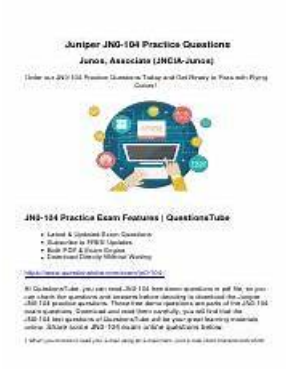
New Juniper JN0-336 Exam Question, Latest JN0-336 Exam Questions



We understand our candidates have no time to waste, everyone wants an efficient learning. So we take this factor into consideration, develop the most efficient way for you to prepare for the JN0-336 exam, that is the real questions and answers practice mode, firstly, it simulates the real Security, Specialist (JNCIS-SEC) test environment perfectly, which offers greatly help to our customers. Secondly, it includes printable PDF Format, also the instant access to download make sure you can study anywhere and anytime. All in all, high efficiency of JN0-336 Exam Material is the reason for your selection.

Don't be trapped by one exam and give up the whole Juniper certification. If you have no confidence in passing exam, BraindumpsPass releases the latest and valid JN0-336 guide torrent files which is useful for you to get through your exam certainly. The earlier you pass exams and get certification with our JN0-336 Latest Braindumps, the earlier you get further promotion and better benefits. Sometimes opportunity knocks but once. Timing is everything.

Latest JN0-336 Exam Questions - New APP JN0-336 Simulations

The passing rate of our JN0-336 study materials is 99% and the hit rate is also high. Our study materials are selected strictly based on the real JN0-336 exam. Our expert team guarantees that each answer and question is useful and valuable. We also update frequently to guarantee that the client can get more learning JN0-336 resources and follow the trend of the times. So if you use our study materials you will pass the test with high success probability.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q32-Q37):

NEW QUESTION # 32
While working on an SRX firewall, you execute the show security policies policy-name <name> detail command.
Which function does this command accomplish?

- A. It shows the system log files for the local SRX Series device.
- B. It identifies the different custom policies enabled.
- C. It shows policy counters for a configured policy.
- D. It displays details about the default security policy.

Answer: C

Explanation:
The function that the show security policies policy-name <name> detail command accomplishes is showing policy counters for a configured policy. Policy counters are statistics that indicate how many times a policy has been matched by traffic and what actions have been taken by the policy. Policy counters can help you monitor and troubleshoot the performance and effectiveness of your security policies. The show security policies policy-name <name> detail command displays detailed information about a specific policy, such as its source zone, destination zone, description, state, hit count, byte count, packet count, action count, and session count.
Reference: = show security policies, show security policies information, [SRX] How to troubleshoot a security policy that is not passing data

NEW QUESTION # 33
After JSA receives external events and flows, which two steps occur? (Choose two.)

- A. Before formatting the data, the data is analyzed for relevant information.
- B. After the information is filtered, JSA responds with active measures
- C. Before the information is filtered, the information is formatted
- D. After formatting the data, the data is stored in an asset database.

Answer: C,D

Explanation:
When JSA (Juniper Secure Analytics) receives external events and flows, the typical processing steps are:
Option C. Before the information is filtered, the information is formatted.
Data formatting is an initial step in the process where raw data from events and flows is converted into a standard format that can be more easily processed and analyzed by JSA.
Option A. After formatting the data, the data is stored in an asset database.
Once the data is formatted, it is stored in an asset database. This database acts as a repository for all the formatted data, enabling JSA to perform further analysis, correlation, and eventually, to maintain a comprehensive view of the network assets and activities.
These steps are part of JSA's comprehensive approach to security event management, which involves collecting, normalizing, and analyzing data to identify potential security threats and vulnerabilities efficiently.

NEW QUESTION # 34
Which two sources are used by Juniper Identity Management Service (JIMS) for collecting username and device IP addresses? (Choose two.)

- A. DNS
- B. Microsoft Exchange Server event logs
- C. Active Directory domain controller event logs
- D. OpenLDAP service ports

Answer: A,C

Explanation:
Juniper Identity Management Service (JIMS) collects username and device IP addresses from both DNS and Active Directory domain controller event logs. DNS is used to resolve hostnames to IP addresses, while Active Directory domain controller event logs are used to get information about user accounts, such as when they last logged in.

NEW QUESTION # 35
You need to deploy an SRX Series device in your virtual environment. In this scenario, what are two benefits of using a CSRX? (Choose two.)

- A. The cSRX default configuration contains three default zones: trust, untrust, and management.
- B. The cSRX supports firewall, NAT, IPS, and UTM services.
- C. The cSRX supports Layer 2 and Layer 3 deployments.
- D. The cSRX has low memory requirements.

Answer: B,D

Explanation:
Two benefits of using a cSRX in your virtual environment are:
The cSRX supports firewall, NAT, IPS, and UTM services: The cSRX is a containerized version of the SRX Series firewall that runs as a Docker container on Linux hosts. It provides the same features and functionality as the SRX Series physical firewalls, such as firewall, NAT, IPS, and UTM services. The cSRX can protect your virtual workloads and applications from various threats and attacks.
The cSRX has low memory requirements: The cSRX is designed to be lightweight and efficient, with low memory and CPU requirements. The cSRX can run on as little as 1 GB of RAM and 1 vCPU, making it suitable for resource-constrained environments. Reference: = cSRX Overview, cSRX Container Firewall Datasheet

NEW QUESTION # 36
You administer a JSA host and want to include a rule that sets a threshold for excessive firewall denies and sends an SNMP trap after receiving related syslog messages from an SRX Series firewall.
Which JSA rule type satisfies this requirement?

- A. common
- B. event
- C. offense
- D. flow

Answer: C

Explanation:
An offense rule in JSA is designed to aggregate multiple events or log entries based on specified criteria into a single offense, which can then trigger responses such as notifications or actions like sending an SNMP trap. This type of rule is well-suited for scenarios where you need to monitor for patterns or rates of events, such as excessive firewall denies, and take action when these exceed defined thresholds.
Offense rules can analyze both event and flow data, making them highly versatile for comprehensive security monitoring.

NEW QUESTION # 37
.....

With many advantages such as immediate download, simulation before the real test as well as high degree of privacy, our JN0-336 actual exam survives all the ordeals throughout its development and remains one of the best choices for those in preparation for exams. Many people have gained good grades after using our JN0-336 real test, so you will also enjoy the good results. Don't hesitate any more. Time and tide wait for no man. If you really long for recognition and success, you had better choose our JN0-336 exam demo since no other exam demo has better quality than our JN0-336 training questions.
