Our experts have carefully researched each part of the test syllabus of the JN0-460 guide materials. Then they compile new questions and answers of the study materials according to the new knowledge parts. At last, they reorganize the JN0-460 learning questions and issue the new version of the study materials. Once the newest test syllabus of the JN0-460 Exam appear on the official website, our staff will quickly analyze them and send you the updated version. So our JN0-460 guide materials deserve your investment.

Many people often feel that their memory is poor, and what they have learned will soon be forgotten. In fact, this is because they did not find the right way to learn. Mist AI Wired, Specialist (JNCIS-MistAI-Wired) exam tests allow you to get rid of the troubles of reading textbooks in a rigid way, and help you to memorize important knowledge points as you practice. Industry experts hired by JN0-460 Exam Question explain the hard-to-understand terms through examples, forms, etc. Even if you just entered the industry, you can easily understand their meaning. With JN0-460 test guide, you will be as relaxed as you do normally exercise during the exam.

Exam JN0-460 Questions Answers, JN0-460 Exam Dumps Pdf

In order to meet the time requirement of our customers, our experts carefully designed our JN0-460 test torrent to help customers pass the exam in a lot less time. We hope everyone can prepare for their exam with minimal time investment. If you purchase our Mist AI Wired, Specialist (JNCIS-MistAI-Wired) guide torrent, we can make sure that you just need to spend twenty to thirty hours on preparing for your exam before you take the exam, it will be very easy for you to save your time and energy. So do not hesitate and buy our JN0-460 study torrent, we believe it will give you a surprise, and it will not be a dream for you to pass your Mist AI Wired, Specialist (JNCIS-MistAI-Wired) exam and get your certification in the shortest time.

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q29-Q34):

NEW QUESTION # 29

Which statement is correct about Juniper Mist Wired Assurance capabilities?

- A. Juniper Mist delivers operational visibility, sets service level expectations (SLEs), and monitors throughput, successful connects, and switch health using pre-connection and post-connection performance metrics.
- B. Juniper Mist focuses solely on post-connection service level expectations (SLEs) and does not monitor throughput or successful connects.
- C. Juniper Mist primarily focuses on pre-connection service level expectations (SLEs) and does not monitor throughput, successful connects, or switch health on Juniper EX Series and QFX Series switches.
- D. Juniper Mist can enforce throughput and successful connects but does not provide operational visibility or service level expectations (SLEs) for Juniper EX Series and QFX Series switches.

Answer: A

Explanation:

Juniper Mist Wired Assurance provides AI-driven operational visibility for EX and QFX switches. It defines and tracks Service Level Expectations (SLEs) across multiple performance areas including connectivity, throughput, and switch health.

"Wired Assurance uses AI and telemetry to deliver operational visibility, track service level expectations (SLEs), and monitor throughput, successful connects, and switch health through pre- and post-connection metrics." Option A: Correct - accurately describes the full scope of Wired Assurance.

Option B: Incorrect - Wired Assurance provides SLEs specifically for EX and QFX switches.

Option C: Incorrect - both pre- and post-connection SLEs are monitored.

Option D: Incorrect - Wired Assurance monitors both connectivity and device health.

NEW QUESTION # 30

Referring to the exhibit, what is the purpose of the Save button in the upper-right corner of the Mist dashboard?

- A. It previews the impact of the port configuration changes before applying them.
- B. It resets the port configuration to its default settings.
- C. It generates a backup of the current port configuration.
- D. It applies the port configuration changes to the switch.

Answer: D

Explanation:

In the Juniper Mist AI for Wired dashboard, administrators can select one or more switch ports (as shown in the exhibit, e.g., port

ge-0/0/25 on an EX4100-48MP). Once configuration changes are made - such as VLAN assignment, port profiles, PoE settings, or administrative state - the Save button must be clicked to confirm and apply those changes to the device.

"When making configuration changes in the Mist switch interface, the Save button must be used to confirm the modifications.

Clicking Save applies the selected port settings to the switch through Mist Cloud." Option A is incorrect: saving does not create a backup. Backups and snapshots are handled through Mist's configuration archive, not via the Save button.

Option B is incorrect: Save does not reset configuration; instead, it commits changes.

Option C is incorrect: there is no preview function tied to Save.

Option D is correct: the Save button is explicitly for applying configuration changes to the selected switch or port(s).

NEW QUESTION # 31

Which two statements are correct about deploying an EVPN-VXLAN fabric in a campus? (Choose two.)

- A. It is a Juniper Networks proprietary solution.
- B. It increases physical bandwidth.
- C. It simplifies Layer 2 network management.
- D. It increases the scalability beyond traditional VLAN limitations.

Answer: C,D

NEW QUESTION # 32

Switch events are classified into which three severity levels? (Choose three.)

- A. Critical
- B. Good
- C. Bad
- D. Neutral
- E. Ignored

Answer: B,C,D

NEW QUESTION # 33

Which component performs VXLAN encapsulation and de-encapsulation?

- A. VTEP
- B. VLAN
- C. WXLAN policy
- D. root bridge

Answer: A

Explanation:

In an EVPN-VXLAN architecture, the VXLAN Tunnel Endpoint (VTEP) is responsible for encapsulating and de-encapsulating Layer 2 Ethernet frames into VXLAN packets that traverse the IP underlay.

"Each device participating in a VXLAN overlay operates as a VXLAN Tunnel Endpoint (VTEP). The VTEP encapsulates Ethernet frames into VXLAN headers for transmission and de-encapsulates VXLAN packets back into Ethernet frames upon receipt."

Option A: Incorrect - VLAN is a Layer 2 construct, not responsible for encapsulation.

Option B: Correct - VTEP handles VXLAN encapsulation and de-encapsulation.

Option C: Incorrect - root bridge pertains to STP, not VXLAN.

Option D: Incorrect - WXLAN policy is not a valid networking term in Juniper documentation.
