## H35-210\_V2.5 Test Vce Free & New H35-210\_V2.5 Test Cost

Lead2PassExam is a website which is able to speed up your passing the Huawei certification H35-210\_V2.5 exams. Our Huawei certification H35-210\_V2.5 exam question bank is produced by Lead2PassExam's experts's continuously research of outline and previous exam. When you are still struggling to prepare for passing the Huawei certification H35-210\_V2.5 Exams, please choose Lead2PassExam's latest Huawei certification H35-210\_V2.5 exam question bank, and it will brings you a lot of help.

## Huawei HCIA-Access V2.5 Sample Questions (Q96-Q101):

### NEW QUESTION # 96

The routing table of a router contains the following two entries:

Destination/Mask | Protocol | Pre | Cost | Nexthop | Interface

9.0.0.0/8 | OSPF | 10 | 50 | 1.1.1.1 | Serial0

9.1.0.0/16 | RIP | 100 | 5 | 2.2.2.2 | Ethernet0

If the router needs to forward packets with the destination address of 9.1.4.5, which statement is correct?

- A. The router selects the second route, because the outbound interface is Ethernet0, which is faster.
- **B. The router selects the second route, because this route matches the destination address 9.1.4.5 more accurately.**
- C. The router selects the first route, because the priority of OSPF is higher.

- D. The router selects the second route, because the metric of RIP is smaller.

**Answer: B**

Explanation:

Routing decisions prioritize the longest prefix match. The destination 9.1.4.5 matches both 9.0.0.0/8 (subnet mask 255.0.0.0) and 9.1.0.0/16 (subnet mask 255.255.0.0). The /16 mask is longer, so the second route (9.1.0.0/16) is selected. Protocol priority (OSPF's 10 vs. RIP's 100) and metrics (cost) are irrelevant here because the longest prefix takes precedence.

#### NEW QUESTION # 97

onIPWhich statement is correct in terms of routing?

- A. In a local area network, routing includes the following two parts:IPAddress andMACaddress.
- B. Any route must include the following three parts of information: source address, destination address, and next hop.
- C. Routing isOSIThe concept of the second layer in the model.
- D. IPRouting is the guideIPPath information for packet forwarding.

**Answer: D**

#### NEW QUESTION # 98

Among common ODN products, large square heads, round heads, and small square heads refer to:

- A. SC, FC, LC
- B. None of the above
- C. LC, SC, FC
- D. FC, LC, SC

**Answer: A**

Explanation:

\* SC (Large Square Head): Square connector with a push-pull design.

\* FC (Round Head): Round connector with a screw-on mechanism.

#### NEW QUESTION # 99

Regarding the UA5000 IPMB single board, which one of the following descriptions is wrong?

- A. Support main/standby switchover
- B. IPMB is an IP service processing board, used to converge and process broadband services
- C. Forward PVMB's VoIP service, and realize IP uplink through FE/GE electrical port or GE optical port.
- D. 8 GE optical ports can be provided as uplink ports

**Answer: D**

#### NEW QUESTION # 100

Which of the following descriptions of MUX vlan characteristics is correct?

- A. MUX VLAN is mainly used for community access.
- B. There are two types of ports: uplink port and service virtual port
- C. A MUX VLAN can contain multiple uplink ports and multiple service virtual ports
- D. Layer 2 interworking between different MUX VLANs

**Answer: B**

#### NEW QUESTION # 101
