

New JN0-253 Mock Test–The Best Training Material for JN0-253: Mist AI, Associate (JNCIA-MistAI)

What's more, part of that ITCertMagic JN0-253 dumps now are free: <https://drive.google.com/open?id=11A6eCZKZnaDrHiCUvfOrgpeQD8zQGvmg>

All these three Mist AI, Associate (JNCIA-MistAI) (JN0-253) exam dumps formats contain the real and Mist AI, Associate (JNCIA-MistAI) (JN0-253) certification exam trainers. So rest assured that you will get top-notch and easy-to-use Juniper JN0-253 Practice Questions. The JN0-253 PDF dumps file is the PDF version of real Mist AI, Associate (JNCIA-MistAI) (JN0-253) exam questions that work with all devices and operating systems.

Our clients come from all around the world and our company sends the products to them quickly. The clients only need to choose the version of the product, fill in the correct mails and pay for our JN0-253 study materials. Then they will receive our mails in 5-10 minutes. Once the clients click on the links they can use our JN0-253 Study Materials immediately. If the clients can't receive the mails they can contact our online customer service and they will help them solve the problem. Finally the clients will receive the mails successfully. The purchase procedures are simple and the delivery of our JN0-253 study materials is fast.

>> New JN0-253 Mock Test <<

Reliable Juniper New JN0-253 Mock Test & The Best ITCertMagic - Leading Provider in Qualification Exams

This is a wise choice, after using our JN0-253 training materials, you will realize your dream of a promotion because you deserve these reports and your efforts will be your best proof. Therefore, when you are ready to review the exam, you can fully trust our products, choose our learning materials. If you don't want to miss out on such a good opportunity, buy it quickly. Thus, users do not have to worry about such trivial issues as typesetting and proofreading, just focus on spending the most practice to use our JN0-253 Learning Materials. After careful preparation, I believe you will be able to pass the exam.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q78-Q83):

NEW QUESTION # 78

You are asked to create a real-time visualization dashboard which displays clients on a map.
Which two Juniper Mist functions would you use in this scenario? (Choose two.)

- A. Webhooks
- B. WebSocket
- C. RESTful API
- D. Live View

Answer: B,D

Explanation:

When developing a real-time visualization dashboard that displays client locations on a map, Juniper Mist offers specific APIs and data streaming methods to support dynamic updates.

According to the Juniper Mist Developer Documentation, the WebSocket interface enables continuous, real-time streaming of client location and telemetry data directly from the Mist Cloud. This mechanism is ideal for live dashboards, as it eliminates the need for repeated REST API polling. WebSocket connections provide instant updates whenever a device moves, connects, or disconnects, ensuring the displayed map remains accurate in real time.

The Live View feature complements this functionality within the Mist Cloud and third-party integrations. It allows administrators and developers to view live location movements of Wi-Fi clients, BLE beacons, and IoT devices within a site's floor plan. It uses telemetry directly from access points, offering second-by-second updates.

In contrast, RESTful APIs and Webhooks are designed for event-based automation and configuration management rather than live visualization. REST APIs are best for historical or static data retrieval, while Webhooks are used for triggering external actions based on events.

Therefore, the correct functions for real-time map visualization are:

- * WebSocket (C)- for continuous live data streaming
- * Live View (D)- for direct map-based visualization of client activity

NEW QUESTION # 79

Exhibit:

EVENT

Apr 23, 2024 1:45:25 PM

packet_loss

[Download Packet Capture](#)

[Download Traceroute](#)

CLIENT INFO

IP MAC | Hotspotname

SSID Example-SSID

10.0.0.1 in AP

EXAMPLE-AP

SSID

10.0.0.1 in AP

Signal

-54 dBm

Channel

36

Referring to the exhibit, which two statements are correct about this client event? (Choose two.)

- A. A traceroute file is included.
- B. A dynamic packet capture file is included.
- C. It is a wireless client.
- D. It is a wired client.

Answer: B,C

Explanation:

In the Juniper Mist Cloud, the Client Events section within the Monitoring interface displays detailed event logs for both wired and wireless clients, providing insights into connectivity, authentication, and performance-related activities. Each event entry may include associated diagnostic files such as dynamic packet captures (DPCs), traceroute data, and syslogs depending on the event type and device context.

According to the Juniper Mist AI Operations and Client Event Diagnostics Guide, the platform states:

"Wireless client events provide correlation between client connection attempts and associated diagnostic artifacts such as dynamic packet captures. These files are generated automatically during troubleshooting events and are attached to the event log for administrator review." From the exhibit, the client is shown as a wireless device, indicated by the Wi-Fi icon and the SSID association information visible in the event details. Additionally, the entry confirms that a dynamic packet capture (DPC) file was automatically generated for the event, allowing engineers to download and inspect packet-level activity for root-cause analysis.

