New H12-891_V1.0 Practice Materials & Practice H12-891_V1.0 Test Online

Just like the old saying goes: "Practice is the only standard to testify truth", which means learning of theory ultimately serves practical application, in the same way, it is a matter of common sense that pass rate of a kind of H12-891_V1.0 exam torrent is the only standard to testify weather it is effective and useful. I believe that you already have a general idea about the advantages of our HCIE-Datacom V1.0 exam question, but now I would like to show you the greatest strength of our H12-891_V1.0 Guide Torrent --the highest pass rate. According to the statistics, the pass rate among our customers who prepared the exam under the guidance of our H12-891_V1.0 guide torrent has reached as high as 98% to 100% with only practicing our H12-891_V1.0 exam torrent for 20 to 30 hours.

Nowadays certificates are more and more important for our job-hunters because they can prove that you are skillful to do the jobs in the certain areas and you boost excellent working abilities. Passing the test of H12-891_V1.0 certification can help you find a better job and get a higher salary. With this target, we will provide the best H12-891_V1.0 Exam Torrent to the client and help the client pass the exam easily if you buy our product.

Practice H12-891_V1.0 Test Online - Valid H12-891_V1.0 Test Pattern

The Prep4sureGuide is a leading platform that has been assisting the Huawei H12-891_V1.0 exam candidates for many years. Over this long time period countless H12-891_V1.0 exam candidates have passed their Huawei H12-891_V1.0 Exam. They got success in HCIE-Datacom V1.0 exam with flying colors and did a job in top world companies.

Huawei HCIE-Datacom V1.0 Sample Questions (Q98-Q103):

NEW QUESTION # 98
An LSR supports various label retention modes. Which of the following statements regarding the liberal mode are correct?

- A. An LSR retains labels from a neighboring LSR only when the neighbor is its next hop.
- B. Liberal mode allows the device to retain labels from all LSRs, not just the next hop.
- C. An LSR reserves all labels distributed by its neighbor.
- D. This label retention mode saves the memory and label space.

Answer: B,C

Explanation:
Comprehensive and Detailed In-Depth Explanation:
In MPLS (Multi-Protocol Label Switching), the label retention mode determines how an LSR (Label Switching Router) handles labels received from its neighbors:
Liberal Mode:
An LSR retains all labels distributed by its neighbors, not just the labels from the next-hop LSR.
This approach ensures faster convergence because the LSR does not need to request new labels if the next hop changes.
It does not save memory or label space, as it stores more labels than strictly necessary.
Conservative Mode:
An LSR only retains labels from its next-hop neighbors, saving memory and label space.
Statements C and D are correct because they accurately describe liberal mode.
Statements A and B are incorrect because they describe conservative mode.

NEW QUESTION # 99
Portal authentication is recommended for scenarios with high mobility and numerous terminal types, such as shopping malls and supermarkets. MAC address authentication is recommended for dumb terminals that do not support Portal authentication, such as printers, fax machines, and IP phones.

- A. TRUE
- B. FALSE

Answer: A

Explanation:
Portal Authentication vs. MAC Authentication
Portal Authentication
* Used in high-mobility environments (e.g., shopping malls, hotels, and public Wi-Fi hotspots).
* Users authenticate via a web portal before gaining network access.
* Supports multiple device types (smartphones, laptops, tablets, etc.).
# MAC Address Authentication
* Used for dumb devices that cannot perform interactive authentication (e.g., printers, IP phones, cameras).
* The network authenticates devices based on their MAC addresses automatically.
* Often used in enterprise LANs to ensure unattended devices get network access securely.

NEW QUESTION # 100
A VGMP packet is encapsulated with a UDP header and a VGMP header. By default, a VGMP packet uses UDP port _____.

Answer:

Explanation:

512

Explanation:

Understanding VGMP (Virtual Gateway Management Protocol)

What is VGMP?

* VGMP (Virtual Gateway Management Protocol) is used in Huawei firewalls to manage hot standby (HRP - Hot Standby Routing Protocol).

* Ensures that the active and standby firewalls synchronize their states for high availability.

How Does VGMP Work?

* The Active and Standby firewalls exchange VGMP packets to maintain state synchronization.

* These packets are encapsulated within UDP for transport.

* The default UDP port for VGMP is 512.

Why is the Answer 512?

Huawei firewalls use UDP port 512 by default for VGMP communication.# This ensures that VGMP heartbeats and synchronization messages are correctly processed.

Real-World Application:

* Enterprise Firewalls: VGMP ensures failover between active and standby firewalls.

* Carrier-Grade Firewalls: Uses VGMP with HRP to achieve zero-downtime firewall redundancy.

Reference: Huawei HCIE-Datacom Guide - VGMP and HRP High Availability Mechanisms

NEW QUESTION # 101

In the topology shown in the figure. Running the OSPFv3 protocol over the entire network does not produce what type of LSA on R1 without external route introduction?
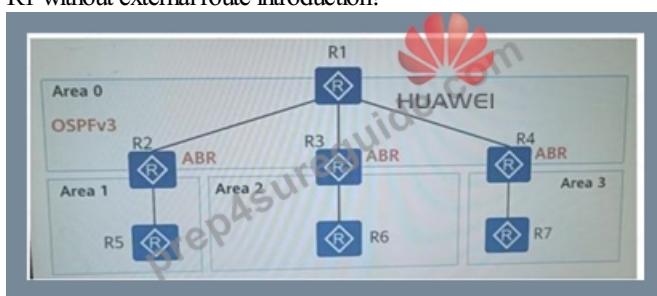

- A. Link-LSA
- B. Inter-Area-RouterLSA
- C. Intra-Area-Prefix-LSA
- D. Inter-Area-Prefix-LSA

Answer: B

NEW QUESTION # 102

DHCP Relay is responsible for forwarding DHCP packets between the DHCP server and the DHCP client, assisting the DHCP server in dynamically assigning network parameters to the DHCP client.

- A. TRUE
- B. FALSE

Answer: A

NEW QUESTION # 103
