capability and can generally be installed without special bedding or backfill procedures.

This document is a comparison between PCCP and PVC pipe utilizing information available from industry standards and resources. It is intended to differentiate key performance attributes of the materials to assist specifiers in product selection for water and wastewater pipelines.

ITEM	PCCP	PVC
Pipe Standards	• AWWA C301 - Prestressed Concrete Pressure Pipe, Steel-Cylinder Type • AWWA C304 - Design of Prestressed Concrete Cylinder Pipe • AWWA M9 - Concrete Pressure Pipe	• AWWA C900 • AWWA M23 manual • AWWA C905-10 is now obsolete
Pressures and Diameter Range	Typical diameters range from 16" through 144", but 156" has been produced. Prestressed concrete cylinder pipe has been designed for operating pressures greater than 400 psi.	Maximum pressures by diameter: • Up to 36" (750mm) - 235-psi • 36" (900mm) - 200 psi • 42" and 48" (1050mm and 1200mm) - 165 psi • 54" and 60" (1350mm and 1500mm) - 50 psi
Negative Pressures	No special design considerations required for full vacuum or external pressure.	Susceptible to collapsing and joint performance issues from surge waves and partial vacuum.
Pipe Design	• Manufacturers provide project specific lay schedule, pipe design and engineered shop drawings. • Project design consultant verifies manufacturer's design.	• Manufacturers do not provide project specific lay schedule, pipe design or shop drawings.
Pipe Strength/Stiffness	Designed as a rigid pipe which allows the use native material for embedment providing significant installation savings.	• Flexible pipe design with pipe deflection limitations. • Pipe stiffness declines as dimension ratio (DR) increases.
Pressure Tapping	Procedure has more predictable behavior.	Potential risk of pipe failure during the tapping process.
Fittings	• Custom fittings configuration and geometry to match customer needs. • Adaptability to all pipe types • Produced domestically by pipe manufacturers.	• Uses Ductile Iron Pipe fittings with external corrosion protection. • Typically imported • Limited configuration options • Long lead times • Availability of larger diameter fittings is limited
Bedding and Backfill Requirements	Rigid pipe with no limitation on burial depth. Pipe is designed to handle burial depth. Manual bedding is required, and native soil can be used as bedding material.	• More oversight of bedding material required • Significantly more backfill, compaction and oversight required • Installation recommendations conflict with OSHA trench box requirements¹
Restrained Joints	Mechanical restraint options utilizing Snap-Ring, Bolted and Wares. Clamp Restraints for pressure and diameter ranges.	• Mechanical restraint options provided by third party • Pressure and Diameter range limitations based on type of restraint

When it comes to PCCP exam, many candidates lack confidence to pass it. But we all know self-confidence is the spiritual pillar of a person as well as the inherent power, which is of great importance and value to a person who wants to pass the PCCP exam. Our material includes free Demo, you can go for free of the PCCP Materials and make sure that the quality of our questions and answers serve you the best. You are not required to pay any amount or getting registered with us for downloading free PCCP materials. You can improve your confidence in the exam by learning about real exams through our free demo.

The Palo Alto Networks Certified Cybersecurity Practitioner (PCCP) certification is a requirement if you want to succeed in the Palo Alto Networks industry quickly. But after deciding to take the PCCP exam, the next challenge you face is the inability to find genuine PCCP Questions for quick preparation. People who don't study with PCCP real dumps fail the test and lose their precious resources.

The high efficiency method is targeted learning rather than comprehensive learning. Comprehensive learning can improve your basic knowledge but it is not the best to clear exams and obtain certifications. Our valid Palo Alto Networks PCCP exam cram review can help you pass this subject in a short time. If your goal is passing all exams and obtaining a useful certification. The best shortcut is to buy Valid PCCP Exam Cram Review. Most experienced people can prove that. Good products are here waiting for you.

Palo Alto Networks Certified Cybersecurity Practitioner Sample Questions

(Q35-Q40):

NEW QUESTION # 35

What would allow a security team to inspect TLS encapsulated traffic?

- A. Traffic shaping
- B. DHCP markings
- C. Port translation
- D. Decryption

Answer: D

Explanation:

Decryption is required to inspect TLS-encrypted traffic, allowing security tools (such as firewalls or intrusion prevention systems) to analyze the contents of the traffic for threats that would otherwise remain hidden within encrypted sessions.

NEW QUESTION # 36

Which component of cloud security uses automated testing with static application security testing (SAST) to identify potential threats?

- A. API
- B. IRP
- C. Virtualization
- D. Code security

Answer: D

Explanation:

Code security in cloud environments involves using tools like Static Application Security Testing (SAST) to automatically analyze source code for vulnerabilities before deployment. This helps identify and remediate potential threats early in the software development lifecycle.

NEW QUESTION # 37

Which MITRE ATT&CK tactic grants increased permissions to a user account for internal servers of a corporate network?

- A. Data exfiltration
- B. Impact
- C. Persistence
- D. Privilege escalation

Answer: D

Explanation:

The Privilege Escalation tactic in the MITRE ATT&CK framework involves techniques used by attackers to gain higher-level permissions on a system or network, allowing greater access to internal servers and sensitive data.

NEW QUESTION # 38

What are two functions of User and Entity Behavior Analytics (UEBA) data in Prisma Cloud CSPM? (Choose two.)

- A. Unifying cloud provider services
- B. Detecting and correlating anomalies
- C. Assessing severity levels
- D. Identifying misconfigurations

Answer: B,C

Explanation:

Assessing severity levels - UEBA data helps prioritize incidents by evaluating the risk and severity based on user and entity behavior.

Detecting and correlating anomalies - UEBA continuously analyzes activity to identify abnormal behavior and correlate anomalies that may indicate insider threats or compromised accounts.

NEW QUESTION # 39

What is the function of an endpoint detection and response (EDR) tool?

- A. To ingest alert data from network devices
- **B. To monitor activities and behaviors for investigation of security incidents on user devices**
- C. To integrate data from different products in order to provide a holistic view of security posture
- D. To provide organizations with expertise for monitoring network devices

Answer: B

Explanation:

Endpoint Detection and Response (EDR) tools monitor, record, and analyze endpoint activity to detect suspicious behavior, investigate incidents, and respond to threats on user devices such as laptops and desktops.

NEW QUESTION # 40

.....

With the development of technology, our PCCP training engine will be updated regularly. Actually, we never stop researching the new functions of the study materials. Normally, we will release our new version of the PCCP exam simulation on our website once it passed the tests. Many details will be perfected in the new version of our PCCP Study Materials not only on the content, but also on the displays. And we have been in this career for over ten years, our PCCP learning guide is perfect.