Therefore:

- * B (It is a wireless client) is correct - the event pertains to a Wi-Fi-connected device.
- * C (A dynamic packet capture file is included) is correct - the log includes a downloadable DPC file.

NEW QUESTION # 80

When browsing the Marvis Actions page, you notice that something has triggered the "AP Offline" Marvis Action. You click on that action.

What information will you see displayed? (Choose two.)

- A. recommended action
- B. Marvis Action status
- C. resolved action
- D. Mist support ticket status

Answer: A,B

Explanation:

When browsing the Marvis Actions page and you click on the "AP Online" Marvis Action, you will see:

Marvis Action Status: This indicates the current state of the action, whether it is in progress, resolved, or another status.

Recommended Action: Marvis will provide a suggested course of action to resolve the issue. This could include steps like configuration changes or other remedial actions.

NEW QUESTION # 81

Which statement is true about Radio Resource Management (RRM)?

- A. The RRM event-driven system automatically runs once a day.
- B. The RRM global optimization system automatically runs once a day.
- C. The RRM event-driven system automatically runs every hour.
- D. The RRM global optimization system automatically runs every hour.

Answer: B

Explanation:

Radio Resource Management (RRM) is a key feature of Juniper Mist Wireless Assurance that uses AI-driven automation to dynamically adjust radio settings across access points (APs) for optimal wireless performance. The RRM engine ensures proper channel assignment, transmit power control, and interference management across the network.

According to the Juniper Mist Wireless Assurance and AI-Driven RRM Guide, RRM operates in two modes:

* Event-Driven RRM: This mode reacts immediately to real-time changes in the RF environment, such as new access points, interference spikes, or client density changes.

* Global Optimization RRM: This process runs as scheduled, system-wide optimization once per day to evaluate the overall RF environment and redistribute channels and power settings network-wide for the best balance of coverage and capacity.

The documentation states:

"The RRM global optimization algorithm automatically executes once daily to ensure optimal channel and power planning across all APs." Thus, the correct answer is D - The RRM global optimization system automatically runs once a day.

NEW QUESTION # 82

In the context of Juniper Mist, which two statements describe a bad user minute? (Choose two.)

- A. A way to normalize a user's negative network experience.
- B. The number of affected users multiplied by the number of minutes they are affected.
- C. A metric that tracks how many minutes a user is connected to a network.
- D. The number of minutes a device is down multiplied by the number of users affected.

Answer: A,B

Explanation:

In Juniper Mist AI, the concept of a Bad User Minute (BUM) is a core metric used within Service Level Expectations (SLEs) and

the AI-driven analytics engine to quantify negative user experience.

According to the Juniper Mist AI Operations and SLE Analytics Guide, a "bad user minute" is defined as:

"A normalized measure that represents one minute of degraded user experience for one user." Mist AI calculates this by multiplying the number of affected users by the number of minutes they experience poor performance. This allows administrators to understand the impact of network issues not just in duration, but in terms of total user experience degradation.

For example, if ten users experience poor connectivity for one minute, the system records 10 bad user minutes.

This normalization helps Juniper Mist prioritize incidents based on impact, rather than duration alone, allowing administrators to focus on issues that affect the greatest number of users.

Therefore:

* Bis correct - it's a way to normalize a user's negative experience.

* Dis correct - it's calculated as number of affected users × number of minutes affected.

NEW QUESTION # 83

.....

Knowledge is defined as intangible asset that can offer valuable reward in future, so never give up on it and our JN0-253 exam preparation can offer enough knowledge to cope with the exam effectively. To satisfy the needs of exam candidates, our experts wrote our JN0-253 practice materials with perfect arrangement and scientific compilation of messages, so you do not need to study other numerous JN0-253 study guide to find the perfect one anymore.

Training JN0-253 Material: <https://www.itcertmagic.com/Juniper/real-JN0-253-exam-prep-dumps.html>

Juniper New JN0-253 Mock Test You can study at any time you want to study and get the best learning results with the best learning status, Juniper New JN0-253 Mock Test Our general staff can't see you email address, Juniper New JN0-253 Mock Test It will be save-time, save-energy and cost-effective for all potential elites to choose Prep4cram, Our passing rate of Training JN0-253 Material - Mist AI, Associate (JNCIA-MistAI) is high to 98.36%.

These are available in datagrams or frames, JN0-253 Valid Dumps Pdf For more information on Security, visit our Security Reference Guide or sign up for our Security Newsletter, You can study at any JN0-253 time you want to study and get the best learning results with the best learning status.

Marvelous New JN0-253 Mock Test – Pass JN0-253 First Attempt

Our general staff can't see you email address, It will be save-time, Best JN0-253 Study Material save-energy and cost-effective for all potential elites to choose Prep4cram, Our passing rate of Mist AI, Associate (JNCIA-MistAI) is high to 98.36%.

At the same time, the three versions of Juniper JN0-253 actual test questions can provide you for the best learning effects.
