P.S. Free & New H12-821_V1.0 dumps are available on Google Drive shared by ValidExam: <https://drive.google.com/open?id=1NmQZkE8N2d-eyOOctJhp-PBcuSiTkfWw>

We are popular not only because our outstanding H12-821_V1.0 practice dumps, but also for our well-praised after-sales service. After purchasing our H12-821_V1.0 practice materials, the free updates will be sent to your mailbox for one year long if our experts make any of our H12-821_V1.0 Guide materials. They are also easily understood by exam candidates. Our H12-821_V1.0 actual exam can secedes you from tremendous materials with least time and quickest pace based on your own drive and practice to win.

Huawei H12-821_V1.0 exam is designed to test the knowledge and skills of candidates in the field of data communication. HCIP-Datacom-Core Technology V1.0 certification exam is part of the Huawei Certified ICT Professional (HCIP) program and is aimed at professionals who want to enhance their knowledge and expertise in the area of data communication.

Huawei H12-821_V1.0 exam is a computer-based exam that consists of 60 questions. The candidates are given 90 minutes to complete the exam. H12-821_V1.0 exam includes multiple-choice questions, fill in the blanks, and drag-and-drop questions. The passing score for H12-821_V1.0 exam is 60 percent, and the result is immediately displayed upon completion of the exam. H12-821_V1.0 Exam Fee varies depending on the region, and candidates can register for the exam online through Huawei's website.

The HCIP-Datacom-Core Technology V1.0 certification is particularly important for professionals who work in the field of data communication and networking. The HCIP-Datacom-Core Technology V1.0 certification is designed to enhance the skills and knowledge of network engineers, network administrators, and network technicians. HCIP-Datacom-Core Technology V1.0 certification can help professionals advance their careers and increase their earning potential.

Helpful Features of H12-821_V1.0 PDF Questions

Our reliable H12-821_V1.0 question dumps are developed by our experts who have rich experience in the fields. Constant updating of the H12-821_V1.0 prep guide keeps the high accuracy of exam questions thus will help you get use the H12-821_V1.0 Exam quickly. During the exam, you would be familiar with the questions, which you have practiced in our H12-821_V1.0 question dumps. That's the reason why most of our customers always pass exam easily.

Huawei HCIP-Datacom-Core Technology V1.0 Sample Questions (Q335-Q340):

NEW QUESTION # 335

ACL command `acl [number] acl-number [match-order {auto|config}]`, where `acl-number` is used to specify the number of the

access control list, and the value range of acl-number of the basic access control list is ().

- A. 3000~3999
- B. 0~1000
- C. 2000~2999
- D. 1000~3999

Answer: C

NEW QUESTION # 336

Please pair the following functions with the basic concepts in the VRRP protocol.

MAC address generated based on virtual router ID		Vrp router
ID of the virtual router		Master router
IP address of the virtual router		Backup router
The device whose virtual router if address is used as the real interface address		VRID
running the VR RP protocol		Virtual IP address
The default gateway of the host in the shared LAN		IP address owner
VRRP device responsible for forwarding packets		virtual MAC address
of VRRP devices that do not undertake forwarding tasks		virtual router

Answer:

Explanation:

MAC address generated based on virtual router ID	running the VR RP protocol	Vrp router
ID of the virtual router	VRRP device responsible for forwarding packets	Master router
IP address of the virtual router	of VRRP devices that do not undertake forwarding tasks	Backup router
The device whose virtual router if address is used as the real interface address	ID of the virtual router	VRID
running the VR RP protocol	IP address of the virtual router	Virtual IP address
The default gateway of the host in the shared LAN	The device whose virtual router if address is used as the real interface address	IP address owner
VRRP device responsible for forwarding packets	MAC address generated based on virtual router ID	virtual MAC address
of VRRP devices that do not undertake forwarding tasks	The default gateway of the host in the shared LAN	virtual router

NEW QUESTION # 337

BFD itself does not have a neighbor discovery mechanism, but relies on the upper-layer application being served to notify its neighbor information to establish a session.

- A. TRUE
- B. FALSE

Answer: A

NEW QUESTION # 338

On an OSPF or IS-IS network, the filter-policy import command can be run on a router to filter out the LSAs forwarded by its neighbors.

- A. TRUE
- B. FALSE

Answer: B

Explanation:

Comprehensive and Detailed Step-by-Step Explanation:

1. Understanding LSA Filtering in OSPF and IS-IS:

* The filter-policy command is used in OSPF and IS-IS to control which routing information is imported into the local routing table or advertised to other neighbors.

* However, it cannot filter LSAs forwarded by neighbors. In OSPF and IS-IS, LSAs are always forwarded unchanged within the area to ensure all routers have a consistent link-state database.

* Filtering only affects the routes that are installed into the local routing table or advertised to other areas or neighbors.

2. Why the Statement is False:

* LSAs are forwarded without being filtered. This ensures link-state protocols maintain the same network topology view across the network.

* The filter-policy import command only controls routes that are installed into the local routing table, not the forwarding of LSAs.

3. Summary:

* The statement is FALSE because LSAs cannot be filtered by filter-policy import.

NEW QUESTION # 339

A certain router outputs the following information, which of the following statements is correct? (Multiple choice)

```
<R1>display ospf interface Gigabitethernet 0/0/0
```

```
OSPF Process 1 with Router ID 10.1.1.1
```

```
Interface: 10.0. 12.1Gigabitethernet 0/0/0
```

```
Cost: 1 State: DR Type: Broadcast MTU: 1500
```

```
Priority: 1
```

```
Designated Router: 10.0. 12.1
```

```
Backup Designated Router: 10.0.12.2
```

```
Timers: Hello 10Dead 40Poll 120Retransmit 5Transmit Delay 1
```

- A. The Router-ID of this router is 10.1.1.1
- B. This router is the DR
- C. The network type of this interface is broadcast
- D. The interface address of this router is 10.1.12.1

Answer: A,B,C

NEW QUESTION # 340

.....

With our H12-821_V1.0 exam questions, the most important and the most effective reward is that you can pass the exam and get the H12-821_V1.0 certification. And it is also what all of the candidates care about. At the same time, you can also get some more

practical skills. Your work efficiency will increase and your life will be more capable. Our H12-821_V1.0 Guide questions are such a very versatile product to change your life and make you become better.
