

New HPE0-J68 Test Price & Related HPE0-J68 Certifications

2025 Latest Pass4suresVCE HPE0-J68 PDF Dumps and HPE0-J68 Exam Engine Free Share: <https://drive.google.com/open?id=1vaoPFfl-dCmc-C8WPUWpvK4w1kkQLUgf>

The HPE Storage Solutions (HPE0-J68) exam dumps are real and updated HPE0-J68 exam questions that are verified by subject matter experts. They work closely and check all HPE Storage Solutions (HPE0-J68) exam dumps one by one. They maintain and ensure the top standard of HPE Storage Solutions (HPE0-J68) exam questions all the time.

Are you planning to appear in the HPE Storage Solutions (HPE0-J68) certification test and need to know where to get updated practice questions? Then you are at the right place because HPE Storage Solutions (HPE0-J68) has made the learning material for the applicants to prepare successfully for the certification exam in a short time.

If you face any problem while using the offline or online software HPE Storage Solutions (HPE0-J68) practice exam of Pass4suresVCE, contact our customer service team. Our team of experts is available 24/7 for your assistance while using updated HPE0-J68 Exam Prep material. Many takers of the HPE Storage Solutions (HPE0-J68) practice test suffer from money loss because it introduces new changes in the content of the test.

HPE0-J68 exam is a comprehensive exam that tests the candidate's knowledge of HPE storage solutions. HPE0-J68 exam covers a wide range of topics, including HPE storage products and technologies, storage management, data protection, and backup and recovery. HPE0-J68 exam is designed to assess the candidate's ability to design, configure, and troubleshoot HPE storage solutions.

for a variety of business needs. HPE0-J68 exam is also designed to test the candidate's ability to identify and resolve issues related to HPE storage solutions.

To prepare for the HPE0-J68 Exam, candidates can take advantage of the various resources available, including study materials, training courses, and practice exams. By investing time and effort into preparing for the exam, candidates can increase their chances of passing the exam and achieving the HPE Storage Solutions certification.

HPE Storage Solutions Sample Questions (Q126-Q131):

NEW QUESTION # 126

A customer has an HPE 3PAR StoreServ 8200 with eight 3.84 TB SSD's configured with RAID5 7+1. They plan to add four more 3.84 TB SSD's.

What needs to be changed on the configuration once the new SSD's are installed?

- A. Adjust the cpg growth value to match amount of SSD's.
- B. Change the availability level from cage to magazine.
- C. Reconfigure the cpg setsize as RAID6 6+2 and wait for tunesys to complete.
- **D. Change the cpg setsize to RAID5 5+1 and run tunesys.**

Answer: D

Explanation:

When adding additional SSDs to the HPE 3PAR StoreServ 8200 with an existing RAID5 7+1 configuration, it is advisable to reconfigure the CPG (Common Provisioning Group) setsize to RAID5 5+1. This reconfiguration will allow the array to better balance the additional drives and optimize the use of available storage. After changing the setsize, running tunesys will ensure that the data is redistributed across the new set of drives, optimizing performance and availability.

NEW QUESTION # 127

A customer is a cloud service provider with infrastructure powered by HPE 3PAR Storeserv 9000. The customer is concerned about their ability to ensure the quality of service and protect their tenants from unpredictable bursts of I/O from other tenants. What should you recommend to your customer ?

- **A. Use priority optimization to enable service level for workloads**
- B. Use dynamic optimization to automatically manage quality of service
- C. Use virtual domain to automatically set multi-tenant policies
- D. Use adaptive optimization to optimize service level automatically

Answer: A

NEW QUESTION # 128

An existing Nimble customer is interested in adding storage to their environment to store his Backups, but has a constrained budget and limited personnel. The solution must scale to allow for substantial growth over the next five years?

