The Junos, Associate (JNCIA-Junos) (JN0-105) certification exam is one of the top-rated career advancement certifications in the market. This Junos, Associate (JNCIA-Junos) (JN0-105) exam dumps have been inspiring beginners and experienced professionals since its beginning. There are several personal and professional benefits that you can gain after passing the Juniper JN0-105 Exam. The validation of expertise, more career opportunities, salary enhancement, instant promotion, and membership of Juniper certified professional community.

Juniper JN0-105 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Operational Monitoring and Maintenance: Different methods of monitoring or maintaining Junos devices are identified in this topic. Lastly, it discusses monitoring or maintenance procedures for a Junos device.
Topic 2	<ul style="list-style-type: none">Networking Fundamentals: The topic networking fundamentals covers identifying the concepts and functionality of different fundamental elements of networking.
Topic 3	<ul style="list-style-type: none">Junos OS Fundamentals: It covers concepts, benefits, and functionality of the core elements of the Junos OS.

Topic 4	<ul style="list-style-type: none"> • Routing Fundamentals: This topic discusses pointing out basic routing concepts or functionality for Junos devices. Moreover, the topic also describes configuring or monitoring basic routing elements for a Junos device.
Topic 5	<ul style="list-style-type: none"> • Routing Policy and Firewall Filters: The topic of Routing Policy and Firewall Filters covers routing policy and firewall filters on Junos devices. Furthermore, the topic also deals with routing policies and firewall filters on a Junos device.
Topic 6	<ul style="list-style-type: none"> • Configuration Basics: Identification of the main elements for configuring Junos devices is discussed in this topic. Moreover, it describes configuring basic components of a Junos device

Reliable Juniper JN0-105 Exam Cram & Authorized JN0-105 Test Dumps

The Juniper JN0-105 practice test by TestBraindump can be accessed online on different web browsers like Chrome, IE, Firefox, Opera, and Safari without any plugins. You also have the flexibility to open the pdf file of the Junos, Associate (JNCIA-Junos) JN0-105 Practice Test on mobile devices and tablets. The Juniper JN0-105 pdf dumps version allows you to print the Juniper JN0-105 exam questions easily and access it everywhere.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q97-Q102):

NEW QUESTION # 97

Exhibit.

Referring to the exhibit, which routing configuration is required for these two users to access the remote server?

- A. Trunk ports must be enabled on the switch.
- **B. Users and the server require a default gateway.**
- C. A routing protocol must be enabled on the router.
- D. Users must connect directly to the router.

Answer: B

Explanation:

For the users in the 10.1.1.0/24 subnet and the server in the 10.1.2.0/24 subnet to communicate with each other, they need to route packets through the router that connects these two subnets. Each user and the server need to have their default gateway set to the IP address of the router interface on their respective subnet (.254). This ensures that packets destined for other subnets are sent to the router, which then routes them to the correct destination subnet.

References:

Juniper official documentation: Configuring Basic Routing.
General networking principles.

NEW QUESTION # 98

Click the Exhibit button.

```
user@router> show route

inet.0: 13 destinations, 14 routes (13 active, 0 holddown, 0
hidden)
+ = Active Route, - = Last Active, * = Both

0.0.0.0/0          *[Static/5] 00:05:38
> to 172.29.1.1 via ge-0/0/3.0
```

Referring the exhibit, what does the highlighted number indicate?

- A. hop count is 5
- B. metric is 5
- C. cost is 5
- **D. route preference is 5**

Answer: D

Explanation:

In the exhibit shown, the highlighted number next to the route type (Static) within the square brackets indicates the route preference, also known as the administrative distance. In Junos, the route preference is a value that determines the priority of the route source. Lower numbers indicate a higher priority when the routing table is being calculated. The route preference is used to select the best route when multiple paths to the same destination exist from different routing sources. The number 5 is unusually low for a static route by default, suggesting it has been manually configured to override other route types.

NEW QUESTION # 99

You have configured some interfaces on a Junos device; however, you have not yet committed the configuration. What happens if you issue the rollback 0 command in this scenario?

- **A. The interface changes you made are discarded.**
- B. The factory default configuration is loaded.
- C. The messages.log file is deleted.
- D. The Junos device is rebooted.

Answer: A

Explanation:

In Junos OS, issuing the rollback 0 command reverts the candidate configuration to the last committed configuration. If you have made changes to some interfaces but have not committed those changes, using rollback 0 will discard these uncommitted changes, reverting to the state of the configuration at the time of the last commit. This command does not affect system files like messages.log, reboot the device, or load the factory default configuration; it simply undoes uncommitted changes.

NEW QUESTION # 100

Which prompt indicates that you are using configuration mode?

- A. >
- B. \$
- C. %
- D. #

Answer: D

Explanation:

In Junos OS, the # prompt indicates that you are in configuration mode. This mode is used for making changes to the configuration of the device.

Reference: Juniper Networks CLI Modes

"The # prompt indicates that you are in configuration mode."

NEW QUESTION # 101

Which command displays real-time usage statistics for all interfaces?

- A. monitor interface traffic
- B. show interfaces extensive
- C. monitor traffic
- D. show interfaces

Answer: A

Explanation:

The monitor interface traffic command in Junos OS is used to view real-time interface statistics, such as bandwidth utilization (input and output rate), error counters, and packet counts. Unlike the show interfaces commands, which provide static, snapshot-based details, the monitor command displays continuously updated traffic data until the session is stopped.

From Junos OS Documentation:

"The monitor interface traffic command displays real-time statistics about traffic utilization on the specified interfaces. By default, statistics are displayed for all interfaces at regular intervals until you exit the command." References:

Juniper TechLibrary - Monitoring Interfaces

JNCIA-Junos Exam Objective: Operational Monitoring and Maintenance

NEW QUESTION # 102

.....

The Junos, Associate (JNCIA-Junos) (JN0-105) PDF dumps provide you with everything that you must need in JN0-105 exam preparation and enable you to crack the final JN0-105 exam quickly. The Juniper JN0-105 Exam Questions are being updated on a regular basis. As you know the JN0-105 exam syllabus is being updated on a regular basis.
