Experts expressed their meaning with clarity by knowledgeable and understandable words which cannot be misunderstood.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q40-Q45):

NEW QUESTION # 40

What are two types of system logs that Junos generates? (Choose two.)

- A. SQL log files
- **B. data plane logs**
- C. system core dump files
- **D. control plane logs**

Answer: B,D

Explanation:

The two types of system logs that Junos generates are control plane logs and data plane logs. Control plane logs are generated by the Junos operating system and contain system-level events such as system startup and shutdown, configuration changes, and system

alarms. Data plane logs are generated by the network protocol processes and contain messages about the status of the network and its components, such as routing, firewall, NAT, and IPS. SQL log files and system core dump files are not types of system logs generated by Junos.

NEW QUESTION # 41

Which two statements are correct when considering IPS rule base evaluation? (Choose two.)

- A. IPS applies the least severe action to traffic matching multiple rules.
- B. IPS applies the most severe action to traffic matching multiple rules,
- C. IPS evaluates rules concurrently.
- D. IPS evaluates rules sequentially

Answer: B,D

- B. APPID
- C. AppQoE
- D. AppTrack

Answer: A,B

NEW QUESTION # 44

Exhibit

The image shows a computer screen with a terminal window titled 'Exhibit'. The terminal session is running on a Juniper SRX device, as indicated by the 'JUNIPER NETWORKS' watermark in the background. The command entered is 'user@srx> show services user-identification authentication-tables authentication-source identity-management extensive'. The output shows the configuration for a user named 'nancy' in the 'juniper.net' domain. The user is a member of the 'posture-healthy' group and has access to 'administrators', 'users', 'domain admins', and 'domain users' groups. The user's state is 'Valid', and they are associated with the 'JIMS - Active Directory' source. The access start date is 2022-05-28, and the access start time is 21:53:52. The last updated timestamp is 2022-05-29 10:43:44. The age time is 46.

```
user@srx> show services user-identification authentication-tables authentication-source identity-management extensive
Logical System: root-logical-system
Domain: juniper.net
Total entries: 1
  Source-ip: 172.25.11.140
    Username: nancy
    Groups:posture-healthy, administrators, users, domain admins, domain users, executives
    State: Valid
    Source: JIMS - Active Directory
    Access start date: 2022-05-28
    Access start time: 21:53:52
    Last updated timestamp: 2022-05-29 10:43:44
    Age time: 46
```

Referring to the exhibit, which two statements are true? (Choose two.)

- A. Nancy logged in to the juniper.net Active Directory domain.
- B. Nancy is a member of the Active Directory sales group.
- C. The IP address of the authenticating domain controller is 172.25.11.140.
- D. The IP address of Nancy's client PC is 172.25.11.

Answer: A,C

NEW QUESTION # 45
