Prep Juniper JN0-253 Guide - New JN0-253 Exam Pass4sure

PDFBraindumps is a learning website which provides JN0-253 latest dumps and answers, and almost covers every knowledge of JN0-253 exam questions. Using our learning textbooks to prepare JN0-253 test is your best choice. PDFBraindumps with latest JN0-253 exam simulations will help you Pass JN0-253 Exam in a short time in a fast way. We promise that we will refund fully if the JN0-253 vce dumps and training materials have any problems or you fail the JN0-253 exam with our JN0-253 braindumps.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q13-Q18):

NEW QUESTION # 13

In the Mist UI, what are two Marvis Actions for the AP category? (Choose two.)

- A. MTU Mismatch
- B. Coverage Hole
- C. High CPU
- D. Health Check Failed

Answer: B,D

Explanation:

Coverage Hole: Marvis Actions can identify coverage holes where the wireless signal is weak or absent, indicating potential areas that need additional access points or adjustments.

Health Check Failed: This action indicates that the health check, which monitors the performance and connectivity of an access point, has failed, suggesting issues that need to be addressed.

NEW QUESTION # 14

What is the maximum number of Mist Edge devices supported for high availability?

- A. An unlimited number of Mist Edge devices are supported.
- B. A maximum of 16 Mist Edge devices are supported.
- C. A maximum of three Mist Edge devices are supported.
- **D. A maximum of two Mist Edge devices are supported.**

Answer: D

Explanation:

The maximum number of Mist Edge devices supported for high availability is two. This ensures that there is a backup device in place to take over in case the primary device fails, providing redundancy and maintaining network stability.

NEW QUESTION # 15

Which two statements are correct about Juniper Mist Wired Assurance ZTP? (Choose two.)

- **A. The cloud-ready Juniper switch must either boot from the factory-default state or you can issue the request system zeroize Junos command to reset the configuration.**
- **B. The switch must be running a supported Junos version for Juniper Mist Wired Assurance.**
- C. The technician must have console access to the switch during the initial setup.
- D. All legacy Juniper switch models are supported.

Answer: A,B

Explanation:

Supported Junos Version: For Juniper Mist Wired Assurance to function correctly, the switch must be running a supported Junos version. This ensures compatibility with Mist's cloud management and AI capabilities.

Factory-Default State or Zeroize Command: The switch must boot from a factory-default state, or you can use the request system zeroize command to reset its configuration. This is essential for seamless onboarding and auto-provisioning.

NEW QUESTION # 16

What are two ways that Juniper Mist Wireless Assurance enhances troubleshooting capabilities? (Choose two.)

- **A. by using Predictive Analytics and Correlation Engine (PACE)**
- B. by monitoring congestion uplink as a percentage of gateway bandwidth
- **C. by employing dynamic packet capture**
- D. by alerting administrators of subscription options through e-mail

Answer: A,C

Explanation:

Juniper Mist Wireless Assurance revolutionizes network troubleshooting by implementing Predictive Analytics and Correlation Engine (PACE) and dynamic packet capture. According to the official Mist documentation, PACE applies advanced data science and machine learning to analyze real network events and classify them for root-cause identification. The Mist PACE engine proactively identifies issues by correlating over 150 client and AP state changes, enabling the system to surface recommendations and automate root-cause resolution. This allows IT teams to move beyond reactive troubleshooting towards predictive and automated network operations, reducing time-to-resolution and minimizing user impact.

Additionally, dynamic packet capture significantly streamlines troubleshooting efforts. Mist Wireless Assurance automatically detects anomalies or failures in user and network behavior and instantly initiates a packet capture. These packet captures are contextually tagged to the affected event, stored in the cloud, and are readily accessible for analysis. This process eliminates the need for on-site technicians with sniffers, as now every major incident already has an associated packet capture, captured at the right moment. This capability greatly reduces troubleshooting time and ensures that issues can be reproduced and isolated accurately.

NEW QUESTION # 17

At which two configuration levels are WLAN objects created? (Choose two.)

- A. site level
- B. org level
- C. device level
- D. user level

Answer: A,B

Explanation:

Site Level: WLAN objects can be created at the site level, allowing specific configurations for different locations within an organization. This helps in customizing WLAN settings based on the unique requirements of each site.

Org Level: WLAN objects can also be created at the organization level, which provides a standardized configuration that can be applied across multiple sites. This ensures consistency in WLAN settings throughout the entire organization.

NEW QUESTION # 18

.....

The Mist AI, Associate (JNCIA-MistAI) prep torrent that we provide is compiled elaborately and highly efficient. You only need 20-30 hours to practice our JN0-253 exam torrent and then you can attend the exam. For most of our customers, who are busy with their jobs or other things. But if they use our JN0-253 test prep, they won't need so much time to prepare the exam and master exam content in a short time. What they need to do is just to spare 1-2 hours to learn and practice every day and then pass the exam with JN0-253 Test Prep easily. It costs them little time and energy to pass the exam.

Prep JN0-253 Guide: https://www.pdfbraindumps.com/JN0-253_valid-braindumps.html
