## Perfect ISTQB-CTAL-TA Prep Guide will be Changed According to The New Policy Every Year - Exam4Docs

It never needs an internet connection. ISTQB (ISTQB CTAL-TA) ISTQB Certified Tester Advanced Level - Test Analyst (Syllabus 2012) practice exam software has several mock exams, designed just like the real exam. ISTQB ISTQB-CTAL-TA Practice Exam software contains all the important questions which have a greater chance of appearing in the final exam. Exam4Docs always tries to ensure that you are provided with the most updated (ISTQB CTAL-TA) ISTQB Certified Tester Advanced Level - Test Analyst (Syllabus 2012) Exam Questions to pass the exam on the first attempt.

## ISTQB (ISTQB CTAL-TA) ISTQB Certified Tester Advanced Level - Test Analyst (Syllabus 2012) Sample Questions (Q46-Q51):

### NEW QUESTION # 46

When preparing test cases for an interoperability test, not all interactions may be clearly specified in the requirements documents. Which type of document is typically also used by a Test Analyst as the test basis for interoperability testing?

- A. System architecture document
- B. User stories
- C. Component specifications
- D. Functional specifications

**Answer: A**

Explanation:

The type of document that is typically used by a Test Analyst as the test basis for interoperability testing is the system architecture document. The system architecture document describes the structure and behavior of the system under test and its components, as well as their interactions and dependencies with other systems or components. This document can provide information about the interfaces and protocols that need to be tested for interoperability. #### NEW QUESTION # 47

Sell-It-Cheap salesrooms organize general and specialist sales with commission charges based on the item price. Following customer feedback, the commission bandings have been changed:

\* £500 - £749: 5.5% fee

\* £750 - £999: 4.5% fee

What tests would be appropriate to test this change in commission bandings using the 2-point boundary value analysis technique?

SELECT ONE OPTION

- A. No additional tests required; existing BVA tests can be used
- B. £500, £749, £999, £1000
- **C. £499, £500, £749, £750, £999, £1000**
- D. £748, £749, £750, £751

**Answer: C**

Explanation:

Comprehensive and Detailed in Depth Explanation:

Boundary Value Analysis (BVA) focuses on values at the edges of equivalence partitions, including just inside and just outside the boundary.

\* Therevised boundaries are:

\* £500 and £749 for the new 5.5% fee band

\* £750 and £999 for the 4.5% fee band

\* Testing both valid and invalid boundaries is essential to ensure accurate fee calculations.

The correct test cases are:

\* £499 (just below the lower boundary)

\* £500 (at the lower boundary)

\* £749 (at the upper boundary of the first band)

\* £750 (at the lower boundary of the second band)

\* £999 (at the upper boundary of the second band)

\* £1000 (just above the upper boundary)

Therefore, the correct answer is D (499, 500, 749, 750, 999, 1000).

#### NEW QUESTION # 48

You work for a software testing consultancy firm, SOFTEST, specializing in the travel industry. A project has started for a new cruise sector client to develop a new user interface allowing customers to search for cruises using several drop-down fields. The project uses a SCRUM methodology with 2-week sprints.

Which option below describes the BEST test techniques to apply for each project?

SELECT ONE OPTION

- A. Classification Tree (class combination coverage) and exploratory testing
- **B. Pairwise and exploratory testing**
- C. Pairwise and use case testing
- D. Decision table testing and checklist-based testing

**Answer: B**

Explanation:

Comprehensive and Detailed in Depth Explanation:

\* The project has multiple drop-down fields with many values, resulting in numerous combinations.

\* Pairwise testing is ideal for testing combinations efficiently.

- \* Since the project uses SCRUM methodology, it requires exploratory testing to accommodate changes and rapid feedback during sprints.
  - \* Use case testing (Option A) is not suitable since the focus is on combinations rather than functional sequences.
  - \* Decision table testing (Option B) would be less efficient due to the large number of combinations.
  - \* Classification Tree (Option C) is more suitable for class-based testing, not pairwise combinations.
- Thus, the correct answer is D (Pairwise and exploratory testing).

#### NEW QUESTION # 49

Which of the following software development lifecycle models requires the earliest involvement from the Test Analyst?

- A. Embedded iterative model
- B. Maintenance lifecycle
- C. Agile development model
- D. V-model

**Answer: C**

Explanation:

The agile development model requires the earliest involvement from the Test Analyst because testing is integrated into every iteration and the Test Analyst needs to collaborate closely with the developers and the business stakeholders throughout the project. The other models have more distinct phases and testing activities are usually performed after the development activities are completed.

#### NEW QUESTION # 50

A PIN entry component of an ATM system has been developed using the following state table:

	Insert Card	Enter Pin	Valid Pin	Invalid Pin
<b>S1) Start State</b>	S2	-	-	-
<b>S2) Wait for PIN</b>	-	S3	-	-
<b>S3) 1st try</b>	-	-	S6	S4
<b>S4) 2nd try</b>	-	-	S6	S5
<b>S5) 3rd try</b>	-	-	S6	S7
<b>S6) Access account</b>	-	-	-	-
<b>S7) Eat card</b>	-	-	-	-

Using the state transition test technique, how many 0-switch test cases are needed to achieve 100% 0-switch coverage?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: C**

Explanation:

Eight 0-switch test cases are needed to achieve 100% 0-switch coverage. A state transition test technique is a technique that tests the behavior of a system or component based on its states and transitions between them. A

0-switch test case is a test case that covers one state and its associated actions and events. To achieve 100% 0-switch coverage, all states and their associated actions and events must be covered by at least one test case.

The states for this scenario are:

- \* Enter PIN
- \* PIN OK
- \* PIN not OK
- \* 1st try
- \* 2nd try
- \* 3rd try

\* Access to act

\* Eat card