- A. Nimble AF series
- **B. Nimble CS series**
- C. Nimble SF series
- D. Nimble cloud volume

Answer: B

Explanation:

For a customer with a constrained budget and limited personnel, who requires a storage solution for backups that can scale significantly over the next five years, the HPE Nimble CS series is the most appropriate choice.

The Nimble CS series offers hybrid storage capabilities, combining flash and disk storage to balance performance and cost. It is designed to be cost-effective while still providing the ability to scale as the customer's storage needs grow. The Nimble CS series also integrates easily with existing environments, making it an ideal solution for backup storage with room for future expansion.

NEW QUESTION # 129

You need to create an N:M relationship between VMware hypervisors and virtual volumes with the least amount of administrative overhead.

Click the option where you can create a group of VMware hypervisors for volumes provisioning.

The screenshot shows the Primera & 3PAR SSMC interface. The 'VMWARE' tab is selected, and the 'Virtual Machines' section is active. The interface displays a list of virtual machines and their associated storage configurations. The table below shows the details of the virtual machines and their storage configurations.

Virtual Machine	Storage Configuration
HDP_datastore	SDP1
HDP_datastore.r	SDP2-Alex-Gonzalez
ME-Demo-AutoCPG	SDP1
ME-Demo-AutoCPG.r	SDP2-Alex-Gonzalez
ME-Demo.0	SDP1
ME-Demo.1	SDP1
test.1	SDP1
test.2	SDP1
test.3	SDP1
test_IFM	SDP1
test_IFM_clone	SDP1
test_k	SDP1

The interface also shows the 'Storage Optimization' section with the following settings:

- Compaction Type: 9.4.1
- Type: Base
- Provisioning: Thin
- Dedup: Yes
- Compression: Yes
- Mode: Read/Write
- RAID: RAID 6
- Adaptive optimization: -
- Copy CPG: SSD r6
- Comments: -
- Virtual Machines: -
- App Volume Set: -

The 'Performance Metrics' section shows the following values:

- Average throughput in KiB/Sec: 0 KiB/Sec
- Average latency in ms: 0 ms

The 'Copies' section shows the following values:

- Clones: 0
- Snapshots: 0
- Snapshot policy: none
- Remote copy group: HDP Demo Replication.r518789

Answer:

NEW QUESTION # 130

You are planning a single-site Nimble solution with iSCSI connectivity. Two 10GbE SFP+ dual port NICs are included in the configuration. You designed an Intelligent Resilient Framework (IRF) stack with HPE FlexFabric 5900CP switches. Which statement is correct when discussing the IRF limits for this configuration?

- A. When connecting an iSCSI storage to an IRF stack, a minimum of four 10GbE ports must be used per switch.
- B. The used IRF ports for iSCSI traffic have to be configured as 10GbE converged ports.
- C. A maximum of two switches can be used in an IRF stack when connecting storage.
- D. In an IRF stack with storage connectivity, the 40GbE ports cannot be used.

Answer: C

Explanation:

When designing an Intelligent Resilient Framework (IRF) stack for a Nimble storage solution using HPE FlexFabric 5900CP switches with iSCSI connectivity, the IRF stack typically supports up to two switches for optimal performance and redundancy. This limitation ensures that the iSCSI traffic is managed effectively without overcomplicating the network topology, which could potentially introduce latency or complexity in managing the stack.

Utilizing more than two switches in an IRF stack when connecting to storage could result in diminished returns in performance or increased management overhead, which is why HPE typically recommends limiting the IRF stack to two switches in such configurations.

For further details, refer to:

- * HPE Nimble Storage Overview

NEW QUESTION # 131

.....

HP guarantees that if you use the product, you will pass the HPE0-J68 exam on your first try. Its primary goal is to save students time and money, not just conduct a business transaction. Candidates can take advantage of the free trials to evaluate the quality and standard of the HPE0-J68 Dumps before making a purchase. With the right HP HPE0-J68 study material and support team passing the examination at first attempt is an achievable goal.
